18	ing the field forces in the preparation of litigation reports for civil and criminal cases.						
19	A further program of hazard reduction surveys has been initiated in the current year as a forerunner to developing new plans and						
20	procedures.						
21	The proposed budget for the 1958-59 Fiscal Year continues the program at the same level with continuing emphasis on encouraging						
22	private co-operators to enter even more fully into the action program based upon the information received under the research						
23	program.

51							
52	FOREST PROTECTION—DISTRICT HEADQUARTERS						
53							
54	Program and Performance						
55							
56	The Division of Forestry is divided into 6 administrative districts with activities in each district co-ordinated through district head-						
57	quarters under the direction of a deputy state forester. In addition to general direction on all division activities the district pro-						
58	vides the services of specialists in forest fire prevention, law enforcement, engineering, automotive maintenance and construction.						
59	The ranger units, under the direction of the district headquarters, receive guidance in all division activities from the district deputy						
60	and his staff. The program for the ranger units is developed and administered from this headquarters. The various specialists						
61	assist the ranger unit in fulfilling the program and the development of new procedures.						
62	Because of the increased workload at the district level, the 1957-58 Budget provided positions in the various districts to assume staff						
63	responsibility for fire control, automotive maintenance, communications, and, where justified by the number of camps, a position						
64	for co-ordination of honor camp programs. Positions were also added to assist in the fire prevention and law enforcement work.						
65	The main program change provided in the 1957-58 budget was the establishment of 2 training centers. The primary mission of the						
66	training centers during the 1957-58 year has been to train probationary drivers. The successful completion of this course is a						
67	requirement of the probationary period. The augmentation of this training program will result in more adequately trained em-						
68	ployees and provide a better base for promotion to the more responsible positions in the Division of Forestry.						
69	The 1958-59 budget proposes the addition of 6 junior civil engineers to assist in the ever increasing workload brought about by the						
70	need for projects for the forestry honor camps, and the more accurate determination of property lines at existing and proposed						
71	facilities which was made necessary by the ever increasing value and use of California wildlands. 2 additional auto mechanics and						
72	3 additional automotive maintenance foremen are provided for maintenance and repair of the division's fleet. 1 additional inter-						
73	mediate stenographer-clerk is provided for the District II headquarters because of the current workload.						
74

40							
41							
42	FOREST PROTECTION—FIELD SERVICES						
43							
44	Program and Performance						
45							
46	This function provides for the operation of fire suppression camps, forest fire lookouts, and county headquarters offices. The primary objective is to provide trained suppression crews to make efficient initial attack on forest fires and to provide a flexible organization to develop into the required manpower needs to deal with large campaign fires. In addition, field administrative personnel are active in all programs of the division in forest and range management.						
47							
48	The 30 ranger units in the division operate 243 suppression stations, 34 patrolmen and 76 lookouts to protect the 23,133,695 acres of state lands, private lands, and intermingled federal lands under the division's direct protection. In the 1956 calendar year there were 1,758 forest fires totaling 64,716 acres burned. Present statistics indicate that there will be a slight increase in the number of fires and an acreage burn in excess of 125,000 acres for the 1957 season.						
49							
50	The 1958-59 Budget provides for several program modifications. During the current year the Yuba County and Nevada County Ranger Units were consolidated. This has resulted in a reduction of the number of state forest rangers by 1. A fractional position of forest fire dispatcher is added for the Madera Ranger Unit to provide a permanent dispatcher from state funds. The present dispatcher position is provided during part of the year from county funds under contract. The 12 forest fire fighter foreman positions are provided for certain smaller units having need on a workload basis for combination warehouseman assistant dispatchers. The warehousing function will be assumed by this position. In addition, the critical need for relief dispatching will be satisfied. 3.6 man-years of summer suppression crew time is provided for the direct protection of the Butte Meadows area formerly contracted to the United States Forest Service. This assumption will be at the contract price paid to the United States Forest Service and will not reflect an increased cost to the division's budget. In addition 0.7 man-years of forest fire lookout time is provided for the Round Top Lookout in Contra Costa County. In prior years this station has been carried by a direct payment to Contra Costa County.

55							
56	FOREST PROTECTION—FORESTRY CAMPS						
57							
58	Program and Performance						
59							

The forestry camps are operated in co-operation with the Department of Corrections and the Youth Authority. The Division of Forestry is responsible for determining the need for a camp in a given area and for the construction of such camps. Under existing agreements the division is responsible for the work program and the supervision of the inmates during the working day. In addition to the work program the camps provide added manpower for forest protection and fire suppression work. In all it is estimated that the camp program will house 265 wards of the Youth Authority and 1,015 inmates from the Department of Corrections.

As of July 1, 1958, 3 permanent camps and 3 "spike" or temporary camps will be operated for Youth Authority wards, and 12 permanent camps and 1 "spike" or temporary camp will be available for Department of Corrections inmates. It is estimated that the following camps will be placed in operation during the 1958-59 Fiscal Year: Crystal Creek, Puerta La Cruz, Pilot Rock, Chamberlain Creek, and Plum Creek. In addition it is proposed to extend the operation of the temporary camp at Beaver Creek to full-year operation with winter operation from the Folsom State Park area.

The 1958-59 Budget provides for transfer to the support budget of 2 positions of forestry work project supervisor provided in the Capital Outlay program during the current year for the Chamberlain Creek and Plum Creek projects. The third work project supervisor is a new position for the operation of the Beaver Creek-Folsom project. This supervision is now provided by a position to be utilized full-time by the Vallecito camp operation. The man-years of forestry work project foreman and forestry equipment operator provided are for new camps to be activated during the budget year. Positions are budgeted on a workload basis contingent on the inmate complement of the facility.

53							
54	FOREST MANAGEMENT						
55	Program and Performance						
56							
57	This unit is divided into 3 functions consisting of Management of State Forests, Forest Practice, and Service Forestry, and deals						
58	primarily with the programs concerning the management of the timber resources on private land within the State of California						
59	The prime objective is to assist private landowners in attaining sustained yield forest management programs and to return to						
60	full production those timber producing lands that are presently understocked or devoid of timber.						
61	The division is responsible for the administration of 8 state forests. 3 of these forests are of sufficient size to be managed as						
62	demonstration units to illustrate proper sustained yield, forest management techniques, and to be utilized in forest management						
63	research. In the orderly conversion of these managed forests from old growth to sustained yield second growth stands, the State						
64	presently realizes annual revenue in excess of \$500,000 from timber sales. The 1958-59 Budget proposes the addition of 0.6 of						
65	a man-year of seasonal help to assist in the processing of the more diversified type of sales now being handled by the program						
66	The subfunction of Forest Practice administers the forest practice rules which govern logging practices on privately owned timber						
67	lands. During the 1956 calendar year, 3,572 inspections were made on 2,094 operations. It is anticipated that the same level						
68	of service will be required for the 1957 and 1958 calendar years.						
69	The subfunction of Service Forestry provides technical advice to small timber landownerships throughout the State, in an effort to						
70	teach the owners proper management techniques. During the 1956-57 Fiscal Year, 734 contacts were made involving a total com						
71	bined acreage of 123,838 acres. The service foresters provide technical assistance for the federal co-operative programs con						
72	cerned with the Soil Bank and the Agricultural Conservation Program. Due to the interest in the federal co-operative program						
73	and the realization of the true worth of the timber on small ownerships, the division is receiving an ever-increasing number						
74	of requests for assistance from private owners. During the current year a position was transferred from Range Improvement						
75	to Service Forestry to meet the increased needs for service forestry in the North Coast area. During the 1958-59 Fiscal Year						
76	no change is provided in personnel but it is believed that requests for service will continue to grow. Through in-service training						
77	a portion of the workload is being absorbed by the ranger unit personnel. This service forestry program is partially reimbursed						
78	by a grant from the Federal Government in the amount of \$28,000 under the Co-operative Forest Management Act.

37							
38	STATE NURSERY						
39							
40	Program and Performance						
41							
42	This function provides for operation of a nursery located near Davis and for 3 district nurseries located at forestry camps. The nurs-						
43	eries provide stock for public planting, windbreaks, soil control, and reforestation purposes.						
44	The 1958-59 budget provides for 1 forest technician to be assigned to the Davis Nursery for supervision of the nursery program at						
45	that facility. This function was formerly provided by a senior forest technician position. Because of program responsibilities						
46	assigned by Chapter 2313, Statutes of 1957, it is necessary to provide for increased workload. The new legislation cited provides						
47	for a program of surveys, studies, and experiments in forestation. The senior forest technician position previously referred to has						
48	been assigned the survey program as well as continuing responsibility for the nursery program.						
49

16	RANGE IMPROVEMENT						
17	Program and Performance						
18	Range improvement personnel are responsible for providing technical assistance to private landowners in the conversion of brush-						
19	lands to more productive range types in order to increase the carrying capacity of the California rangelands.						
20	Range improvement technicians advise private landowners regarding the most effective and economical methods to apply in converting						
21	brushlands. They also supply information concerning the adaptability of the various soil types for rangeland conversion and the						
22	recommended species of forage plants to be sown to achieve the most effective sustained results.						
23	Demonstration ranges are maintained in co-operation with private landowners to study and demonstrate the effects of conversion						
24	by mechanical means, chemical sprays, controlled use of fire, and various combinations of these methods.						
25	Several standby crews are provided to assist the landowner in the event a planned control burn escapes the established control						
26	lines and threatens other state or private lands.						
27	In co-operation with regular fire control forces, continuing experiments are being conducted to provide an adequate and economical						
28	method of attaining a satisfactory burn during the relatively nonhazardous periods of the year.						
29	The 1957-58 Budget provided a technician to co-ordinate the emergency revegetation program to prevent serious erosion and flood						
30	damage from critical watersheds that have been denuded by wildfire. A total of 7,827 acres were seeded under this program on 7						
31	fires which caused critical damage during the 1957 fire season. The emergency revegetation program is financed on a matching						
32	fund basis by the State and the private landowners or local political subdivision.						
33	The Range Improvement Program is continuing at the same level in 1958-59 as in the current year; however, with the increasing						
34	skill of field forces in dealing with land use conversion programs, the technical personnel are free to devote more time to						
35	research and demonstration projects.

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	CHANGE FROM 1957-58
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)				
1								
2	WATERSHED PROTECTION BY							
3	CO-OPERATING COUNTIES							
4								
5	The counties listed below receive payments from the State for the prevention and suppression of fires in areas of state responsibility.							
6	Payments are based on the level of service which the Division of Forestry provides for similar areas directly protected. The							
7	increased payments are computed on the level of service proposed for state protected areas for the 1958-59 Fiscal Year. During							
8	the current year the State assumed operation of the Round Top Lookout in lieu of direct payment to Contra Costa County;							
9	therefore no further payments are included for this county.							
10								
11	Contra Costa County-----				\$3,287	-	-	
12	Kern County-----				253,596	\$293,149	\$316,351	
13	Los Angeles County-----				324,767	395,700	423,910	
14	Marin County-----				80,792	92,125	100,369	
15	San Mateo County-----				84,328	91,879	99,239	
16	Santa Barbara County-----				115,206	138,597	151,687	
17	Ventura County-----				117,496	144,685	156,187	
18								
19	Totals, Watershed Protection by Co-operating Counties-----				\$979,472	\$1,156,135	\$1,247,743	\$91,608
20								(7.9%)
21								
22	PRIVATE LAND PROTECTION BY UNITED							
23	STATES FOREST SERVICE							
24								
25	Provision is made for payment to the United States Forest Service for protection of state and private lands based upon acreages							
26	of state responsibility land inside and adjacent to national forests offset by national forest land protected by the Division of							
27	Forestry. The increased payment proposed for 1958-59 is to support a fire crew organization which will provide a level of							
28	fire protection equivalent to that provided for state lands directly protected by the division.							
29								
30	Contract with United States Forest Service-----				\$804,475	\$953,677	\$991,191	\$37,514
31								(3.9%)
32								
33	WHITE PINE BLISTER RUST CONTROL							
34								
35	Expenditures for the control of white pine blister rust disease are matched by the United States Department of Agriculture for							
36	protection of the State's sugar pine resources. No changes are contemplated in the method of control for 1958-59, therefore the							
37	current expenditure level is continued.							
38								
39	Allotment to United States Department of Agriculture-----				\$112,780	\$115,000	\$115,000	
40								
41								
42	EMERGENCY FIRE SUPPRESSION AND DETECTION							
43								
44	Additional manpower and equipment for detection and suppression of forest fires in emergency situations beyond the ability of the							
45	regular crews are provided by this item. Based on past years' expenditures and current year requirements to date, excluding a							
46	possible additional amount of \$100,000 for the spring period, the same amount as now provided is proposed for the 1958-59 Fiscal							
47	Year. Current information indicates that additional funds will be required for the spring period as current year resources are							
48	exhausted.							
49								
50	SALARIES AND WAGES							
51	Temporary help-----				\$22,615	\$65,000	\$65,000	
52								
53	OPERATING EXPENSES							
54	General expense-----				14,392	6,600	6,600	
55	Subsistence-----				86,481	90,000	90,000	
56	Housing supplies and services-----				3,029	2,100	2,100	
57	Airplane--rental-----				26,759	20,000	20,000

62	Contract labor-----				39,800	65,000	65,000	
63								
64	UNALLOCATED -----				-	100,000	-	
65								
66	Totals, Emergency Fire Suppression and Detection-----				\$228,375	\$420,000	\$320,000	-\$100,000
67								(-23.8%)
68								
69	FOREST INSECT CONTROL							
70								
71	This program provides for the control of forest insect infestations, principally pine beetles, on state and private forest lands. State							
72	expenditures on private lands are on a cash or labor matching basis under rules established by the State Board of Forestry in							
73	accordance with Section 4455 of the Public Resources Code. The budgeted amount has been provided for the past several years							
74	and is proposed for 1958-59. Potential insect control zones for 1958-59 operations include the McGee-Sheppard, Laguna Moun-							
75	tains, and Corte Madera. Control has now been completed in the Mill Potrero and Stanislaus zones of infestation.							
76								
77	Osborne Hill zone of infestation-----				\$283	-	-	
78	Mill Potrero zone of infestation-----				2,600	-	-	
79	San Bernardino zone of infestation-----				4,600	\$4,600	\$4,600

25	Totals, Wild Land Vegetation and Soil Mapping-----				\$91,970	\$93,555	\$101,762	\$8,207 (8.8%)
28	FIRE WEATHER INDEX							
30	This index predicts potential fire weather conditions for 1 day and trends for several days. It has been compiled by the United							
31	States Weather Bureau for several areas as a special service. With the assistance of the state appropriation for the last three							
32	years the project was continued and will be completed by the end of the current fiscal year.							
34	Contract with United States Weather Bureau-----				\$10,000	\$10,000	-	-\$10,000 (-100%)
37	WATERSHED RESEARCH							
39	This program began under Chapter 1415, Statutes of 1947. State funds supplement federal appropriations for the California Forest							
40	and Range Experiment Station of the United States Department of Agriculture in order to maintain the continuity of rainfall							
41	and stream flow records for the San Dimas Experimental Station, and to publish results of research of value in watershed man-							
42	agement in California. Continuation of the program is proposed for 1958-59.							
44	Allotment to United States Department of Agriculture for water-							
45	shed research-----				\$24,000	\$24,000	\$24,000	
48	FOREST AND FIRE RESEARCH							
50	A program of basic research, field studies, and investigations with respect to the prevention and control of forest and brush fires;							
51	reforestation of burned-over land and nonproducing lands; and other resource areas related to activities under the division's							
52	jurisdiction are provided in this item. Reforestation studies authorized by Chapter 2313, Statutes of 1957, are continued as are							
53	the projects initially financed in the current year budget for forest fire research. In addition, Chapter 2405, Statutes of 1957,							
54	makes an annual appropriation of \$100,000 commencing with the 1958-59 Fiscal Year from the State Lands Act Fund to the							
55	Division of Forestry for a research program. Areas planned for research and investigation from these funds during 1958-59 are							
56	listed below.

12	GENERAL ANALYSIS				
13					
14	Objectives				
15					
16	The primary objective of this division is to serve and assist the State's mineral industries in discovering, developing, and utilizing				
17	the abundant mineral resources found within the State. As required by law, the division also maintains and operates a mineral				
18	museum, laboratory and library in San Francisco and licenses purchasers of gold and silver.				
19					
20	Program and Performance				
21					
22					
23	As the means of accomplishing its objectives the division encourages and makes special studies of the mineral resources and mineral				
24	industries of the State. The results of these studies are published for distribution to libraries and for sale to the public. Typical				
25	geological and mineralogical specimens are collected and displayed and with its library and laboratory the agency serves as an				
26	information bureau for the mining industry and the public.				
27	With minor adjustments to provide for price level changes and increasing activity of the division's staff the current support level				
28	is continued for the 1958-59 Fiscal Year. The net decrease in support expenditures for the budget year results from a change				
29	in the method of budgeting receipts from the sale of the division's publications. Sales formerly were handled as revenue for the				
30	General Fund but are now accounted as a reimbursement to the support appropriation. This change makes the reporting of				
31	actual costs for the division's operations possible.				
32	Publishing a colored edition of the State Geologic Map was initiated in the current year as a 4-year program. \$36,980 is proposed				
33	for the second year of the program in order to publish additional map sheets during 1958-59. Reimbursement from sales of				
34	these maps are estimated at \$5,000.

GENERAL ANALYSIS

Objectives

Supervision of the method of drilling and maintenance of oil wells in order to prevent waste and damage to oil and gas deposits and to prevent contamination of fresh water resources is the responsibility of this division.

Program and Performance

Under direction of the State Oil and Gas Supervisor, the division is organized into 6 districts each supervised by an oil and gas engineer. District 6 was activated in the current year due to increased activity and workload in the counties north of the San Francisco Bay region. Oil and gas engineers inspect all oil and gas wells and collect necessary information in order to determine the presence and source of water in the oil sands and the location and extent of strata bearing water. This information is used to advise operators of the best means of protecting the oil and gas sands, the water-bearing strata, and surface waters.

^a Composed of savings in salaries and wages, \$392; operating expenses, \$6,402; equipment, \$1,433; and excess reimbursements, \$231.

^b Composed of savings in appropriation publishing State Geologic Map.

19	Technical articles written	8	15	12	13	15	16	
20	The division is supported by an annual assessment against oil and gas producers based on the amount of petroleum produced and							
21	gas produced and sold.							
22	During the current year special consultants were employed as needed to advise the State Oil and Gas Supervisor regarding "maxi-							
23	mum efficient rates of production" as recommended by the Conservation Committee of California Oil Producers. The work of							
24	the consultants augmented regular staff review of such recommendations. Employment of consultants is necessary to fulfill the							
25	responsibilities of the supervisor under Section 3450 of the Public Resources Code. The provision of funds for special consult-							
26	ants is therefore continued for the 1958-59 Fiscal Year.							
27	The remainder of the agency program is continued at the existing level with minor adjustments for increased costs of operations.

GENERAL ANALYSIS

Objectives

The division was created by Chapter 2362, Statutes of 1957, to implement the State's small craft harbors program. The division may prepare plans for, and acquire, construct, develop and improve small craft harbors, facilities in connection therewith, and connecting waterways. The agency is to assist cities, counties, and harbor districts in small craft harbor and waterway developments. All financial assistance given by the division is on a loan basis.

Program and Performance

The general policies guiding the division are set by the 5-member Small Craft Harbors Commission. Funds for operation of the agency are available in the Small Craft Harbors Revolving Fund. Support during the current year was provided by \$40,000 transferred to the fund by Chapter 2408, Statutes of 1957 and \$12,998 transferred from support of the State Lands Division by Chapter 2362, Statutes of 1957.

During the current year the commission was activated and the division was formed. Initial staff was provided to concern itself with the primary responsibilities assigned by enabling legislation. An engineering staff consisting of an associate civil engineer, engineering aid, and delineator was also provided in the current year in addition to the nucleus staff. This staff is continued in the budget year as proposed new positions. The positions are required to perform various field responsibilities particularly in the area of assistance to local agencies where requested. The division has received a substantial number of requests for such assistance. The engineering staff is also to be available to review requests for loans presented to the commission. The clerical position is provided to assist with the anticipated workload arising from the engineering responsibilities.

The division is supported from a revolving fund. The budget act provides for transfer of sufficient funds from the State Lands Act Fund to supplement the balances available for support estimated to remain after the current year expenditure program is financed. Chapter 2375, Statutes of 1957 transferred \$100,000 from the Investment Fund to make loans to local agencies. An additional transfer of funds from the Investment Fund is provided to supplement resources in the revolving fund available for loans.

^a Composed of savings in salaries and wages, \$4,645; operating expenses, \$3,712; and equipment, \$568.

^b A nonrevenue fund. Neither the revenue nor the expenditures are included in the overall budget totals.

17						
18	GENERAL ANALYSIS					
19	Objectives					
20						
21	The division assists in the organization and operation of soil conservation districts and, under policy direction of the State Soil Con-					
22	servation Commission, co-ordinates the planning of the "small watershed" program under Public Law 566. In addition the divi-					
23	sion authorizes purchases of equipment from the Soil Conservation Development Fund for soil conservation work for rent or sale					
24	to districts.					
25						
26	Program and Performance					
27						
28	Workload of the division is divided between the noutechnical and the techuical types of assistance to the various state soil conserva-					
29	tion districts. Nontechnical assistaunce generally covers advice and guidance on district administration, with suggcstions and					
30	encouragement for suitable soil couserveation activities. Staffing for this phase is based on 1 soil conservation positiou for each					
31	12 existng districts as of the beginning of the fiscal year. 3 additional positions of assistant soil conservationist are pro-					
32	posed for the 1958-59 Fiscal Year based on the anticipated number of soil conservation districts in the State as of July 1, 1958.					
33	1 new position of intermediate typist-clerk is included, based on the workload created by the additional conservationist positions.					
34	The technical phase of assistance is performed in conjunction with the provisions of Public Law 566, as amended by Public Law					
35	1018. The division will have 2 small watershed planning teams which, with an existng United States Soil Conservation Service					
36	planning team, will do planning work on small watersheds, including upland management and diversion structures, for which the					
37	comission has approved an application. The purpose of the state-supported planning team is to more quickly establish the State's					
38	eligibility for federal funds to be used for financing flood control structures up to a maximum of 5,000 acre-feet capacity. The					
39	water conservation structures may have a capacity up to 25,000 acre-feet with the cost of the water conservation features being					
40	borne by local interests.					
41	Workload of the division is illustrated by the following table:

COMMITTEE FOR THE DEVELOPMENT OF THE CALIFORNIA PUBLIC OUTDOOR RECREATION PLAN

Office at Sacramento

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	CHANGE FROM 1957-58
1	SUMMARY				
2					
3	TOTAL EXPENDITURES				
4	Support (General Fund)-----	-	\$56,020	\$128,184	\$72,164
5					(128.8%)
6					1.9
7	Personnel man-years -----	-	7	8.9	
8					
9					
10					
11	GENERAL ANALYSIS				
12	Objectives				
13					
14	The objectives of the Public Outdoor Recreation Committee are to consider, develop, and recommend to the Legislature a public out-				
15	door recreation plan which will provide adequate outdoor recreation facilities to meet the needs of the State's growing popu-				
16	lation.				
17					
18	Program and Performance				
19					
20	The committee, created by Chapter 2318, Statutes of 1957, is composed of the Directors of Natural Resources (chairman), Fish				
21	and Game, Water Resources, Recreation, Finance, and Education; the Chief of the Division of Beaches and Parks; and the				
22	Executive Officer of the State Lands Commission. The committee may also appoint a technical consultant group and an ad-				
23	visory council to assist with development of the California Outdoor Recreation Plan.				
24	Under direction of an executive officer selected by the committee, a staff is being recruited to perform the duties required for develop-				
25	ment and preparation of the plan for submission to the Legislature on or before March 1, 1960. Chapter 2318 also requires pre-				
26	liminary reports on March 1, 1958, and March 1, 1959. The work program as planned will result in a report to the Legislature				
27	consisting of an inventory of parks, recreational areas, and facilities; a determination of public needs; and recommendations				
28	for financing at each level of government to insure an integrated program.				
29	During the current year it is anticipated that a staff of 7 positions will be recruited by the committee and work will be initiated on				
30	the inventory of facilities and on other phases of the study culminating in the first partial report to the Legislature. Present				
31	planning contemplates that substantial staff assistance will be provided by various participating state agencies.				
32	In order to complete the final report by March 1, 1960 it is anticipated that additional temporary help and contractual services with				
33	private research organizations will be required for 1958-59 in addition to full-year expense requirements for the regular staff op-				
34	erations. During the budget year the committee staff will continue to be augmented by staff assistance from the various agencies				
35	concerned with recreational resources of the State.

8					
9	GENERAL ANALYSIS				
10	Objectives				
11					
12	The Recreation Commission helps the State and its communities to develop and utilize recreation areas, facilities and programs, formulates policies and aids in the co-ordination of local, state and federal recreation activities.				
13					
14	Program and Performance				
15					
16	Upon request, the commission's staff provides technical services to recreation agencies of unincorporated communities, cities, counties, recreation and park districts, school districts, voluntary organizations, universities and colleges, and state agencies.				
17	Surveys of recreation needs and studies of the feasibility of special recreation districts are conducted upon request of governing bodies.				
18	The agency makes periodic inventories of public facilities and programs that exist or may be needed and publishes findings in compilations, annual report to the Governor, operating guides and directories.				
19	The director is assisting in developing a public outdoor recreation plan for the State.				
20	Cost increases over 1956-57 are due to salary and price increases and expenses related to increased activity.

14					
15	GENERAL ANALYSIS				
16	Objectives				
17					
18	The Department of Public Health, in co-operation with local health departments, is responsible for the prevention of disease and				
19	the provision of a healthful environment for the people of California.				
20					
21	Program and Performance				
22					
23	During the past year, the department operated a special polio vaccination program. This program, financed by a special legislative				
24	authorization of \$3,000,000 together with the earlier programs financed from federal funds, and the vaccinations performed by				
25	private physicians, has resulted in a dramatic reduction in the incidence of paralytic polio. There was an 87 percent reduction				
26	in the crippling effects of this disease, when compared with the 5-year average covering the period 1950-1954, inclusive.				
27	The department has continued to make progress in the air pollution control field. 1 permanent air sampling station has been estab-				
28	lished by the department and 3 other such stations will be in operation shortly. Investigation in the southern part of the				
29	State has revealed that masses of polluted air sometimes move great distances. 1 such air mass was traced from Los Angeles				
30	out to sea and back to San Diego, where it caused 1 of the highest recorded episodes of smog in that city. Further investiga-				
31	tion of the composition and movement of such polluted air masses is in progress.				
32	During the past year, the department continued its policy of co-operating with nationwide studies aimed at the reduction of dis-				
33	ease. 3 examples of such projects undertaken were:				
34	1. A federally financed investigation into the treatment of cancer by chemotherapy.				
35	2. An investigation into the medical aspects of automotive crash injuries, in co-operation with the Highway Patrol and Cornell				
36	University.				
37	3. The streptococcal disease study, a nationwide attempt to further investigate this condition which is suspected of being a				
38	cause of rheumatic fever.				
39	The Division of Laboratories continued its program of developing new and improved methods of disease identification, and during this				
40	period developed a new method of recovering disease organisms from sewers.				
41	The regulations pertaining to premarital and prenatal syphilis tests were revised and simplified. This should lead to a reduction of				
42	the number of tests and reports required in this program.				
43	The Bureau of Maternal and Child Health was successful in stimulating the establishment of a network of locally operated poison				
44	control centers which will provide emergency information in cases of poisoning. This program should be effective in reducing				
45	deaths from poisoning, particularly in the cases of children.				
46	The statewide California Morbidity Survey was completed and the results were published last year. This survey provides new infor-				
47	mation about the health of the people of the State. During the current year the department initiated a continuing morbidity				
48	study, approved by the Legislature at the last session. This study, made in connection with the national health survey, already				
49	is giving an excellent week-to-week indication of the incidence of influenza, and in the future will provide information which				
50	should help in preventing the occurrence of disease in California.				
51	During the present year, the department has assumed the operation of the Alcoholic Rehabilitation Program. No major changes will				
52	be made in this program during the current or budget year, but every effort is being made to present to the next general session				
53	of the Legislature a recommendation for a comprehensive and effective program in this field.				
54	The department is continuing its program of providing consultative services to local health departments in the fields of maternal and				
55	child health, tuberculosis control, public health nursing, medical social service, nutrition, vector control and dental health.				
56	Field studies and consultation are provided in the fields of industrial diseases, chronic diseases and water and sewage sanitation.				
57	The Crippled Children Program, operated in co-operation with local health and welfare departments, is continued. This program is				
58	partially supported by a State subvention and provides medical care for crippled children whose parents are unable to provide				
59	needed services.				
60	Action is being taken to safeguard the records of births, deaths and marriages maintained by the department. This registry continues				
61	to grow in proportion to California's expanding population.				
62	Licensing programs are operated for hospitals, laboratories and laboratory technicians, audiometrists, canneries and a number of re-				
63	lated food producing establishments.				
64	The food and drug inspection program continues to provide protection from adulterated foods, drugs and beverages. A program of				
65	kosher food inspection is being initiated in accordance with legislative direction.				
66	The health education program stimulates education in the health field by the development of media and consultation to departmental				
67	staff and local agencies.				
68	During the fall and early winter months the Bureau of Acute Communicable Diseases was particularly concerned with the possibility				
69	of an influenza epidemic in the State. Every effort was and is continuing to be made to gather information about the incidence				
70	of this disease and to promote vaccination programs which will protect high risk groups.				
71	There have been several organizational and procedural changes which should make for more efficient operation. In the Division of				
72	Administration, the personnel office was reorganized and a Bureau of Personnel and Training was established. This bureau has				
73	already begun to make a substantial contribution in more effective staff training.				
74	In the Bureau of Chronic Disease and Crippled Children Services, administrative assistant chiefs were added. This change in the				
75	administrative structure of these large bureaus will relieve physicians of administrative detail and make for more efficient opera-				
76	tion of these programs.				
77	The department, in conformance with legislative policy, turned over to the Department of Finance all of its general purpose auto-				
78	mobile equipment and a branch of the Department of Finance's car pool was established in the Berkeley headquarters building.				
79	This has resulted in greater availability of cars to the staff when necessary and permits the State to obtain the advantage of a				
80	centralized pool operation.				
81	^a Grants from the Federal Government and expenditures therefrom are not included in the overall budget totals.

DEPARTMENT OF PUBLIC HEALTH—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	GENERAL ANALYSIS—Continued			
2				
3				
4	Program and Performance—Continued			
5				
6	No major changes are contemplated in departmental operation during the budget year. It is anticipated that the future will show a			
7	progressive increase in the investigative research conducted by this department with funds supplied by the Federal Government			
8	and private foundations. In public health, as in many other fields of scientific endeavor, the current need is for more and better			
9	information. Part of this need will be satisfied by the continuing morbidity survey mentioned above. In addition to this survey,			
10	research in the air pollution, chronic disease, virus and other related health fields will be continued.			
11	This budget proposes 2 positions in the Bureau of Chronic Disease to investigate the mortality aspects of air pollution, 1 addi-			
12	tional engineer in air sanitation, a chemist and clerk in the Division of Laboratories to provide services for the air monitoring			
13	network, and a clerk in the Bureau of Business Management to help solve the clerical workload problem in the Fresno field office.

20				
21	DIVISION OF ADMINISTRATION			
22				
23	Objectives			
24				
25	The Division of Administration, including the Director's Office, the Bureau of Business Management, the Bureau of Personnel and			
26	Training, the Bureau of Health Education, and the Bureau of Records and Statistics, provides administrative direction and staff			
27	services for the department with consultation to local health departments in these fields.			
28				
29	Program and Performance			
30				
31	Business services for the department including general administrative and operative services, stock room, mail and messenger service,			
32	operation of building and telephone switchboard, accounting, budget preparation and control, purchasing, and maintenance of a			
33	car pool of specialized vehicles are centralized in the Bureau of Business Management.			
34	The Bureau of Personnel and Training has a dual responsibility: first, to develop and administer a comprehensive personnel manage-			
35	ment program, including employee relations, a classification and salary plan, a recruitment and placement program, and other			
36	related personnel services; second, to initiate and carry out a training program, including accredited university training, employee			
37	orientation, technical refresher courses, and administrative and supervisory training. Local health offices are assisted on personnel			
38	and training problems. Also included is an information program for domestic and foreign visitors.			
39	The Bureau of Records and Statistics provides direction and assistance as well as related processing services in the development of			
40	public health records and statistics. This unit provides service to local health agencies as well as to the various units of the			
41	department and includes the preparation of special interpretive reports, analysis of statistical data relating to births, deaths,			
42	marriages, populations, and statistical consultation services to specific programs.			
43	The Bureau of Health Education provides health education services and consultation to local health departments, to other administra-			
44	tive units of the department, and to other state agencies and organized groups.			
45	An additional clerical position is proposed to provide minimum clerical service for the Fresno field office.

23	DIVISION OF ALCOHOLIC REHABILITATION						
24							
25	Objectives						
26							
27	This division was established within the Department of Public Health by Chapter 1004, Statutes of 1957 to replace the Alcoholic						
28	Rehabilitation Commission. It engages in the treatment and rehabilitation of alcoholics and investigates and studies all phases						
29	of the rehabilitation of alcoholics, and all factors necessary to the reduction and prevention of chronic alcoholism and other exces-						
30	sive uses of alcohol.						
31							
32	Program and Performance						
33							
34	The present program consists of research, education and treatment. Research is conducted both by state staff and other agencies						
35	under contract in the following areas:						
36	1. The nature of alcoholism and the metabolism of alcohol in the human body.						
37	2. Experimental methods of treating alcoholics.						
38	3. Followup studies to evaluate the effectiveness of treatment methods and studies related to the causation of alcoholism.						
39	Treatment of alcoholics is conducted through the support of 7 pilot community clinics. Educational and public information programs						
40	include the publication of a monthly bulletin, dissemination of appropriate information, distribution of pertinent literature and						
41	sponsorship of certain training institutes.						
42	This budget continues this program at the level of service approved by the 1957 Legislature.

DIVISION OF ENVIRONMENTAL SANITATION

Objectives

The Division of Environmental Sanitation has the primary responsibility for the services necessary to provide a healthful environment for the people of California.

Program and Performance

The division consists of; Bureau of Air Sanitation, Bureau of Sanitary Engineering, Bureau of Vector Control, Bureau of Food and Drug Inspection, Cannery Inspection, and the Home Safety Project.

The Bureau of Sanitary Engineering administers a program of consultation, inspection and regulation in the fields of sewage disposal, industrial waste disposal, water supply, sanitation of bathing places and recreational areas, and water contamination.

The program of the Bureau of Air Sanitation includes investigation of the effects of air pollution and assistance to local agencies in the measurement and control of air pollution and its effects. A minimal air monitoring network is maintained in co-operation with local air pollution authorities.

10	DIVISION OF LOCAL HEALTH SERVICE						
11	Objectives						
12	This division has the responsibility of integrating the policy and program objectives of the State Department of Public Health with those of the local health departments of the State, and for providing local health services under contract to areas without organized health departments.						
13	Program and Performance						
14	Liaison is maintained with each of the individual local health departments, with the Conference of Local Health Officers and all other divisions and bureaus of this department. A minimal public health program is operated under contract with small counties who do not maintain their own health departments. The program for residency training in public health is co-ordinated in this division.

33	PUBLIC HEALTH TRAINING						
34	Objectives						
35	The accredited and nonaccredited training program administered by the Bureau of Personnel and Training is designed to provide adequately trained personnel for local health departments.						
36	Program and Performance						
37	Institutes and seminars are organized and conducted to increase the competence of professional public health staff members. Stipends are granted for advanced training in the field of public health. Special project grant funds are transmitted to the University of California for special training projects.

10					
11	GENERAL ANALYSIS				
12	Objectives				
13	Under the Director of Public Works, the department designs and supervises construction of state buildings, highways, and bridges; administers the State Contract Act, and supervises construction of public school buildings. The department is organized into 4 divisions: Architecture; Highways; San Francisco Bay Toll Crossings; and Contracts and Rights-of-way. The director is also chairman of the California Highway Commission and a member of the California Toll Bridge Authority, the State Public Works Board, the State Allocation Board, and several other boards and committees. The administration division consists of the immediate staff of the director, which assists him in carrying out his responsibilities for overall direction and co-ordination of the department.				
14	Program and Performance				
15	The executive group consists of 2 deputy directors and an assistant director. There are staff specialists for general administration, fiscal affairs, personnel management, public information, and management analysis, plus clerical services. The executive positions serve as direct representatives of the director in the exercise of his responsibility for departmental operations, in his various ex officio capacities, and in relation to the large number of officials, agencies, and citizens affected by the work of the department. The staff specialists provide advice and assistance to the director and to the divisions.				
16	During the current fiscal year, the following changes were made. An information officer II position formerly shown in the Division of Highways budget was added to the departmental staff. This is not a change in organization or duties, but a budget transfer to reflect established organization more accurately. In addition, a personnel officer I position was established in lieu of a previously established personnel officer II position which had not been filled since May, 1956. An associate administrative analyst position is the only actual addition to the director's office staff during the current fiscal year. It was established in order to develop further the program of management analysis initiated by the department in 1956. Most of the cost of this additional position is offset by additional reimbursement from the State Highway Fund for management analysis work performed for the Division of Highways. The State Highway Fund is charged with that portion of the cost of departmental administration attributable to the Division of Highways.

41	GENERAL ANALYSIS							
42	Under direction of the State Architect, the Division of Architecture provides a pool of technical and professional civil service em-							
43	ployees to prepare the designs, plans, specifications and cost estimates, together with all other studies relating thereto, for all							
44	buildings, structures, and utility systems to be used by all state agencies and institutions except the University of California							
45	and the San Francisco Port Authority.							
46	The division is called upon for the survey and examination of any potential site for a construction project, the planning and design							
47	of major repair, alteration and maintenance projects, and the supervision, inspection and control of actual construction which							
48	is being carried out by private builders under contract with the State. Under certain conditions, the division may also under-							
49	take construction by the use of day labor hired by the division.							
50	By authority of the Field Act, Sections 18191 to 18205, inclusive, of the Education Code, the division is responsible for the checking							
51	and approval of all public school building plans, including alterations, and the inspection of such projects during construction to							
52	make certain that public school buildings are properly designed to meet all safety requirements, including earthquake, fire and							
53	storm.							
54	^a Composed of savings in salaries and wages, \$13,516; operating expenses, \$3,605; and loss in reimbursements, \$6,297.

		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)				
1								
2	GENERAL ACTIVITIES							
3								
4	Objectives							
5								
6	The administrators of the division and their clerical assistants provide the cadre for the operation of the function. The professional							
7	and technical staff with related clerical personnel whose salaries and expenses are provided by the Division of Architecture							
8	Revolving Fund are listed in the Appendix. The primary objective of the division, through the administration provided by							
9	the cadre staff, is to provide, within the funds appropriated or made available and within the time limits established by							
10	the using agency, those facilities of a nature and kind as will permit the using agency to discharge its function within the law.							
11								
12	Program and Performance							
13								
14	The program proposed contemplates no increase of service by the division. A continuation of a current-year appropriation of							
15	\$30,000 is proposed at \$33,000 to carry out a continuing program of materials and methods studies of a nonstructural							
16	nature. Funds for the support of the State Building Standards Commission are continued in the support budget of the division.							
17	During the Fiscal Year 1957-58, the division has prepared plans and specifications, and has entered into construction contracts							
18	for projects valued at an estimated amount of \$100,000,000. These projects include not only those projects for which appro-							
19	priations were made from the General Fund but also projects for which funds were made available through the 1956 Construction							
20	Bond Program and from Special Fund sources.							
21

59								
60	SUPERVISION OF PUBLIC SCHOOL BUILDING							
61	CONSTRUCTION							
62								
63	Objectives							
64								
65	This unit checks and approves plans and specifications for all new public school building construction and for all alterations and							
66	additions exceeding \$4,000 in estimated cost. The unit inspects such buildings periodically during the course of construction							
67	to insure compliance by the contractor with approved plans and specifications, as required by the Education Code. The							
68	unit is entirely self-supporting in that all funds appropriated for the support of the unit are from the Public Building							
69	Fund which, in turn, is supported by fees charged for services rendered by the division in connection with the checking of							
70	plans and specifications and supervision of construction.							
71	During the current year, several changes were reflected in the basic staffing pattern of the section. The changes represent im-							
72	proved service to handle the increasing workload in school building plan review and result from both organizational change							
73	and an expanded full-time engineering staff. Organizationally the supervisory staff was strengthened by reclassification of certain							
74	positions. In addition, because of an improved labor market, the section was able to recruit additional engineering and related							
75	staff. A previous commitment outlined in the 1957 Governor's Budget was fulfilled which added funds for 6 positions because							
76	of improved recruitment. In addition 4 engineering positions were established by conversion of overtime funds.							
77	During the budget year, it is proposed to continue the material and methods structural research program at a \$50,000 level for fur-							
78	therance of knowledge relating to the effects of earthquake. In addition a substantial program augmentation is provided as an							
79	urgency to meet a situation arising from a recent court decision. This change is reflected in the provision of 16 proposed new							
80	positions. The additional positions will permit more extensive review of school building plans including in addition to the gen-

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	CHANGE FROM 1957-58
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)				
1	SUPERVISION OF PUBLIC SCHOOL BUILDING							
2	CONSTRUCTION—Continued							
3								
4	Objectives—Continued							
5								
6	eral structural review (presently the substantial part of the plans review program) a more intensive examination of mechanical							
7	and electrical systems designed into the school building structures. The more intensive consideration of this phase of the inspec-							
8	tion program results from a Supreme Court decision in the case of Guy Hall vs. the City of Taft. This latter decision is pur-							
9	ported to have taken local jurisdictions out of the field of mechanical and electrical inspection where applied to the public school							
10	building program. Under present law, the local school district is required to provide an inspection service on a construction							
11	program to determine that a structure meets specifications. Augmented review by the division should assure that the adequacy							
12	of specifications will be reviewed to determine that not only are the structural aspects of the building adequate, but that the							
13	electrical and mechanical aspects of the structure are also adequate and properly represented in the specifications. In addition							
14	the division contemplates a training program at various local points to make sure that the inspectors employed by the local dis-							
15	tricts are familiar with the technique of inspection for electrical and mechanical phases of construction. Further, the added staff							
16	would devote a significant amount of time to field inspection to assist the school district inspectors.							
17	An indication of the workload of the section can be seen in the following:

The planning and construction of state highway improvements is carried as a continuous long-range planning program in accordance with policy established by the Legislature and is tailored to funds available from various sources, including federal aid, as provided by the Legislature and to statutory controls governing geographical distribution of construction expenditures in the northern and southern county groups and within individual counties. Funds for construction and rights-of-way are allocated by the California Highway Commission in accordance with these statutory requirements and on the basis of priority of need to best serve traffic. The California Highway Commission is a statutory body of 7 members, 6 of whom are appointed by the Governor, with consent of the Senate, for staggered 4-year terms. The Director of Public Works serves as ex officio 7th member and chairman of the commission. The commission also has the responsibility for adopting the location of state highways on routes authorized by the Legislature, and for declaring certain routes as freeways.

ADMINISTRATION

Program and Performance

The chief of the division of highways is the state highway engineer, who is assisted in the administration of the division by 2 deputy state highway engineers.

Responsibility for the various activities necessary to carry on the division's functions is assigned to 5 assistant state highway engineers, a chief right-of-way agent and a comptroller, all located in the headquarters office in Sacramento.

The assistant state highway engineers are in charge of groups of departments and sections. The operations group includes construction, maintenance, materials and research, and equipment. The administration group includes office engineering, county and co-operative projects, city and co-operative projects, service and supply, industry contact, and management section. The planning group includes advance planning, planning survey, traffic, design, programs and budgets, and photogrammetry. Another assistant state highway engineer is in charge of bridges, and another is in charge of public relations and personnel. The chief right-of-way agent is the head of the right-of-way department and the comptroller of the accounting department.

Because the state highway program reaches into every corner of California, the division operates in the field through 11 districts. 9 of these districts are headed by district engineers; the 2 metropolitan districts (San Francisco and Los Angeles) are headed by assistant state highway engineers. Each district is organized along the lines of the headquarters office. Construction of bridges and other highway structures on a statewide basis is administered by the Bridge Department, having offices in Sacramento and Los Angeles.

45	Program and Performance						
46	The Division of Contracts and Rights-of-way is a division of the Department of Public Works, administratively established by the director under Government Code Section 14005, which provides legal services for the department, including the Division of Highways. It handles legal problems and litigation arising out of such activities as eminent domain and other legal phases of highway right-of-way acquisition, including matters involving public utilities, contracts, claims, financial affairs and collections, operation of toll bridges, and activities involving other governmental agencies.

1	MAINTENANCE OF STATE HIGHWAYS						
2	Program and Performance						
3	The function of state highway maintenance is to preserve roadways and structures in the safe and usable condition to which they						
4	have been built or improved. This description covers hundreds of different tasks, ranging from routine patching to emergency						
5	slide removal. About one-fourth of the employees of the Division of Highways are engaged in maintenance work.						
6	Replacement and restoration work on highway facilities is performed by the division maintenance forces, with major work of this						
7	nature, including resurfacing, being done by contract.						
8	SALARIES AND WAGES-----	2,650	2,762	2,872	\$14,201,423	\$16,281,250	\$16,932,500

28	Maintenance and operation—Martinez-Benicia Ferry-----				162,942	250,000	260,000
29	Totals, Maintenance of State Highways-----				\$27,259,277	\$31,250,000	\$32,500,000
30	MAINTENANCE OF TOLL BRIDGES						
31	Program and Performance						
32	The Division of Highways is responsible for the operation and maintenance of 5 major bridges in the San Francisco Bay area:						
33	the San Francisco-Oakland Bay Bridge, the Richmond-San Rafael Bridge, the San Mateo-Hayward Bridge, the Dumbarton						
34	Bridge, and the Carquinez Bridge. All of these except the Carquinez are toll facilities. Tolls will be re-imposed on the Carquinez						
35	Bridge when the new parallel structure now under contract is completed about the end of 1958. Since September, 1957, toll						
36	bridge maintenance costs are paid from the State Highway Fund as provided by Chapter 2249, Statutes of 1957. Formerly						
37	these costs were paid from toll bridge revenues.						
38	Operation of these bridges is a function of the Bridge Department, with specific responsibility assigned to a principal bridge						
39	engineer, whose office is located at the east end of the San Francisco-Oakland Bay Bridge.						
40	SALARIES AND WAGES-----	-	268	268	-	\$929,000	\$1,548,000

43	Totals, Maintenance of Toll Bridges-----				-	\$1,200,000	\$2,000,000
44	HIGHWAY PLANNING						
45	Program and Performance						
46	Broad-gauge special investigations and studies not closely tied in with localized projects are grouped under the heading of highway						
47	planning. These include the annual and monthly traffic counts, long-range research studies of all types, and studies of the						
48	economic and other effects of freeways. Current major emphasis has been on an overall statewide freeway system study						
49	called for by Senate Concurrent Resolution No. 26 of the 1957 Legislature.						
50	SALARIES AND WAGES-----	334	505	492	\$1,456,489	\$2,044,000	\$2,190,000

1	SUPERVISION OF OUTDOOR ADVERTISING						
2	Program and Performance						
3	Administration of the Outdoor Advertising Act has been assigned to the Division of Highways in accordance with Article 2 of that						
4	act, and is carried on as a function of the Maintenance Department. It is a self-supporting function, financed from revenues						
5	received from license and permit fees paid by outdoor advertisers who place displays within view of public highways, outside						
6	incorporated areas.

GENERAL ANALYSIS

This division was established by the Director of Public Works under Section 14005 of the Government Code and is assigned by the Director of Public Works various studies and surveys, and to prepare plans, specifications, and estimates for additional highway crossings of San Francisco Bay. It also supervises construction of such bridge projects. The operation of bay crossings after completion, however, is assigned to the Division of Highways.

At present, the division assignments include studies and plans for a Southern Crossing, for reconstruction of the San Francisco-Oakland Bay Bridge, and for increasing the capacity of the San Mateo-Hayward Crossing.

Personnel man-years -----	4.9	5.4	6.9	(—5.5%) 1.5

GENERAL ANALYSIS**Objectives**

The Aeronautics Commission provides advisory planning and engineering services to public agencies on aviation problems; fosters the development of a statewide system of airports to expand air service and commerce through intrastate local and feeder services, and the use of private aircraft; fosters and coordinates improvements in the use of agricultural aircraft; renders assistance to political subdivisions formulating approaches zoning ordinances; coordinates civil aviation plans for disaster relief and civil defense; and investigates and reports to the State Department of Education on proposed school sites near airports under Chapter 1451, Statutes of 1955.

Chapter 872, Statutes of 1957, delegated to the commission the additional function of approving or disapproving specific flight schools and their facilities when offering aviation education courses which include flight orientation. In addition Chapter 1592, Statutes of 1957, provided for a basic insurance program for aviation education. This legislation is permissive and provides that the commission is authorized to make available to public schools offering actual flight experience a basic insurance program the costs of which will be borne by the local school district.

AERONAUTICS COMMISSION—Continued

LINE	EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	
1	GENERAL ANALYSIS—Continued				
2	Program and Performance				
3	During the calendar year 1957 the commission rendered airport services to political entities involving engineering toward site ap-				
4	proval for 31 airports, studies for issuance of 16 airport permits and 24 airport improvement studies. Miscellaneous services in				
5	this area included airport planning for 88 airports, furnishing of hangar plans for 62 airports, evaluation of obstructions to air				
6	navigation involving 45 airports, and 148 annual airport surveys.				
7	An airport engineer position is added in 1958-59 to provide technical assistance to the staff in carrying out its responsibilities in the				
8	area of airport planning and the construction of facilities. This position will partially replace the engineering services for which				
9	the commission has contracted in past year.				
10	Federal aid is available to local airports through Public Law 377. During the past year the commission, upon request, assisted in				
11	the preparation of federal aid applications for 25 public airports of a total of 45 applications receiving \$4,755,643 in federal aid.				
12	A major activity of the commission was added by the 1955 Legislature which requires the study of noise and hazard values as relates				
13	to new schools near airports. Under this program 84 applications were processed, and of these, 73 were approved.				
14	Other activities included aviation safety, promotion of public acceptance and use of air transportation through publications, mainte-				
15	nance of a film library, and radio and television presentations. Direct assistance is rendered to various state departments in				
16	advising on industry needs. Assistance was rendered to agriculture in the use of aircraft through cooperative sponsorship of				
17	agricultural aviation courses at the University of California at Davis.

8					
9					
10					
11	GENERAL ANALYSIS				
12	Objectives				
13					
14	The commission was created by Chapter 1693, Statutes of 1953, to confer with a similar commission established by the State of Arizona				
15	to define a common boundary between the states along the Colorado River.				
16					
17	Program and Performance				
18					
19	During the first years of existence, research was undertaken into the history, hydrography, and the matter of land ownerships along				
20	the Colorado River. A preliminary report was rendered to the 1955 Legislature, and they in turn extended the life of the com-				
21	mission for two more years by Chapter 1679, Statutes of 1955. During 1955-56 problems such as channelization and transfers of				
22	land ownership were studied. During 1956-57 further investigation of the necessity and the advisability for a compact between				
23	California and Arizona defining and relocating the common boundary was made; provision relating to relocation of the river				
24	channel by dredging and other means were made, and assistance and advice from members of Congress in securing United States				
25	consent to any boundary line agreed upon were undertaken.				
26	Work that remains to be done during the 1957-58 and 1958-59 Fiscal Years consists of arriving at an agreement, and the adoption				
27	by the joint California and Arizona commissions of a fixed common boundary and the recommendation of this boundary to the				
28	respective state legislature so that a common boundary can be adopted along the river by the two states. After adoption by the				
29	two states, the agreement must be ratified by Congress.				
30	After adoption of a common boundary the line so adopted must be monumented. It is anticipated that the task will be undertaken				
31	during the 1959-60 Fiscal Year on a contract basis.

10	GENERAL ANALYSIS				
11					
12	The Los Angeles Metropolitan Transit Authority was created by Chapter 166S, Statutes of 1951, to develop and construct an inter-				
13	urban rapid transit system within Los Angeles County. Subsequently Chapter 547, Statutes of 1957, repealed the former act and				
14	created a successor agency of the same name as a public corporation but not a "state agency." The successor agency may acquire,				
15	construct, and operate mass transit systems. In addition they may issue and sell revenue bonds.

11					
12	GENERAL ANALYSIS				
13	Objectives				
14					
15	The mission of the San Francisco Bay Area Rapid Transit Commission was to study, investigate, and report on rapid transit problems				
16	in the San Francisco Bay area.				
17					
18	Program and Performance				
19					
20	On January 5, 1956, the commission submitted to the Legislature a report covering a determination of the rapid transit facilities				
21	required by the Bay area together with estimates of the costs of providing them and financial analyses of their predicted revenues				
22	and operating costs. On March 15, 1956, the commission submitted to the Legislature a report covering investigations to determine				
23	practical methods of financing the costs of providing the rapid transit facilities.				
24	During the 1957 Session of the Legislature, Chapter 1056, Statutes of 1957, was enacted creating the San Francisco Bay Area Rapid				
25	Transit District, empowered to implement plans for a system of rapid mass transit. The work of the commission for the period				
26	July 1 to December 31, 1957, is being directed toward preparing its final report to the Legislature and to providing for an orderly				
27	turnover of the Rapid Transit Program to the district upon its organization about December 1, 1957.

8					
9					

10	GENERAL ANALYSIS				
11					
12	Objectives				
13					
14	The department is responsible for preventing the illegal or unauthorized sale of alcoholic beverages, and the prevention of the sale of				
15	alcoholic beverages where any activity contrary to the public welfare is associated with a licensee or licensed premise.				
16					
17	Program and Performance				
18					
19	The department functions through a headquarters office and 26 area, districts, and branch offices. The field offices provide direct law				
20	compliance, and encourage, train, and assist local law enforcement agencies to enforce the Alcoholic Beverage Control Act. Com-				
21	pliance is determined by routine inspection and investigation. Areas of most frequent violation include sales to minors, sales				
22	during restricted hours, sales to obviously intoxicated persons, operating disorderly premises, and business practices contrary to				
23	rules and regulations on fair trade, price posting, and secret rebates. There are 45,633 active licenses subject to this act. These				
24	licenses include on-sale beer, beer and wine, and general licenses for trains, boats, airplanes, and bonafide business establishments,				
25	retail package off-sale establishments, dealers, wholesalers, importers, warehousemen, brokers, and manufacturers of beer, wine,				
26	alcohol, brandy, and distilled spirits. The total number of licenses is expected to remain constant. Although a few new licenses				
27	are being issued, a corresponding number of licenses are being canceled and revoked because they have been inactive for extended				
28	periods of time. The field enforcement staff, therefore will be continued at the existing level for 1958-59.				
29	Four additional positions are proposed in 1958-59 to provide adequate facilities for departmental hearings regarding applications				
30	denied or protested, and accusations against licensees. Increased accusations, resulting from additional local police activity, have				
31	resulted in a 20 percent increase in departmental hearings. These positions are a hearing officer, hearing reporter, stenographer				
32	and clerk and are proposed for the Los Angeles office. Temporary help is proposed to eliminate a backlog in transcript prep-				
33	aration for cases appealed to the Alcoholic Beverage Control Appeals Board.				
34	An assistant area administrator for the Los Angeles area office and supervising clerk II position for the headquarters administration				
35	licensing function are proposed to strengthen organization. These positions are financed by the abolishment of two auditor posi-				
36	tions. A clerical position for the personnel unit, included in the 1957-58 budget for one year only, is needed for continuing work-				
37	load on a permanent basis and is shown as a proposed new position.				
38	Operating expenses are increased primarily in the area of general expense and traveling. Additional costs will result from the devel-				
39	opment of departmental forms instead of Board of Equalization forms. Traveling costs as well as additional traveling positions				
40	account for the increase in this area.				
41

48	Support (General Fund) -----				(7.7%)
49	Personnel man-years -----	8	9	9.5	0.5
50					
51	GENERAL ANALYSIS				
52					
53	Objectives				
54					
55	The Alcoholic Beverage Control Appeals Board provides administrative review for any person aggrieved by a decision of the Depart-				
56	ment of Alcoholic Beverage Control.				
57					
58	Program and Performance				
59					
60	The appeals board consists of 3 members. Meetings are held monthly in Los Angeles, San Francisco, and Sacramento to review ap-				
61	pealed cases. The board meets bimonthly in Sacramento to discuss cases and approve decisions prepared by the legal counsel				
62	in accordance with instructions from the board.				
63	The program for 1958-59 will continue to increase in step with the work of the Department of Alcoholic Beverage Control. Since				
64	the creation of this body in 1954, 600 cases have been decided. Temporary help is provided to develop a digest of these cases				
65	which will assist in the further processing of appealed cases. During 1956-57, 360 cases were appealed and it is estimated that 425				
66	cases will be appealed in 1957-58 and 500 in 1958-59. This added workload is anticipated to be absorbed within existing staff.				
67	Traveling—in-state has been increased to provide those board members who have headquarters other than Sacramento their expenses				
68	while in Sacramento.				
69					
70	^a Composed of savings in salaries and wages, \$9,748; operating expenses, \$6,502; equipment, \$183; and excess reimbursements, \$1,793.				
71	^b Revenue from beer and wine and distilled spirits excise taxes are deposited in this fund but are accounted for as revenue to the				
72	General Fund.

59	GENERAL ANALYSIS							
60	Objectives							
61	The California Districts Securities Commission is charged with the direction and supervision of certain fiscal and physical affairs of							
62	irrigation districts and other entities of the State of California.							
63								
64	Program and Performance							
65	In 1956-57 the commission reviewed and inspected the financial and physical condition of 152 districts, as compared to 137 in 1953-5							
66	and advised district officials with respect to their financial problems. Economic and engineering investigations are made by th							
67	staff when applications are submitted by districts for approval to issue bonds or warrants or for authorization to enter into co							
68	tracts with the Federal Government for water service or construction of irrigation facilities. The commission passes upon th							
69	expenditure of funds during the period of construction or acquisition of facilities. Co-operative assistance to banks, investme							
70	panies, and other lending agencies is provided by making available to them factual information regarding the economic cond							
71	tion of the districts. This is of substantial importance to both the lending agencies and the districts, for when the financi							
72	soundness of a district can be supported, the credit of the district is strengthened, and financing can be more readily secur							
73	at a low rate of interest.							
74	As a result of action by the 84th Congress, irrigation and water districts are eligible to obtain loans for construction of irrigat							
75	systems and other water projects on an interest-free basis. Districts under commission supervision must submit the proposal							
76	such a loan to the commission for its approval, which requires substantially the same degree of investigation as would be requir							
77	in the case of financing by bonds. The program is expected to step up the rate of development of new lands within the State ar							
78	will undoubtedly have an immediate effect on the commission workload.							
79	Chapter 2052, Statutes of 1957, sets forth a new policy providing for state financial assistance for local projects in connection wit							
80	water development by local public agencies within the State. It permits loans in furtherance of projects for that portion of th							
81	cost which the commission certifies to be beyond the reasonable financial ability of the public agency.							
82								
83

7					
8					
9					
10					
11	GENERAL ANALYSIS				
12					
13	Objectives				
14					
15	The Horse Racing Board was established to regulate and supervise the operation of horse racing meetings where there is parimutuel				
16	betting. The main office of the Board is at Los Angeles with branch offices at each track.				
17					
18	Program and Performance				
19					
20	The Board licenses trainers, jockeys, track officials, and other persons employed by the racing associations. Investigators check to				
21	determine compliance with rules and regulations. Before each race, horses are inspected and after each race drug tests are				
22	made on horses under supervision of the Board veterinarian. The workload of the Board is indicated by the number of racing days				
23	and the number of licensees as follows:				
24					
25		ACTUAL	ESTIMATED		
26		1956-57	1957-58	1958-59	
27	Number of racing days-----	525	504	551	
28	Number of licensees-----	9,233	10,156	11,172	
29					
30	During 1957-58, 41 racing days were lost due to partial closure of two major race meetings. This was the primary reason for a				
31	downward adjustment of \$1,615,000 in the current year revenue estimates.				
32	Provision is made in 1958-59 to continue the same level of service as presently authorized. The budget is based on a program of				
33	551 days of racing of which 341 are to be at major tracks, 84 days at fair tracks, 71 days for quarter horses, and 55 days for				
34	a combination meeting.

Personnel man-years-----	55	63.8	68.8	

GENERAL ANALYSIS**Objectives**

The purpose of the Banking Department is to safeguard depositors' funds in state banks. The department's headquarters is in San Francisco with a branch office in Los Angeles.

Program and Performance

The main programs of the department are to grant licenses for new state banks or branches, examine all state banks annually, and liquidate the affairs of banks when this becomes necessary.

Applications for new state banks or branches require surveys to determine: the competition offered by existing banks; the opportunity for profitable employment of the bank's funds; the number of potential depositors; and the volume of banking business which the community may provide. Licenses are then granted or denied after a public hearing of all interested parties. 1 examiner has been provided for the current year only, to reduce the backlog in applications to a 30 to 60-day waiting period. Many applications have been pending over 6 months.

^a For statement of fund condition see Capital Outlay budgets of Fairs and Expositions Division, State Colleges and Wildlife Conservation Board.

^b Composed of savings of salaries and wages, \$2,983; operating expenses, \$1,817; and equipment, \$107.

Department of Investment

BANKING DEPARTMENT—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59		
1	GENERAL ANALYSIS—Continued					
2						
3						
4	Program and Performance—Continued					
5	The staff examines each state bank and branch annually. The examination covers the condition and resources of the bank, the mode					
6	of management of its affairs, the actions of its board of directors, the investment and disposition of its funds, the safety and					
7	prudence of its management and the security afforded its depositors and creditors. The increased annual examination work is					
8	reflected in the increase in banking offices and the total resources of state banks as shown by the following figures:					
9						
10		1954-55	1955-56	1956-57		
11	Number of banking offices	394	421	443		
12	Bank assets (billions of dollars)	\$5,498,320	\$5,968,573	\$6,269,422		
13						
14	4 examiners and 1 clerk are proposed for the examination work based on the trend of recent years. Funds are also included to pro-					
15	vide and develop a training program for bank examiners to increase the proficiency of the examiner staff.					
16	The Banking Law provides that the Superintendent may make special examinations whenever necessary. The increase in regular exam-					
17	ination work has been accompanied by the need for more followup examinations. 2 examiners are provided for this additional					
18	work.					
19	The State Banking Department is supported primarily by a tax on all state banks. On July 1, 1957, a tax assessment was made on					
20	banks which was 25 percent below the maximum rate allowable by law and the lowest assessment in the past 6 years with the					
21	exception of 1956. The Banking Department is maintaining a reserve fund which will total \$410,682 on June 30, 1959. This is					
22	a sufficient reserve to pay the cost of operating the department without assessing any tax for a period of slightly less than 1					
23	year. By careful administration, tax reductions have been accomplished even though salaries were increased, new equipment					
24	purchased, and the services of the department improved.

GENERAL ANALYSIS

Objectives

The primary mission of the Division of Corporations is protection of the California public from fraud in the sale of unsound corporate securities. The division is also responsible for preventing fraud and usury, as well as unsound business practices in industrial loan companies, personal property brokers, small loan companies, credit unions, check sellers, and escrow agents. The main office is located in Sacramento with branches in Los Angeles and San Francisco.

Program and Performance

Before many types of corporate securities can be offered for sale, application must first be made to this division. As of June 30, 1957, there had been 39,008 corporate security applications filed for permits or licenses under provisions of the corporate securities laws. The division investigates properties, books, and prospects of the corporation and a permit to issue is granted or denied. It is estimated that applications will increase to 43,955 in 1957-58 and 47,190 in 1958-59. Industrial loan companies, personal property brokers, small loan companies, credit unions, check sellers, and escrow agents are regulated by first issuing a permit or license and second by conducting an annual examination in accord with the law. In 1956-57 there were 1,894 licensees subject to regulation. It is estimated that in 1957-58 there will be 2,055 and in 1958-59 2,240 licensees.

	Actual				Estimated	
	1953-54	1954-55	1955-56	1956-57	1957-58	1958-59
Applicants and licenses-----	25,884	32,386	37,291	40,902	46,010	49,430
Cost (gross) per applicant and licensee-----	\$32.16	\$26.72	\$26.66	\$28.01	\$30.29	\$29.88

In 1954-55 a printed form was developed for use in closed, cash sale, securities transactions which resulted in a saving of time for both professional and clerical personnel, thus allowing the staff to increase production at a reduced cost.

In addition to the effects of the item mentioned above, a standard form for use in analyzing application financial statements was devised in 1955-56 which resulted in a saving of examiner time.

Major increases in the costs during 1956-57 were salary increases granted to all employees on July 1, 1956, and to enabling legislation which was passed in 1955 to allow the Commissioner of Corporations to examine substantially all escrow agents annually. Funds were provided in the 1956-57 Fiscal Year Budget for this purpose and the program was commenced in July, 1956, but was not fully implemented until January, 1957. As a result only 200 of 320 licensees existent at June 30, 1957, had been examined at that date. During the last quarter of this fiscal year the division commenced to eliminate duplicate files maintained in the branch offices in an effort to reduce clerical work and costs.

The estimated increase in costs for the current and budget year are due in part to full implementation of the Escrow Agent Examination Program, to salary increases granted to all employees on July 1, 1957, and to rental costs expected to accrue by reason of moving the Sacramento office to new quarters.

Costs are expected to decline slightly in 1958-59 as the full force of the elimination of duplicate files takes effect and as the division increases the pace of its file destruction program. It is further anticipated that the recent salary increases will have a stabilizing effect on personnel turnover which will result in further efficiency. The increase in the licensing workload requires 2 additional clerks and the increase in the examination workload requires 1 additional examiner. Otherwise the 1958-59 Budget makes provision for continuing the existing level of service.

9					
10	GENERAL ANALYSIS				
11					
12	Objectives				
13					
14	The purpose of the Department of Insurance is to protect insurance policyholders in California. The main office is in San Francisco,				
15	with branches in Los Angeles, San Diego, and Sacramento.				
16					
17	Program and Performance				
18					
19	The main programs of the department are to: license companies and individuals who engage in the insurance business; admit insurers				
20	to operate in California; grant permits to issue securities and make changes in capital structure; approve certain types of policy				
21	forms; approve minimum workmen's compensation insurance rates; examine financial condition and procedures of insurers through				
22	field audits and analysis of financial statements; take over the California affairs of insurers in financial difficulty for purpose of				
23	liquidation or rehabilitation; investigate complaints against licensees; and check activities of licensees for compliance with all				
24	insurance laws. These activities are carried out through the Divisions of: Administration, Rate Regulation, Compliance and Legal,				
25	License, and Examination and Financial Analysis.				
26	A new function of regulating employee Health and Welfare programs was created by Chapter 2167, Statutes of 1957, which placed				
27	the responsibility for supervising certain of these programs with the Insurance Commissioner in order to protect the rights and				
28	interests of the beneficiaries of such programs. As the law requires that all programs shall register, the first step is to identify				
29	them and develop a registration procedure. The 1958-59 Budget provides 4.5 positions and \$57,922 to complete this initial step,				
30	and to develop regulations and procedures in respect to periodic examination and investigation of the programs.				
31	The insurance industry of the State has shown steady growth over the years. The staff has been able to meet the workload increases in				
32	all areas except the policy complaint work. The increased work in policy complaints requires 1 additional claims investigator to				
33	maintain the current level of service.				
34	The department is supported from license fees, examination fees, assessments, taxes, and other revenues levied on the insurance				
35	business. The unencumbered balance in the fund at June 30th of each year in excess of \$2,000,000 is transferred to the General				
36	Fund. No such balance is anticipated for transfer in 1958-59.

6					(—0.6%)
7	Personnel man-years -----	168.7	185.2	179.5	—3.7

10	GENERAL ANALYSIS				
11	Objectives				
12					
13					
14	The primary objective of the Division of Real Estate is to protect the general public in all matters relating to real estate, subdivisions, business opportunities, mineral, oil and gas, and mortgage loan transactions handled through licensees and to provide funds for education and research. Offices are maintained in Sacramento, San Francisco, Oakland, Fresno, Los Angeles, and San Diego.				
15					
16	Program and Performance				
17					
18					
19					
20	The division issues an original license to real estate, business opportunity, and mineral, oil and gas applicants after the applicant has passed a written examination. Licensees must take a written or oral examination before a license is renewed. The results for 1956-57 were:				
21					
22					
23		1st examination	2d examination	Oral	Total
24	Applicants -----	16,656	7,981	2,109	26,746
25	Passed -----	13,513	4,731	1,827	20,071
26					
27	On July 1, 1957, a new 4-year license and punch card renewal system went into effect. The 4-year license will spread the renewal process throughout the year. The effect of the 4-year license and increased renewal fee on the number of licenses and revenue has not been determined.				
28					
29	During 1956-57, 3,753 complaints against licensees and subdividers were received as compared with 4,245 in 1955-56. It is believed that the improved examination program and more thorough investigations have contributed to this trend. In 1956-57, 173 licenses were revoked, 78 suspended, and 103 denied. These compare with 131 revoked licenses, 63 suspensions, and 157 denials in 1955-56.				
30	Each subdivision to be sold in California must be filed with this division. If after investigation it would work a fraud on the public to permit the sale, a stop order is issued. Currently, over 2,500 new subdivisions are filed each year. The law also applies to out-of-state subdivisions which are sold in California. The amended subdivision law requires impounding buyers' deposits, or employing alternative methods of protecting them. A subdivider may post a surety bond to guarantee return of deposits in event the subdivider cannot deliver clear title, or post a bond and impound all sums above the principal amount of the bond; or impound the deposits and later furnish a bond to release them. Subdividers in the State had on file with the commissioner 193 bonds (total amount, \$5,763,040) as of June 30, 1957. The division has systematically surveyed 567 subdivisions filed in the past year. Deputies noted 181 possible infractions, of which 9 cases required complete audits indicating formal corrective action.				
31					
32	The commissioner has adopted regulations to implement mortgage loan legislation. These will help to control abuses which have arisen where mortgage loan brokers consistently charge the maximum legal rates for negotiating distress loans when such charges exceed the usual charges made for similar services in the community and where the loan broker charges borrowers full "negotiation" commissions although he is, in fact, lending his own money. The division is using its audit staff, supplemented by the services of auditors on a contract basis, in checking the books and transactions of mortgage loan brokers.				
33					
34	Criminal action has been filed against 2 advance fee concerns for operating without a license and will be prosecuted by the district attorneys in the respective counties. Specific violations formally charged by the division includes (1) agencies advertising vacancies which do not exist; (2) refusal to refund fees when no action is taken; (3) steering prospective tenants to already rented apartments; (4) mimeographing lists from legitimate rental ads, then charging \$10 for the list without checking to see if rentals are available.				
35					
36	This division is supported by revenue which it receives from license fees and other fees levied in the regulation of real estate business. Legislation provides that one-fourth of all license fee receipts are allocated to a Real Estate Education and Research Fund. This loss of revenue in the face of increased costs has resulted in the division's current expenses exceeding revenue.				
37					
38	Because of a decrease in estimated regulation workload 3 deputy positions provided in the 1957-58 budget will not be established. Mechanization of license renewals permits a reduction of \$30,000 in temporary help.

Support (<i>Savings and Loan Inspection Fund</i>)	\$331,815	\$410,404	\$430,269	\$19,865 (4.8%)
Personnel man-years	36.3	43.6	44.6	1

GENERAL ANALYSIS

Objectives

The Division of Savings and Loan is responsible for safeguarding investor's funds in savings and loan associations.

Program and Performance

This division licenses and examines savings and loan associations to prevent unsound business practices. Application for a license must first be made to the division. A license is issued or denied after examination and public hearings. Each association is licensed annually. The division is responsible for an annual examination of the affairs of every domestic association and every foreign association doing business in this State. Because of the increasing number of associations and applications for new facilities, it has not been possible for the examiner staff to make the required examinations without reducing the quality and a resulting loss of control over the regulation of the associations.

Facilities Requiring Examinations:

	Actual		Estimated	
	1954-55	1955-56	1956-57	1957-58
Number of associations	144	149	155	182
Number of branches	68	77	104	116
Total Facilities	212	226	259	298

As the increased workload trend is expected to continue beyond 1957-58 the 1 additional examiner proposed in the budget will be needed to continue the existing level of service.

1 additional clerk was added in the current year in order to meet the increased work in the accounting office. Although the number of associations has increased approximately 50 percent in the last 5 years, and there has been a comparable increase in technical personnel, this position will cause only a 25 percent increase in clerical staff during the same period of time. The position is shown as proposed new for 1958-59.

The purpose of the annual examination is to determine if the associations' operations are within the limitations prescribed by law. The limitations are to a large extent dependent upon the valuations placed upon real property securing loans. The division's appraisers test-check 7 percent of the associations' appraisals, as well as approve appraisers used by the associations. The increase in loan delinquency, the increase in foreclosures and the trend to higher risk loans requires a more thorough analysis of the sample checked. This will require more time on each check. 1 additional appraiser is provided in the budget to do this.

The division administers associations in financial difficulty in order to rehabilitate or liquidate.

This division is supported by annually assessing each association the proportion which its assets bear to the aggregate assets of all associations holding licenses.

8					
9					
10	GENERAL ANALYSIS				
11	Objectives				
12					
13	To maintain high standards for the osteopathic profession; to assist and protect licentiates and the public; and effect economies				
14	within the board consistent with effective administration and adequate policing.				
15					
16	Program and Performance				
17					
18	The Board of Osteopathic Examiners was created by initiative enactment in 1922. It is a licensing and policing agency which has				
19	the responsibility of licensing as physicians and surgeons graduates of osteopathic schools approved as meeting the educational				
20	requirements of Division 2, Chapter 5, Business and Professions Code.				
21	The board receives applications for examination for licensure as a physician and surgeon, investigates and approves approximately				
22	105 applications per year, conducts a 3-day written examination, and licenses those applicants who have passed the written				
23	examination and have completed a year of internship in an approved hospital. 15 licenses were issued to applicants who had				
24	passed the examination in 1956 and who had completed their intern training. 85 licenses were issued in 1956 to applicants who had				
25	passed the written examination the previous year and who had completed their intern training in 1956. The board also receives				
26	and investigates approximately 25 applications for physicians' and surgeons' certificates by reciprocity each year. Credentials				
27	of approximately 14 licentiates are endorsed to other states during each year. 71 clinic licenses have been issued in 1957. In				
28	1956 the staff made 159 investigations; there were 14 citations before the board resulting in disciplinary action against 13.				
29	This budget provides for the continuation of the existing level of service.

GENERAL ANALYSIS

37	Objective				
38	The purpose of the board is to protect the public and the users of the San Diego port facilities by assuring that pilots are qualified to				
39	perform their function.				
40	Program and Performance				
41	The board licenses pilots operating vessels on the San Diego Bay after careful examination of qualifications, fixes rates of pilotage, and				
42	records the fees received by each pilot as submitted to the board on a monthly report.

GENERAL ANALYSIS

Objectives

To protect the public, health, welfare and safety by permitting only persons and firms of demonstrated knowledges and abilities to perform public services for compensation; to prevent unauthorized practices upon the public and to discipline those licensed who fail in their public trust.

Program and Performance

The department is headed by a director, appointed by the Governor. Approximately 420 people are employed by the department and its member agencies.

The member agencies of the Department of Professional and Vocational Standards are headed by boards of 3 to 13 members appointed by the Governor from among members of the particular profession or vocation regulated. The members usually serve overlapping 4-year terms.

In general, the agencies have authority to determine the qualifications of applicants for licenses, to give examinations and issue licenses, and to regulate licensees by means of inspections, investigations, and formal disciplinary action. Each agency employs a staff to assist with these functions. With minor exceptions, the cost of operation of the member agencies is paid by the fees collected from those engaged in the occupations regulated.

^a These funds are derived from assessments against other funds which expenditures are included in the overall budget totals.

^b Expenditures and revenues of the Professional and Vocational Standards Fund are not carried into the budget totals, since the assessments against the various boards and the rent receipts for the building have been included as expenditures in the budgets of the respective boards and agencies.

DEPARTMENTAL ADMINISTRATION—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	
1	GENERAL ANALYSIS—Continued				
2	Program and Performance—Continued				
3					
4					
5					
6	The Departmental Administration co-ordinates and supervises the administrative and financial affairs of 26 professional and				
7	vocational licensing agencies and the Division of Administrative Procedures. It performs centralized personnel, budgetary,				
8	and accounting operations for these agencies, and manages the Business and Professions Building and the Annex.				
9	The Organization and Cost Control Division, Department of Finance, is studying a program for electronic machine processing to				
10	provide license renewal service and other services to the agencies. The program would be financed on a reimbursable basis				
11	through charges made to using agencies based on the amount of work performed for each agency. The initial installation				
12	expense would be financed through moneys in the Professional and Vocational Standards Fund.				
13	A clerical position was added in the current year in the San Francisco office to replace clerical services previously provided by the				
14	Board of Pilot Commissioners secretary. The Board of Pilot Commissioners has moved to a new location which precludes				
15	this arrangement.				
16	The 1958-59 Budget provides for the following areas of increase:				
17					
18					
19	Agency	Program	Number of positions	Cost	
20	Athletic Commission	Investigation	1	\$5,950	
21	Board of Barber Examiners	Inspection	1	7,272	
22	Board of Registration for Civil and Professional Engineers	Clerical	4	16,800	
23	Board of Cosmetology	Inspection	2	14,554	
24	Bureau of Furniture and Bedding Inspection	Clerical	1	4,450	
25	Board of Medical Examiners	Clerical	1	4,450	
26	Board of Nurse Examiners	Inspection	1	6,550	
27	Board of Nurse Examiners	Clerical	1	4,650	
28	Board of Pharmacy	Inspection	2	15,250	
29	Bureau of Private Investigators and Adjstners	Administration	1	9,300	
30	In addition to these positions, amounts are provided under operating expenses in several smaller boards for investigative workload				
31	requiring less than one man-year.

			Estimated 1957-58	Estimated 1958-59	
1	BUSINESS AND PROFESSIONS BUILDING				
2					
3					
4	In accordance with the provisions of Sections 400 to 404 of the Business and Professions Code, the Business and Professions Build-				
5	ing was constructed and is being operated by the Department of Professional and Vocational Standards as a self-sustaining				
6	enterprise. Out of the rentals received from state agencies occupying space in the building and fees paid by users of its parking				
7	facilities, are defrayed the cost of operating and maintaining the building. The remaining receipts are apportioned back to the				
8	agencies contributing to the cost of the building in proportion to their respective investments.				
9	Repayments to investing agencies are estimated on an accrual basis. Actual repayments are made semiannually, after the close of				
10	the period in which net rentals have accrued.

GENERAL ANALYSIS					
This division is responsible for co-ordinating and improving the quasi-judicial functions of the various licensing boards, including agencies not within the department itself. The division furnishes trained hearing officers to any state agency conducting quasi-judicial disciplinary proceedings, and compiles and publishes the California Administrative Code, consisting of agency rules and regulations. The budget provides for the extension of one position of hearing officer and one position of hearing reporter. These positions were added in the 1957-58 Budget to reduce the waiting time before matters can be brought to hearing. The extension is necessary due to recruitment difficulties which has prevented filling of these positions with consequent lack of experience as to the effect on the program.

GENERAL ANALYSIS

This board examines, licenses, and regulates practicing architects. The proposed budget provides an augmentation of \$7,500 for a comprehensive evaluation of the examination program and procedures of the board for the purpose of improving the quality of the examination and simplifying the examination procedure. Additional temporary help is provided to handle increased applications and examinations. The agency workload is indicated by the following figures:

	Actual			Estimated	
	1954-55	1955-56	1956-57	1957-58	1958-59

ATHLETIC COMMISSION

Headquarters Office at Sacramento

SUMMARY

64	TOTAL EXPENDITURES				
65	Support (Athletic Commission Fund) -----	\$143,495	\$142,281	\$147,803	\$5,522
66					(3.9%)
67	Personnel man-years -----	16.1	16.4	16.5	0.1

GENERAL ANALYSIS

The Athletic Commission controls all professional and amateur boxing and wrestling matches held in California. It also licenses all clubs which sponsor such matches and all persons who participate in them. 1 additional investigator is provided to develop evidence against violators and investigate applicants for licenses. The agency fund condition indicates that annual expenditures will exceed revenues for the current fiscal year. The surplus will be reduced to the dangerously low balance of \$9,813 by June 30, 1959. Special legislative consideration will be necessary to continue this program on a solvent basis.

41	GENERAL ANALYSIS				
42					
43	The board administers the Cemetery Act under which certain cemeteries and cemetery salesmen and brokers are licensed and regulated. The budget provides for a continuation of the existing level of service. An amount is provided for investigative service to be furnished by the department in lieu of donated and contractual services. Workload is indicated by the following data:

10	GENERAL ANALYSIS				
11					
12					
13	The board licenses and regulates contractors in the various branches of the construction industry. The agency's expenditures are				
14	exceeding revenues, thus requiring the surplus to be reduced to a dangerous level. In order to meet this problem the agency will				
15	introduce legislation to increase revenues. An emergency authorization was necessary in the current year to provide automobiles				
16	in this agency in lieu of pool operation due to the location of investigators. The budget provides for a continuation of the existing				
17	level of service.

GENERAL ANALYSIS

The board examines, licenses, and regulates the practice of hairdressers, cosmeticians, manicurists, electrologists, beauty shops, and cosmetology schools. The budget provides for two additional inspectors based upon workload increases in the number of shops and schools, and school enrollment.

BUREAU OF FURNITURE AND BEDDING INSPECTION

Headquarters Office at Sacramento

SUMMARY

TOTAL EXPENDITURES				
Support (<i>Furniture and Bedding Inspection Fund</i>)-----	\$245,829	\$318,957	\$330,058	\$11,101 (3.5%)
Personnel man-years-----	33.3	42.7	43	0.3

GENERAL ANALYSIS

The bureau licenses and regulates sellers and processors of overstuffed furniture and articles of bedding. An inspection service is maintained to insure truthful labeling of these goods. The bureau is under direct supervision of the Director of Professional and Vocational Standards.

This budget provides an additional clerk due to increased workload which results from an upward trend of licenses, inspections, complaints, and investigations; and a new advisory board, which will add more clerical work. The agency workload is indicated by the following figures:

	Actual			Estimated	
	1954-55	1955-56	1956-57	1957-58	1958-59
Total licentiates-----	16,142	16,612	17,142	17,642	17,852
Inspections and investigations-----	22,308	20,901	25,740	31,680	32,800

^a Composed of savings in salaries and wages, \$202; operating expenses, \$2,376; and equipment, \$326.

^b Composed of savings in operating expenses.

GENERAL ANALYSIS

The Board of Landscape Architects examines, licenses, and regulates landscape architects. This budget reflects an agreement between the Board of Landscape Architects, the Board of Examiners in Veterinary Medicine, and the Yacht and Shipbrokers Commission to share the services of the commission's registrar and certain investigative and clerical services. Workload is indicated by the following figures:

	Actual			Estimated	
	1954-55	1955-56	1956-57	1957-58	1958-59
Licenses -----	773	901	824	826	844
Applicants -----	11	25	48	41	48

^a Composed of savings in salaries and wages, \$243; operating expenses, \$18; and equipment, \$8.^b Composed of savings in salaries and wages.

17	GENERAL ANALYSIS						
18	The Board of Medical Examiners examines, licenses, and regulates physicians and surgeons, chiropradists, drugless practioners, and						
19	midwives. Within the board are a Physical Therapy Examining Committee which reviews applications and examines applicants						
20	for licensing as physical therapists subjects to approval by the board; a Psychology Examining Committee which examines and						
21	passes upon the qualifications of applicants for certification and registration as psychologists; and a Chiropody Examining Com-						
22	mittee which reviews applications and examines applicants for licensing as chiropodists.						
23	The hudget contains an additional clerical position to handle clerical work which results from legislation enacted at the 1957 session						
24	hy Chapters 2320, 1057, 982 and 966. This legislation creates a new Psychology Examining Committee to certify and register						
25	psychologists; creates a new Chiropody Committee; and will require the board to maintain records of interns in approved						
26	hospitals. An emergency authorization was approved in the current year to finance this legislation.

9	GENERAL ANALYSIS				
10					
11					
12	The board examines, licenses, and regulates nurses in California. This budget provides for an additional clerk and an investigator,				
13	limited to June 30, 1958, is continued. These positions are based on workload which indicates an increase of 6,209 licenses				
14	since the staff was last augmented and a corresponding increase in applicants. A backlog of investigations will require at least				
15	a man-year of investigative time. The agency workload is indicated by the following figures:

BOARD OF PHARMACY

Headquarters Office at San Francisco

SUMMARY

TOTAL EXPENDITURES				
Support (<i>Pharmacy Board Contingent Fund</i>) -----	\$234,367	\$266,979	\$297,484	\$30,505 (11.4%)
Personnel man-years -----	24.6	25.2	27.2	2

GENERAL ANALYSIS

The board examines, licenses, and regulates pharmacists and pharmacies, manufacturers and wholesalers of drugs and controls the sale of poisons and dangerous drugs. This budget provides for 2 additional inspectors for new legislation enacted in 1957 requiring additional inspections. The new positions will enable the board to maintain the existing level of service. Funds are also provided for investigative services based on increased investigative workload.

GENERAL ANALYSIS

The Bureau of Private Investigators and Adjusters under the immediate supervision of the Director of Professional and Vocational Standards, examines, licenses, and regulates private detectives. This budget provides for a chief of the bureau as authorized by Chapter 2098, Statutes of 1957. The legislation is a result of interim studies by a Senate committee recommending the need for the position. Workload is reflected by the following figures:

	Actual			Estimated	
	1954-55	1955-56	1956-57	1957-58	1958-59
Licenses	1,083	1,092	1,147	1,160	1,174

GENERAL ANALYSIS

This board examines, licenses, and regulates the practice of veterinarians. This budget reflects an agreement between this agency, the Board of Landscape Architects and the Yacht and Ship Brokers Commission for the joint use of an executive secretary and for investigative and clerical services. Funds are also budgeted for investigative services which will be needed when the present investigator is shared with the other 2 agencies. Workload of the agency is reflected by the following:

	Actual			Estimated	
	1954-55	1955-56	1956-57	1957-58	1958-59

GENERAL ANALYSIS

Objectives

It is the duty of the commission to secure adequate and safe services at rates that are fair and reasonable for both the public and the privately owned utilities and transportation companies.

The main office is in San Francisco with a branch in Los Angeles. Field offices are located throughout the State.

Program and Performance

The commission hears matters relating to rates, charges, services, safety and affairs of the utilities and carriers under its jurisdiction. The commission then determines intrastate rates and service of privately owned utilities and transportation companies. These include gas, electric, telephone and telegraph utilities; streetcars, trucks, busses, airlines and vessels transporting freight or passengers in intrastate commerce; warehousemen, wharfingers, carloaders and pipeline operators.

The commission controls the issuance of securities and other transactions relating to the capital structure of public utilities; and protects the public interest by appearing before federal agencies and courts as an advocate in interstate proceedings.

Almost all of the utility securities authorized in 1956-57 for issue were for plant and facilities expansion. This reflects the continuing growth of the State's utilities.

Increases in revenue of utilities and transportation companies authorized during the year ending June 30, 1957, were among the lowest of any year since World War II.

The commission has taken a dominant part in protecting the interests of California in proceedings before federal agencies and courts whenever the scope of its authority permitted. The most important cases during the past fiscal year concerned interstate railroad freight rates and the price to be charged for out-of-state gas. California utilities are importing over two-thirds of the natural gas sold to consumers. The commission is opposing a pending \$18,000,000 rate increase which will cost the California customers \$16,000,000 annually. An additional \$20,000,000 rate increase application has recently been filed with the Federal Power Commission.

The commission also opposed the railroads' application to the Interstate Commerce Commission for additional interstate freight rates 22 percent above the level of rates previously in effect. Due largely to the opposition of the California Commission, the Federal Commission granted increases totalling 12 percent. This meant an estimated saving of more than \$97,000,000 to California shippers. Steady progress is being made in the safety program with protective devices at railroad crossings and expansion of the maintenance inspection of all trucks and trailers of highway carriers under commission jurisdiction. Intensified field and rate enforcement has resulted in increased formal proceedings against violators.

^a Composed of savings in salaries and wages, \$171; operating expenses, \$1,227; and equipment, \$100.

PUBLIC UTILITIES COMMISSION—Continued

LINE	SUMMARY AND GENERAL ANALYSIS	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	GENERAL ANALYSIS—Continued			
2				
3				
4	Program and Performance—Continued			
5				
6	The commission is supported by both the General Fund and the Transportation Rate Fund. Activities supported by the Transportation Rate Fund are largely regulatory upon rail, truck, and water carriers engaged in the transportation of property. The Transportation Rate Fund revenue is derived from a fee of one-fourth of 1 percent of the gross operating revenue earned by carriers from the transportation of property and also from other related fees. A plan of financial adjustment between the General Fund and the Transportation Rate Fund allocates the cost of certain functions which relate to either fund—the details of which are reflected in the General Fund activities budget and offset by estimated reimbursements from the Transportation Rate Fund.			
7				
8				
9				
10				
11				
12				
13				
14	FUND CONDITION: The surplus of the Transportation Rate Fund on June 30, 1957, was \$599,736. The current and budget year revenue estimates have been revised downward with the result that the estimated expenditures for the current and budget year will exceed the estimated revenue for that period and reduce the surplus to a dangerously low figure of \$44,823 at the end of 1958-59. Consideration must be given to providing additional revenue.			
15

PUBLIC UTILITIES COMMISSION—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1							
2	UTILITIES DIVISION						
3							
4	Objectives						
5	The Utilities Division assists the commission in insuring the public adequate electric, gas, telephone, telegraph, water, and steam						
6	heat utility service and facilities at reasonable rates, without discrimination, as is necessary to promote the safety, health,						
7	comfort and convenience of the public, customers, and employees of utilities.						
8							
9	Program and Performance						
10	This division provides the technical and clerical staff to analyze and conduct studies relating to the regulation of rates, service,						
11	facilities, safety, valuation, and certification matters relating to the public utilities listed above. This is accomplished through the						
12	development of factual information and the making of engineering, administrative, and other recommendations to the commission,						
13	based on fact, experience, and judgment.						
14							
15	The division's workload during 1956-57 Fiscal Year was distributed as follows:						
16	1. Rate proceedings -----					45%	
17	2. Formal proceedings other than rate -----					18%	
18	3. Customers' complaints and inquiries -----					9%	
19	4. Administration of Commission's General Orders -----					9%	
20	5. Fundamental studies and reports for use of management -----					19%	
21							
22						100%	
23							
24	As of the end of 1956, the value of major utilities plants amounted to \$6.31 billion. There were 549 utilities as of June 30, 1957.						
25	The electric, gas, and telephone utilities served 13.1 million customers at the end of 1956. 501 formal decisions were issued during						
26	1956-57, which required staff work by this division. At the close of the fiscal year, rate increase applications which will require						
27	staff analysis totaled over \$90 million on an annual basis. This budget provides for no additional personnel.						
28

57							
58							
59	UTILITIES FINANCE AND ACCOUNTS DIVISION						
60							
61	Objectives						
62	This division is charged with the review of applications requesting authorization to issue securities, with participation in financial						
63	aspects of rate proceedings, with the review of annual and financial reports of utilities and carriers, and with supervising						
64	accounting procedures prescribed by the commission for use by utilities and carriers.						
65							
66	Program and Performance						
67	Formal proceedings involving rate increases, security issues and related matters utilize the major portion of the division's manpower.						
68	In 1955-56 this division participated in 61 formal rate proceedings. The 1956-57 participation in 88 proceedings was substan-						
69	tially in excess of past performance. In the fiscal year ending June 30, 1957, the commission considered applications involving						
70	the issuance of securities totaling \$639,840,021. This financing for plant addition was the highest in any fiscal year since 1948.						
71	In addition, 1,897 annual reports of utilities were filed with this division.						
72	The budget provides for one additional clerical position due to the increase in the stenographic workload.						
73							
74	SALARIES AND WAGES						
75	(See page 291, Salary Supplement)						
76	Chief of division -----	1	1	1	\$14,400	\$15,600	\$15,600

14	TRANSPORTATION DIVISION						
15	Objectives						
16	This division regulates rates, service, safety and operations of privately owned, for-hire carriers of passengers and property by						
17	railroad, highway and water and, to a limited extent, by air.						
18	Program and Performance						
19	Field personnel in 14 district offices, as well as in the headquarters office, effect compliance of the carriers transporting property						
20	within the State by field investigations of carrier records as well as advising carriers regarding operating procedures and						
21	practices directed toward a dependable and adequate transportation system in the State. An accelerated enforcement program						
22	established in 1956-57 resulted in a number of formal actions against violators. This program necessitated exhaustive time con-						
23	suming studies. As a result the informal enforcement program of advising carriers was reduced. The 15 positions authorized						
24	in 1957-58 will increase formal investigations, and permit some expansion of the informal program. Because many violations						
25	cannot be revealed by examination of records, but only by actual observation, a mobile surveillance unit was formed with 6 of						
26	the additional positions. The findings of the field staff are submitted to the headquarters staff for evaluation.						
27	The division studies the costs factors, service rates, and regulations applicable to the movement of freight and passengers by rail-						
28	road, highway, airlines, water carriers, express corporations, freight forwarders, warehousemen, wharfingers and carloaders. These						
29	are presented as exhibits in public hearings before the commission involving establishment of minimum rates throughout the						
30	State. The staff examines tariffs filed with the commission for compliance with statutes and commission regulations; audits sum-						
31	mary of rates charged by carriers to determine violations of established rates; quotes rates to the public; and participates and						
32	presents evidence in transportation rate hearings before the Interstate Commerce Commission to protect the interests of Cali-						
33	fornia shippers. Permits to operate are issued after a showing of ability to perform, and financial responsibility is determined.						
34	This division inspects for compliance with safety standards, railroad bridges, trestles and tunnels and the operations and equipment						
35	of bus companies and the limited number of motor truck carriers. The commission's safety experts investigate accidents of all						
36	carriers under its jurisdiction. With the 4 additional safety experts authorized July 1, 1957, the commission has expanded its						
37	program to include inspection of the maintenance practices of all trucks and trailers of highway carriers under its jurisdiction.						
38	The division makes engineering studies relative to the need for and construction of new railroad grade crossings, crossing separation						
39	structures, investigates crossing accidents and recommends preventive action. The \$700,000 Grade Crossing Protection Fund,						
40	created in 1953, which is nearly exhausted, has facilitated the protection of more than 200 hazardous railroad street grade cross-						
41	ings with better warning devices. Chapter 2091, Statutes of 1957, established an annual appropriation of \$5,000,000 to the						
42	Division of Highways to assist cities and counties in constructing grade separation structures at points where railroads and						
43	city streets or county roads intersect. The statute requires that the commission shall furnish the Department of Public Works						
44	annually a priority list of crossings in need of separation. 2 additional positions are required to develop the relative need and						
45	priority list for this new program. One-half of a position is required in 1958-59 to survey over 3,000 track crossings to carry						
46	out the provisions of Chapter 1831, Statutes of 1957.

21							
22	LEGAL DIVISION						
23							
24	Objectives						
25							
26							
27	This function provides legal service to the commission and staff counsel.						
28							
29	Program and Performance						
30							
31	The staff handles all litigation involving the commission before courts and federal regulatory agencies; advises the commission, staff,						
32	and the public on legal and procedural matters; reviews all proposed commission orders and actions; reviews technical staff's						
33	informal investigations to determine whether formal proceedings or court action should be recommended; provides staff counsel						
34	in certain proceedings before the commission; analyzes records and recommends action on petitions for rehearing.						
35	Litigation is on the increase. Proceedings before Federal Power and Interstate Commerce Commissions are time consuming, and						
36	require much preparation and absence from office for protracted periods. An accelerated transportation enforcement program is						
37	making increasing demands in review of possible violations, recommendations for proceedings before commission or courts, and						
38	preparation and handling of trials. There has been a sharp numerical increase in commission decisions and actions, all of which						
39	are reviewed. There has been an expansion of need for staff counsel in major utility and carrier rate increase matters, and in						
40	other proceedings involving substantial questions of law. The number of petitions for rehearing has been increasing. To meet						
41	added workload in above and other functions, four additional attorney positions were authorized in the 1957-58 Budget. No						
42	additional positions are requested for 1958-59.						
43

72	EXAMINER DIVISION						
73							
74	Objectives						
75							
76							
77	This division provides the examiners to assure due process in formal hearing proceedings.						
78							
79	Program and Performance						
80							
81	Examiners are assigned to all formal filings which require a decision of the commission. During the fiscal year 1956-57, a total of						
82	1,394 formal filings were received. This is 59 more than the average filings for the past five years. 2,066 decisions were issued by						
83	the commission in 1956-57. This is the largest number of decisions ever rendered by the commission in a single year; however,						
84	674 matters were still pending as of June 30, 1957. It is expected that with the addition of the three examiners authorized by the						
85	Legislature in the current year this pending caseload can be reduced. No additional personnel is provided for in this budget.						
86

22	REPORTING							
23	Objectives							
24	This function provides the hearing reporters and transcribers for commission proceedings.							
25	Program and Performance							
26	Hearing reporters are assigned to all proceedings held before the commission. The reporter's notes are not transcribed unless ordered by either the litigants or the commission. Transcripts are prepared in over 60 percent of the hearings reported. There were 156,641 original folios produced in 1956-57. This is an increase of 10,294 folios over 1955-56. The number of days of hearing increased from 778 in 1955-56 to 1,003 in 1956-57. Receipts from transcripts of proceedings made for litigants are credited as a reimbursement to the appropriation for this function. This budget makes provision for continuing the existing level of service.

12					
13	GENERAL ANALYSIS				
14					
15	Objectives				
16	The basic objectives of the Department of Social Welfare are (1) to assure that programs for assistance of needy persons are administered uniformly and humanely throughout the State in such a manner as to minimize distress, encourage self-respect and independence, and preserve family life; (2) to develop and strengthen services to children, to protect them, to prevent delinquency, and to substitute homes for children who cannot live in their own homes, and whenever possible, provide permanent homes through adoption; (3) to provide protection and care through family homes or institutions for aged persons who cannot live in their own homes; (4) to promote and develop methods to assure the most economical and effective means of administration of the social welfare programs through other agencies.				
17					
18	Program and Performance				
19	Program responsibilities of the Department of Social Welfare are essentially those of developing policies and procedures for administering the broad range of public assistance, child welfare, and institutional licensing programs, and to supervise the administration of these programs by local and private agencies. Except for direct licensing responsibilities and reporting to courts on independent adoption petitions, the actual administration of these programs is discharged through other agencies, public and private.				
20	Programs are carried out within the framework of state and federal laws. For administration of public assistance to the aged, blind, children and disabled, the department is responsible for assuring to the Federal Government that these programs are administered uniformly and in accordance with federal standards in all counties of the State. In the allocation of the federal funds for child welfare services, the department functions as the agent of the Federal Government.				
21	Involved is an expenditure of over \$400,000,000 a year in state, county and federal funds for assistance payments, administration and services. These programs directly help 500,000 people and must serve a wide range of individual needs. Their complexities are inherent in the basic differences and circumstances and conditions in which people are found, and the aim is to serve these wide ranges of need for financial help and for protective care, and services necessary to restore persons to self-support or self-care.				
22	During the 1956-57 Fiscal Year, in keeping with the trend of recent years to emphasize management improvements in local agencies, particularly county welfare departments, administrative analysts and research technicians were assigned to each of the 3 area offices to provide help and consultation to local agencies with problems of organization, administration, and program research. A new formula for staffing the department and local agencies for the independent adoption program was developed and placed in operation. This formula provides for more flexible allocation of staff and better control of staff requirements in relation to volume of work performed. Quantitative measurements were completed in 8 county welfare departments. This is a long-range study designed to identify the more important factors involved in administrative costs and to establish standards and methods for more effective administration and for determining staff needs on a performance basis. Management consultation to county welfare departments was provided on a broad range of subjects. These varied from a complete organizational study of one of the largest welfare departments in the State to a short-time consultation on procedural problems in relatively small counties. Training assistance to county welfare departments was stepped up considerably during the year. Through the department's centralized records management program, considerable savings have been made in personnel time, space, and filing equipment. During the 1956-57 Fiscal Year, the department transferred to the Secretary of State's record center 18.7 tons of inactive material and destroyed 8.6 tons of obsolete records which enabled discontinuance of a record storage warehouse and savings of filing cabinets valued in excess of \$30,000.				
23	2 new programs were authorized by the 1957 Legislature, a medical care program for all recipients and an aid program to the totally and permanently disabled. New organization units were established in the central and area offices. Service units were staffed to handle the additional workload. The new programs became effective October 1, 1957, and administration of these programs is under way. During the 1957-58 Fiscal Year, 28 positions were added for the medical care program and 38.5 positions for the aid to permanent and totally disabled program. \$28,635 in current year's savings are being applied to reduce the required expenditures for these programs. With the exception of 2 positions in medical care and 8 positions in the aid to permanent and totally disabled which were allowed temporarily to start the program, this level of staffing is continued in the 1958-59 Fiscal Year.				
24	The passage of Public Law No. 316 of the 1957 Session of Congress reactivated the program formerly operated under the Refugee Relief Act which expired December 31, 1957. Under its liberalized provisions, it is now called the Inter-country Adoption Program. This program became effective October 1, 1957, and Emergency Fund financing for \$69,945 was provided for 19 positions in the current year for California's participation in the program. It is proposed that 23 positions be provided during the 1958-59 Fiscal Year at a cost of \$128,711.				
25	Workload statistics indicate the continuing workload increases for existing programs for which 14 positions are proposed in the 1958-59 Fiscal Year. In order to maintain the present standard of operations within the department and to effect improvement in administration and services to people as mandated under the welfare laws of the State, and to obtain and promote efficiency within the respective organizational units within the department, additional positions are included for the Bureau of Adoptions and the Bureau of Personnel.				
26	New programs initiated in the current year will grow to full maturity by the next fiscal year. On this basis, the overall budget for this department during the 1958-59 year represents the financial plan to provide minimum staffing and related expenditures to efficiently administer the current ongoing programs and to provide full-year operation of programs authorized by the 1957 Legislature.				
27	^a The summary of expenditures from state, federal, and county funds for social welfare programs administered by the department and county administration of child welfare services appears in the Local Assistance Budget, "Subventions for Social Welfare."				
28	^b Grants from Federal Government and expenditures therefrom are not included in the overall budget totals.

1							
2	DEPARTMENTAL ADMINISTRATION						
3							
4	Objectives						
5							
6	The unit includes the Social Welfare Board, office of the director, and the administrative advisor, and is responsible for the direction						
7	and co-ordination of departmental programs.						
8							
9	Program and Performance						
10							
11	Six positions were added in the current year for new programs enacted by the 1957 Legislature. Medical consultants are placed in						
12	this unit since they report directly to the deputy director. 1 clerical position based on workload is proposed to provide clerical						
13	assistance for the medical consultants. Medical consultation, which was obtained on a contractual basis during the current fiscal						
14	year, is budgeted in salaries and wages for the 1958-59 Fiscal Year.						
15	The administrative advisor's unit furnishes legal information and advice to the department and the Social Welfare Board, and com-						
16	ducts appealing hearings for the Social Welfare Board. 3 additional positions are proposed, based on increased workload of new						
17	programs.						
18

56							
57	DIVISION OF SOCIAL SECURITY						
58							
59	Objectives						
60							
61	This division is responsible for the supervision and review of the public assistance programs administered by the department.						
62							
63	Program and Performance						
64							
65	This division consists of Divisional Administration, Bureau of Field Review, Bureau of Aid to Needy Children, Bureau of Aid to						
66	Needy Aged, and the new Bureau of Aid to Needy Disabled.						
67	The Bureau of Field Review performs the evaluation and planning of field reviews necessary for evaluating the performance of						
68	welfare administration in the counties. The Bureau of Aid to Needy Children develops and interprets rules and regulations and						
69	provides consultation for the Aid to Needy Children Program. The Bureau of Aid to Needy Aged interprets rules and regula-						
70	tions and provides consultation for the Aid to Needy Aged Programs. The Bureau of Aid to Needy Disabled is responsible for						
71	the administrative policies of the new program. Close surveillance is being given to assure that department policy is consistent with						
72	legislative intent. Consultation is provided to local agencies by each of the bureaus concerning their respective programs. The						
73	Bureau of Aid to Needy Children is giving particular attention to simplification of this program.

28	DIVISION OF MEDICAL CARE						
29							
30	Objectives						
31	It is the responsibility of this division to formulate and interpret standards, policy, rules and regulations governing the administration of the new medical program for public assistance recipients.						
32							
33	Program and Performance						
34	The primary task of formulating policies for the administration of the new program is well under way. Medical consultation is provided for in the executive unit. Continued efforts in formulation and interpretation of policies will be given. In addition, responsibilities of this division will include negotiation of fees, co-ordination with other public assistance programs and consultation with departmental and county staffs.

48							
49	Objectives						
50	This division is responsible for the formulation and interpretation of standards, policies, rules and regulations governing the administration of the Aid to Blind Programs.						
51							
52	Program and Performance						
53	The personnel of this division review reports of eye examinations, provide consultant services on medical phases, and administer the Prevention of Blindness Program. The Prevention of Blindness Program provides treatment or surgery to prevent blindness or restore vision to persons applying for or receiving aid to the blind. Advisory committees assist in the development of policies. The Prevention of Blindness Program is increased by \$11,940 due to increased workload and cost of the program.

15	DIVISION OF CHILD WELFARE						
16							
17	Objectives						
18							
19	The responsibility of this division is the administration of the programs for the care and protection of children and for residents of						
20	boarding homes and institutions.						
21							
22	Program and Performance						
23							
24	Divisional administration supervises and co-ordinates the activities of the Bureau of Child Welfare Services, Bureau of Adoptions,						
25	Bureau of Boarding Homes and Institutions, and maintains liaison with the children's bureau of the Federal Department of						
26	Health Education and Welfare.						
27	The Bureau of Child Welfare Services is responsible for the administration of child welfare services in rural areas and in areas of						
28	special need. With the exception of the clerical position, this bureau is financed from federal funds. The Bureau of Adoptions is						
29	responsible for the administration of the adoption programs, including the licensing of private and public adoption agencies. The						
30	Bureau of Boarding Homes and Institutions is responsible for the inspection and licensing of boarding homes, institutions, and						
31	child placing agencies by area staff and public agencies delegated for that purpose.						
32	Three new positions are requested in the Bureau of Adoptions. One professional position is based on increased workload of the relin-						
33	quishment and independent adoption programs. One professional and 1 clerical position is based on the continuation of the inter-						
34	country adoption program. In addition, one clerical position is abolished.						
35

DEPARTMENT OF SOCIAL WELFARE—Continued

LINE	SUPPORT EXPENDITURES DETAIL	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)			
1	DIVISION OF ADMINISTRATIVE SERVICES						
2	Objectives						
3	This division is responsible for the development and execution of fiscal and administration policies, personnel management, research,						
4	management studies, training, and housekeeping functions.						
5	Program and Performance						
6	All equipment and operating expenses for the department, except some special activities, are included in this division. The Bureau						
7	of Financial Administration was abolished and positions transferred to Divisional Administration, Bureau of Administrative Ac-						
8	counting, and the Bureau of Fiscal Services.						
9	The division chief is responsible for the supervision and co-ordination of the activities of the bureaus of the division. The fiscal officer						
10	is the supervisor of the Bureau of Administrative Accounting, Bureau of Fiscal Services, and the Bureau of Office Services. The						
11	Bureau of Administrative Accounting maintains accounting, budgetary cost accounting, and property records of the department;						
12	maintains records of county estimates and expenditure statements; and compiles estimates and expenditure statements for sub-						
13	mission to the Federal Government. The Bureau of Fiscal Services has general responsibility for the claims submitted by the						
14	counties and other agencies; and makes field audits in relation to life care agreements; develops accounting systems recom-						
15	mended to counties. The Bureau of Office Services performs general housekeeping functions, operates the duplicating unit, steno-						
16	graphic pool, central files, mail section, and supply section. The Bureau of Personnel administers a merit system for counties						
17	not having a civil service system, supervises the operations of the county civil service system covering personnel engaged						
18	in the administration of public assistance and child welfare programs and performs the personnel work for the State Depart-						
19	ment. The Bureau of Research and Statistics is responsible for analysis of statistics for all operations of the department; for						
20	preparation of estimates and special studies; and for the preparation of departmental and statistical reports. The Bureau of						
21	Management Analysis is responsible for administrative progress reporting, reports control, forms control, and management and						
22	procedural analysis. The Bureau of Training is responsible for the development and administration of in-service training program						
23	for county and departmental personnel.						
24	2 accountants are authorized in the Bureau of Fiscal Services for the current year only for new programs and are not included						
25	in the 1958-59 Fiscal Year budget. 1 additional position is proposed in the Bureau of Personnel based on the workload increases						
26	in the county merit system which is supervised by the State Department. Particular attention will be directed to classification						
27	studies. The additional position in the Bureau of Management Analysis represents the continuation of an existing position on						
28	a permanent basis whose responsibility is the study of administrative cost and the development of performance standards for						
29	local welfare departments.

27	AREA OPERATIONS						
28	Objectives						
29	The area offices in Los Angeles, San Francisco, and Sacramento are responsible for the supervision of local agencies and the execution of departmental policies throughout the State.						
30	Program and Performance						
31	Area deputies supervise the area staffs who are responsible for program consultation to local agencies and direct adoption and licensing programs. District representatives are responsible for the co-ordination and overall relationships with the counties. The majority of the professional and clerical positions are budgeted on the basis of workload for which continually reviewed staffing yardsticks have been developed. The remaining positions provide program consultation to counties and private agencies. A new section, the Medical and Aid to Totally Disabled section, has been established based on staffing yardsticks for the new program.						
32	In the current year, 17 positions were added for the Inter-country Adoption Program. For the 1958-59 Fiscal Year, 21 positions are proposed for this program. An estimated increase in the appeals and complaints workload justifies 2 professional and a clerical position. The independent adoptions workload justifies 1 professional and 1 clerical position. The licensing workload justifies 3 professional and 1 clerical positions. 1 professional and 1 clerical positions are provided for the supervision of private agencies.						
33	SALARIES AND WAGES

10	GENERAL ANALYSIS				
11					
12	Objectives				
13					
14	To encourage and assist citizen participation and action to make it possible for senior citizens to live with security, dignity, self-respect and usefulness; to advise the Governor on the problems of aging.				
15					
16					
17	Program and Performance				
18					
19	The "Annual Report of the Citizens Advisory Committee on Aging, 1956" provides a report of existing problems and tentative recommendations for solving them. The committee is organized on a subcommittee basis with state department specialists and citizens being members of the subcommittees.				
20					
21	The staff members of the committee consult with community organizations, interested groups, and the general public to encourage them in facing and solving common problems. A library has been developed which is used in the work with communities. A quarterly newsletter is prepared to summarize the developments and programs in gerontology.				
22					
23	Cost increases are attributable to salary increase, price increase, and expenses related to increased activity.

15	ADMINISTRATION DIVISION				
16	GENERAL ANALYSIS				
17	The Administration Division provides policy and administrative direction to the other divisions of the department. The California Veterans Board, a policymaking body, the administrative head of the department and his deputy, and functions common to all divisions, such as personnel, are included in this division. Chapter 507, Statutes of 1957, provides that the salaries and expenses of the California Veterans Board, the secretary of the board, and the director and deputy director of the Department of Veterans Affairs shall be paid out of the Farm and Home Building Fund of 1943. Accordingly, these positions are budgeted in the Division of Farm and Home Purchases effective September 11, 1957, but organizationally are considered part of the Administration Division.

EDUCATIONAL ASSISTANCE DIVISION

GENERAL ANALYSIS

This division administers two programs of educational assistance, one for California veterans, the other for dependents of deceased veterans. Under both programs the division provides educational counseling and assistance in securing admission to suitable institutions of learning. Insofar as funds permit, veterans are provided with tuition fees plus a monthly maintenance and book allowance of \$50 to a maximum of \$1,000. Widows and children of veterans who died as a result of war service may receive \$20 monthly while attending high school and \$40 monthly while attending schools above the high school level.

As of November 30, 1957, the State of California had assisted 60,207 veterans, 1,308 widows, and 4,788 orphans since the inception of this program.

Only veterans whose federal benefits are no longer available are accepted, so there is no duplication with federal educational benefits. In addition, veterans must show a legitimate need for further training and demonstrate the ability to successfully pursue the educational course requested. Once in training, the students' grades are reviewed periodically and only those making satisfactory progress are continued. Division representatives also insure that the educational plan is financially sound and budget the State entitlement when necessary. These policies have resulted in substantial savings and the full \$1,000 entitlement is seldom used. the average expenditure being approximately \$500.

a Expenditures from utility funds are not included in the overall budget totals.

b These positions are budgeted in the Division of Farm and Home Purchases effective September 11, 1957.

c 1 position is budgeted in the Division of Farm and Home Purchases effective September 11, 1957.

2	GENERAL ANALYSIS—Continued						
3							
4							
5							
6	Advanced professional and technical training is encouraged which might otherwise be completely beyond the applicant's financial						
7	means. While the low subsistence paid covers only a small part of the present day cost of school attendance, it does serve as						
8	an incentive to continue in school and divert other income toward an educational goal.						
9	The division emphasizes training which will clearly increase the earning capacity of the recipient. By so doing, the State is assured						
10	of being reimbursed many times over for its educational expenditures out of the increased taxes paid on the higher income of						
11	those who have benefited from this program.						
12	1 additional position of veterans educational representative is proposed to meet the increased workload that has developed since						
13	the last position was added in the 1953-54 Fiscal Year. Sufficient personnel is necessary in order to keep the average cost per						
14	student at a minimum and to provide necessary counseling.

40	SERVICE AND CO-ORDINATION DIVISION						
41	GENERAL ANALYSIS						
42							
43	The primary purpose of this division is to assist veterans and dependents of veterans in establishing rights to any privilege, preference,						
44	care, or compensation provided for by the laws of the United States or of the State of California.						
45	This division contracts with eligible veterans organizations and the counties through the veterans service officers, to assist every vet-						
46	eran of any war of the United States and the dependent of every veteran in presenting and pursuing such claim as the veteran						
47	or dependent may have against the United States arising out of war service, and in establishing the veteran's or dependent's right						
48	to any privilege, preference, care, or compensation provided for by the laws of the United States or of this State. It is this						
49	division that determines the eligibility of veterans to state benefits including preference in civil service examinations.						
50	To November 30, 1957, a total of 457,899 applications to establish California Veterans eligibility had been approved. Of this total,						
51	56,360 were veterans of World War I; 341,903 were veterans of World War II; and 59,636 were veterans of the Korean Emer-						
52	gency. As of the same date, 117,476 veterans had established their eligibility for preference in civil service examinations.						
53	State aid to county service officers had its inception on October 1, 1945, and the Veterans Claims and Rights Service through the vet-						
54	erans organizations started on February 1, 1944. During the life of the 2 programs the establishment of approximately \$75,000						
55	claims with a monetary value of over \$600,000,000 has been reported.						
56							
57	SALARIES AND WAGES

26	EDUCATIONAL ASSISTANCE TO VETERANS (General Fund)				\$2,574,548	\$2,805,000	\$2,970,000	
27	GENERAL ANALYSIS							
28	This program, pursuant to the provisions of Sections 981 to 981.8 of the Military and Veterans Code, is to provide opportunities for veterans to continue their education. The assistance is limited to a total payment of \$1,000 per California veteran. The sub-							
29	sistence is limited to \$40 per month based on actual attendance in school, plus school books and supplies as are necessary, not to							
30	exceed a total of \$50 per month. In addition, tuition costs are paid, provided the maximum of \$1,000 per veteran is not							
31	exceeded. The amount proposed is based on an estimated increase of 500 in enrollments and a small net increase in costs							
32	per student. The peak in enrollment for 1958-59 is expected to be 9,000.							
33	Tuition and fees				\$1,508,548	\$1,635,000	\$1,745,000	
34	Subsistence				1,066,000	1,170,000	1,225,000	
35	Totals, Educational Assistance to Veterans				\$2,574,548	\$2,805,000	\$2,970,000	\$165,000 (5.9%)
36	VETERANS' CLAIMS AND RIGHTS SERVICE (General Fund)				\$574,000	\$574,000	\$596,700	
37	GENERAL ANALYSIS							
38	Under the provisions of Section 699.5 of the Military and Veterans Code, the State assists every veteran of any war of the United							
39	States and the dependent of every such veteran in presenting and purchasing such claims as the veteran or dependent may							
40	have against the United States arising out of war service and in establishing the veteran's or dependent's right to any privilege,							
41	preference, care or compensation provided for by the laws of the United States, or this State.							
42	This budget includes funds for the Jewish War Veterans on the same basis as is provided the other organizations now in the pro-							
43	gram. Except for the addition of funds for the Jewish War Veterans, assistance through this program is continued at the							
44	expenditure level established in the 1953-54 Fiscal Year.							
45	American Legion				\$349,123			
46	Veterans of Foreign Wars				120,817			
47	Disabled American Veterans				80,275	\$574,000	\$574,000	
48	AMVETS				23,785			
49	Jewish War Veterans				—	—	22,700	
50	Totals, Veterans' Claims and Rights Services				\$574,000	\$574,000	\$596,700	\$22,700 (4.0%)
51	EDUCATIONAL ASSISTANCE TO VETERANS'							
52	DEPENDENTS (Veterans' Dependents Education Fund)				\$224,560	\$210,000	\$293,000

19							
20	GENERAL ANALYSIS						
21	Objectives						
22							
23	The Veterans Home of California was established to provide a home for qualified California veterans who have physical disabilities						
24	and need hospital, chronic or domiciliary care which they are unable to provide for themselves.						
25							
26	Program and Performance						
27							
28	The home was founded in 1883 by the Grand Army of the Republic and the Associated Veterans of the Mexican War and was taken						
29	over by the State in 1897. As of December 31, 1957, there were 2,072 resident members, including 55 women veterans. The Fed-						
30	eral Government acknowledges its responsibility for the veterans cared for by contributing \$700 per year for the support of each						
31	member.						
32	To be eligible for admission, a veteran must have been a resident of California for at least 10 years immediately prior to making						
33	application, and have honorable wartime service in the armed forces of the United States. He must have temporary or perma-						
34	nent disability to the extent that he is unable to follow a gainful occupation and he financially unable to provide for his hospital-						
35	ization or domiciliary care. The home has no facilities for and does not accept veterans who are mentally ill, tubercular,						
36	chronically alcoholic, or addicted to narcotics or other drugs.						
37	To carry out its medical program, the home's facilities include a fully accredited modern medical and surgical hospital of 451 beds,						
38	2 intermediate type barracks for the chronically ill of 406 beds, 8 domiciliary barracks of 1,532 beds, which includes 1 unit of 55						
39	beds for women veterans, a recreation center and various specialized buildings, including some employee housing. The hospital						
40	staff has 20 full-time physicians, 103 graduate nurses, and 181 hospital aids.						
41	Convalescent hospital cases and most chronic ambulatory patients are assigned to the convalescent barracks near the main hospital.						
42	Members placed here are normally able to take care of themselves and go to meals in their own dining room.						
43	1,400 home members, constituting three-fourths of the present membership, live in the 8 domiciliary barracks on the reservation. 7						
44	of these barracks are for male veterans and 1 is for women veterans.						
45	The Veterans' Home offers broad possibilities for the rehabilitation of members along physical, occupational, vocational, social and						
46	spiritual lines. Unless employed at the home or excused by the chief of medical services, all domiciliary members are required to						
47	perform work therapy duties.						
48	In order to meet the increased workload at the home 5 new positions are proposed in this budget. 1 intermediate typist-clerk is						
49	added to assist the medical records librarian. The workload of this function requires the services of 2 persons and division of the						
50	work between the medical records librarian and the intermediate typist-clerk will accomplish the work most effectively. 2 addi-						
51	tional janitors are proposed to staff the third section of the recreation center of 14,500 square feet on a 7-day-per-week basis.						
52	The janitorial needs of this type of facility are heavy due to the number of persons using its services. These janitors do not clean						
53	any areas from which the Post Fund derives revenue. An additional laundryman is required to meet the increased workload of						
54	the total laundry operation. Past estimates of laundry workload have proven to be conservative and this position is proposed to						
55	meet the additional workload that will reach its peak in 1958-59 with the full use of the new hospital facilities. One electrician						
56	is proposed effective April 1, 1959, to coincide with the completion of budgeted capital outlay projects. Additional facilities						
57	expected to be completed by April, 1959, include the new domiciliary medical center, a new chapel and extensive improvements to						
58	the hospital.

10	Objectives				
11					
12	The home is for custodial, medical, and nursing care of the widows and dependent, destitute, unmarried daughters of Union Veterans				
13	who served honorably in the Civil War.				
14					
15	Program and Performance				
16					
17	Admissions to the home were closed in 1947 and, effective May 1, 1954, the facilities were leased to private persons for the purpose of				
18	conducting a nursing home for the aged. Under the terms of a contractual arrangement between the Department of Veterans				
19	Affairs and the private persons, the remaining members will be cared for in accordance with standards of care and service				
20	prescribed by the department. An average population of 6 members is estimated for the 1957-58 and 1958-59 Fiscal Years. Actual				
21	membership was 6 on November 30, 1957.

GENERAL ANALYSIS

Objectives

The department has responsibility for planning, constructing and operating authorized state water projects; co-operates in water projects with federal and local government units; takes responsibility for averting, alleviating or restoring damaged property during times of emergency resulting from storms and floods, and for declaring of an emergency from such causes; compiles basic data on water resources and water use; compiles data on diversions and stream flows on the Sacramento and San Joaquin Rivers and tributaries; performs maintenance work on the Sacramento River Flood Control Project; approves designs and supervises construction of all dams, except those federally owned, as regards their safety; supervises certain flood and storm damage repairs in which the State participates financially; supervises certain public water districts; reviews federal reports on flood control and water supply projects; administers state filings on water and provides watermaster service; makes investigations of surface and underground water supplies; makes water quality investigations; licenses artificial weather control experiments and operations; administers interstate compacts relating to water; administers the Flood Control Fund to reimburse local agencies for their costs incurred by co-operation on federal flood control projects; represents the State on matters pertaining to the Central Valley Project; conducts engineering investigations for the California Districts Securities Commission; supervises construction of hydraulic structures for other state agencies; has responsibility for investigating and correcting beach erosion; and in co-operation with other agencies; forecasts snow melt and other runoff.

Program and Performance

The Department of Water Resources consists primarily of three divisions—the Division of Design and Construction, the Division of Resources Planning, and the Division of Administration. The Divisions of Design and Construction and Resources Planning are the principal operating divisions of the department. The main function of the Division of Administration is to service these two operating divisions. In addition, attached to department headquarters and not an integral part of the three divisions, are numerous special staff activities which include, among other things, a departmental legal staff. The California Water Commission is also a part of the department and acts in an advisory capacity thereto.

1956-57

During the last completed fiscal year the activities of the Division of Design and Construction were centered primarily on work for the Feather River Project. Work was initiated on various alternate designs and studies for the Oroville Dam, power plants, aqueducts, and other appurtenant features of the project. A consulting board was organized to give advice and guidance on the program. Design work was well advanced on the highway and railroad relocation around Oroville Reservoir and late in the year a contract was awarded for the main portion of highway relocation and for driving 2 of the longer tunnels on the railroad relocation around the reservoir. Labora-

tory facilities were constructed for new programs initiated for the testing of mass concrete for the Oroville Dam and for soils and chemical testing activities for the department.

The Division of Resources Planning inherited most of the functions assigned to the former Division of Water Resources, together with a number of new activities. Bulletin No. 3 entitled "The California Water Plan" was printed and distributed in May, 1957, formally culminating 10 years of intensive studies under the statewide water resources investigation. Bulletin No. 59, an interim report on "Upper Feather River Basin Development" was published in February, 1957, and Bulletin No. 60, "Interim Report on Salinity Barrier Control Investigation" was published in March, 1957. Scheduled progress was made on 19 investigations leading to future reports on furtherance of the California Water Development Program.

The Division of Resources Planning initiated and continued basic data collection, compilation, and analysis in the fields of hydrology, climate, precipitation, meteorology, ground water, water quality, land and water use, geology, and other related subjects. Comprehensive studies were continued in connection with determination of the best route for delivering water to Southern California. Work was also performed for the various regional water pollution control boards, the California Districts Securities Commission, and other state agencies. A machine computing program to be applied to the solution of engineering problems was initiated.

The Division of Administration expanded its activities to include servicing of the many new activities undertaken by the 2 operating divisions and the remainder of the department.

The special activities of the department headquarters included the establishment and staffing of a Public Information Section, designed to supply the many demands of the public and of leaving critically needed engineers free to perform engineering duties; the geologic staff was activated for serving principally as a technical co-ordinator between the operating divisions and the Southern California district office; the Supervision of Dams staff continued to supervise the design, construction, maintenance and repairs of in excess of 800 dams throughout the State currently under department jurisdiction as to safety; the Water Rights and Watermaster Sections provided watermaster service in 17 watermaster service areas throughout the State, represented the department in numerous proceedings before the State Water Rights Board and the Federal Power Commission, and carried on all activities with respect to state filings formerly held by the State Department of Finance; and the department legal staff performed the necessary legal functions for all components of the department.

During this fiscal year the California Water Commission, then known as the State Water Board, devoted most of its time and effort to public hearings on official publications of the commission and of the department, the principal one of which was Bulletin No. 3, entitled "The California Water Plan"; public hearings on requests of various state agencies for assignment or release of priorities of state filings now held by the department involving the Mokelumne River, Dry Creek, Mad River, American River and Trinity River; policy recommendations to the department, the Governor and the Legislature with respect to water matters; and flood control appropriations for federally authorized flood control projects in California.

DEPARTMENT OF WATER RESOURCES—Continued

GENERAL ANALYSIS—Continued

Program and Performance—Continued

1957-58

During the current fiscal year the activities of the Division of Design and Construction included continued design studies relating to the Oroville Dam, power plants, canal and appurtenant structures with contracts being awarded or to be awarded for construction of a bridge over the North Fork of the Feather River and on the Feather River at Oroville, required for relocation of the Western Pacific Railroad. Construction activities continued on the highway and 2 railroad tunnels which were awarded under contract during the 1956-57 Fiscal Year. Design studies were continued on features for the South Bay Aqueduct and design activities were initiated with respect to the North Bay Aqueduct features. Negotiation activities were in progress for the acquisition of lands for the San Luis Reservoir and the Frenchman Reservoir. Work and negotiations for acquisition of lands were carried on in connection with Whale Rock Project in San Luis Obispo County.

Of some 19 investigations in progress by the Division of Resources Planning at the beginning of the fiscal year, it is expected that 6 will be completed and reported on prior to July 1, 1958. Other continuing activities as described under the Fiscal Year 1956-57 will be continued. The machine computing program and land classification work is being expanded to keep pace with the growing requirements.

During the early portion of this fiscal year the California Water Commission continued public hearings on disposition of state filings involving Dry Creek and began hearings for disposition for state filings necessary for the Feather River Project. Continued hearings are planned on state filings relating to the Upper Basin features and Delta features of the Feather River Project during the latter part of this fiscal year. Policy matters to be considered by the commission during this period included principals for settlement of the North-South water problem, land acquisition policies of the department, cost of water, relationships with the Watershed Protection Program of the Soil Conservation Service, federal-state relationships in regard to the San Luis Project, general policy on state filings,

cost allocations on water projects, and federal-state co-operation on Corps of Engineers multiple-purpose flood control projects.

1953-59

During the budget year the Division of Design and Construction proposes to continue geologic explorations, preparation of designs, plans, and specifications for the dam, aqueduct, and appurtenant mechanical electrical features of the Oroville features of the Feather River Project. Certain exploratory work, design, and preparation of plans and specifications will be done for the South Bay Aqueduct features.

Acquisition of the necessary rights-of-way for San Luis Reservoir will be continued. Construction of test canal sections will be made in the subsidence area in the San Joaquin Valley along the route of the San Joaquin Aqueduct. Construction of Whale Rock Project will be initiated in San Luis Obispo County.

It is expected that 15 investigations, including 2 added studies, will be in progress by the Division of Resources Planning at the beginning of this fiscal year. During the year 7 investigations should be completed and reported on including the studies of alternate routing of Feather River Project water to Southern California. Other continuing activities as described in the Fiscal Year 1956-57 will be continued by the Division of Resources Planning.

The activities of the Division of Administration and the special staff activities of the department will be continued at the present level of service. In addition, the water rights section of department headquarters will commence to process necessary water right applications before the State Water Rights Board for the Feather River Project.

During this period the California Water Commission will make recommendations to the director upon policy matters which will be intensified as water development programs reach the critical stage. Also to be intensified during this period will be activities relating to federal appropriations for California water projects in view of the emphasis on defense spending during the next several years. Public hearings will also be held on numerous other requests for disposition of state filings as the state, federal and local agencies enter in the stepped-up water development program.

DEPARTMENTAL ADMINISTRATION

Objectives

The director's office provides staff assistance in (1) legal matters; (2) water rights; (3) geology; (4) surveying and mapping; (5) supervision of dams; and (6) public information activities. This staff represents specialized fields in which the department will be continually involved, and the prime purpose is to co-ordinate, assist, and serve the operating divisions and Southern California District Office of the department which from time to time will require such services.

Program and Performance

The legal activities of the department and the personnel of the legal staff are under the direction and supervision of the chief counsel for the department. To maintain effective supervision and to keep the legal staff flexible for maximum efficiency, it is anticipated that the individual members of the legal staff will not be assigned to separate operating units.

All water right activities, including watermaster service, are under the direction and supervision of a principal hydraulic

engineer. These activities include presentations before the State Water Rights Board, administration of state filings, and the acquisition of water rights for state projects. Assistance and advice is available to both operating divisions and the Southern California District Office to assist in problems relating to these, as well as other water right matters.

Insofar as watermaster service is concerned, there are 17 watermaster service areas within the State where state watermasters are in charge of distribution of water in accordance with court decrees.

The engineering geology staff provides technical guidance in all geologic studies, including both the planning and execution phases, and encompassing establishment of techniques and procedures. The staff will serve as technical consultants to the operating divisions, act as technical co-ordinators between the divisions and the Southern California District Office, supply geologic services to the Supervision of Dams function, and review all geologic reports prepared by the department prior to submission and release.

As with geology, each operating division will administer and control its own surveyors. The staff position of coordinator of

surveying and mapping will have the same type of responsibilities as outlined above for engineering geology, and is available for consultation on methods to be employed, special procedures, basic data, and maps available, ntization of the California Co-ordinate System standardization of notekeeping and computation methods, and general co-ordination of surveying activities within the department. This function will also be responsible for contracts for aerial photography, surveying or photogrammetric mapping, and directly supervising the preparation of such contracts by division personnel, and is also responsible for the mapping program and priorities relative to the co-operative mapping program with the United States Geological Survey.

The Supervision of Dams staff of the department has the primary duty of supervising the design, construction, maintenance, repairs, alterations, and operation of all dams in the State, except those owned by the Federal Government, to the extent necessary for safety to life and property. The staff is directed by the principal engineer of dams. Most of the staff of this activity have had extensive field and office experience in the practical, as

well as the theoretical aspects of dam design and construction and will be available to consult with or advise the operating divisions in regard to problems related to dams. In the interests of maintaining uniform standards of safety in works being planned by the department with the standards required of outside agencies, the Supervision of Dams staff will review preliminary dam plans prepared by the Planning Division.

The public information functions of the department are under the supervision of the special representative of the director, with the information officer directly in charge of the public information and public relations program.

An engineer is provided in the office of the Coordinator of Maps and Surveys to cope with the workload and to provide continuity of services when the coordinator is in the field. A clerical position is budgeted in the chief geologist's office to relieve the 3 professional personnel of clerical duties.

DIVISION OF ADMINISTRATION

Objectives

The Division of Administration performs all administrative and business management duties incident to the attainment of the department's goals.

Program and Performance

This division provides the operating divisions with accounting, budgetary, property management, personnel, supply, filing, duplicating, stenographic, and other clerical, office, and management services.

Greatly increased departmental staff, development of more complex organization, and office space that more than doubled are indicators of the heavy workload of the Division of Administration during the 1956-57 Fiscal Year and the first half of 1957-58 Fiscal Year.

To handle the resulting workload, administrative services and controls are being decentralized wherever possible to the lowest

level they can be efficiently performed. Stenographic and clerical services, except for several pool operations, have been decentralized and are now supervised by, budgeted with and charged to the line units involved. Administrative assistants are assigned to the other 2 divisions and are located in close proximity to the engineering and other technical staff. In this way assistance, advice, and information on administrative matters is readily available to such staff. The administrative assistant can be kept informed of the planning and phasing of engineering operations so that the needs of the technical staff are anticipated.

To meet the increasing workload and further expedite the administrative work, 6 new junior staff analysts are proposed for 1958-59. 5 of these would be assigned to the administrative assistants as workload requires. This will also permit the delegation to Administration Division personnel of certain administrative work now required to be performed by engineering staff. The other position will be utilized in the office of the chief of the division for procedures work.

SALARIES AND WAGES

DIVISION OF RESOURCES PLANNING

Objectives

The Division of Resources Planning has the responsibility for the collection and publication of all basic data accumulated by the department; carries out the planning of the California Water Development Program; renders data collection and planning services to other agencies; and administers joint Federal-State activities in the program area.

The Projects Development Branch is assigned responsibility for planning studies leading to authorization of project construction. Such responsibility includes investigation and planning under the California Water Development Program; work in connection with co-operative water resources investigations with local agencies, and a large number of other major studies being made at the specific direction of the Legislature. For purposes of organization, the branch is divided into the following sections:

The Major Project Section is assigned responsibility for the investigation and development of plans for major water conservation projects in the north coastal and Sacramento Valley areas. The projects will be designed to provide large quantities of water for the transfer to areas of deficient supply within the State. Investigation in each of the 2 areas will entail studies and design to a greater and more detailed extent than those originally made in connection with the Feather River Project.

The Local Project Section is assigned responsibility for developing works in local areas in which it has been found a need for water exists. Work of the Local Project Section includes investigation, planning and design of complete stream basin developments. A special investigation unit within the section conducts investigations and analyses, and prepares plans and reports on water resources investigations conducted in co-operation with local agencies.

The California Aqueduct Section is assigned responsibility for 3 major functions, each of which is assigned to a unit. The Salinity Control Barrier Unit is doing work which is a continuation of that initiated by the Abshire-Kelly Salinity Control Barrier Act of 1955. The Co-ordinated Planning Unit is responsible for studies and planning which will ultimately affect the direction and timing of all future investigations and construction proposals of the Department of Water Resources. The San Joaquin Valley Drainage Unit will be conducting the second of a 4-year investigation of drainage practices, problems, and solutions in the San Joaquin Valley.

Program and Performance

The Division of Resources Planning of the Department of Water Resources is composed of the Engineering Data and Services Branch; the Special Activities Branch; and the Project Development Branch.

ENGINEERING SERVICES BRANCH

Program and Performance

The Engineering Data and Services Branch is concerned with the collecting, assembling, developing, and analyzing of all statewide basic water resources data and with providing the other

branches and divisions of the department with the technical assistance and supervision and the services of technical engineering specialists. The branch is divided organizationally into the Water Utilization Section, Technical Services Section, and Hydraulic Section.

WATER UTILIZATION SECTION

Administrative Office

This section is a new organizational level established to provide better co-ordination and supervision of 3 existing units in the Engineering Services and 2 proposed new units. The 3 existing units are Land and Water Use, Economics, and Power Planning. The 2 proposed new units are Fish, Wildlife and Recreation Unit and the Applied Nuclear Engineering Unit. 2

new positions are required to man the administrative office of the section.

Principal hydraulic engineer	(1)	\$13,200
Intermediate stenographer-clerk	(1)	3,540
Total	2	\$16,740

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

WATER UTILIZATION SECTION—Continued

Applied Nuclear Engineering

This unit is being established because of the impact of nuclear energy upon power aspects of water resources development. Nuclear fission, thermonuclear fusion, and solar radiation are gradually emerging as highly important potential factors. Study in this area by the State Department of Water Resources has been recommended in a report to the Legislature by the Subcommittee on Water Project Uses for Atomic Power, of the Assembly Interim Committee on Conservation, Planning, and Public Works.

In Water Resources Planning these new energy sources must be considered from the standpoint of:

1. Competition with conventional hydroelectric plants.
 2. A source of heat energy for turbine-driven or motor drive pumps.
 3. Impact of pump storage hydroelectric plants.
 4. As a source of heat energy for either direct or indirect conversion of saline water and reclamation of waste water.
- 3 positions are budgeted for this unit of which 2 have been established in the current year.

Supervising nuclear engineer-physicist	(1)	\$11,400
Supervising hydraulic engineer	(2)	22,800
Total	3	\$34,200

Power Planning

The activities of the Power Planning Section are concerned with the planning of power phases of water resources developments, including types and sizes of generation equipment, sizes and routes for transmission lines, and related electrical facilities. Studies are made relative to potential market for power and of alternative means of developing power. Reports are drawn concerning the above, and specialized technical information and services are furnished engineering planning and design groups. The general increase in planning activities of the entire department contributes to main need for these additional positions. As the planning of water projects shifts from the preliminary state to more detailed status, need for specialized power planning services increases. The services of this staff, in addition to the planning activities, are required in connection with legislation and hearings, and hearings of legislative committees, application under the United States Small Reclamation Projects Act and S. B. 2174 providing for assistance to local projects. In planning the staging of water development and the development of individual initial projects, detailed consideration of power marketing, power for pumping, planning, design, and cost estimating of power features becomes increasingly important. 2 additional positions are needed for the workload in this unit of which 1 will be filled during 1957-58 if the properly qualified individual can be found for the position.

Associate electrical engineer—hydraulic structures	(1)	\$7,728
Associate mechanical engineer	(1)	7,728
Total	2	\$15,456

Fish, Wildlife, and Recreation

This is a new organizational unit to supervise and co-ordinate the work of the Department of Water Resources in connection with fisheries, wildlife, and recreation aspects of water resources development. This work will be supported by appropriations to special projects. Of these, the largest single contract will be with the State Department of Fish and Game in the amount of \$89,000. Contracts with state recreation agencies, including the Division of Beaches and Parks, and the State Recreation Commission, are estimated to amount to \$32,700. Recreation contracts with private firms also will be supervised out of this unit. Establishment of a skeleton staff within the department's organization is considered necessary in order to provide technical continuing supervision over these activities, to determine departmental policy in these areas and to represent this department in its relationship with other state, federal, and private agencies including negotiation of contracts. From 12 to 15 full-time personnel are expected to be required on a continuing basis from contracting state agencies during 1958-59. A minimum staff is included in the budget as follows:

Supervisor, Fish, Wildlife, and Recreation Unit	(1)	\$8,940
Assistant Supervisor, Fish, Wildlife, and Recreation Unit	(1)	6,360
Total	2	\$15,300

Economic Unit

The primary activity of the Economic Unit is to engage in the studies of the economic aspects of statewide water resources projects; to assemble and evaluate economic data pertinent to water development projects; to prepare special reports on economic management and financial matters; to review economic reports and develop conclusions and recommendations on financial and economic feasibility of projects; and to develop benefit-cost relationships. The section draws reports on the above and provides specialized services to the engineering groups as a necessary feature of engineering studies and reports on water resources development.

The proposal for additional senior and associate economists is based upon a detailed estimate of man-months of economic analysis needed on the various work which is assigned to or expected to be performed by this unit. A significant amount of time of the supervising economic analyst and 1 of the senior analysts is required for the director's staff and the State Water Commission. For some time, the State Water Commission has consistently requested additional economic studies be made directly for them. The financial advisor is proposed as a high level consultant to the director's office of fiscal economic, and financial problems connected with the state water development program.

The following new positions are included for 1958-59:

Senior economist	(2)	\$17,880
Associate economist	(6)	44,136
Financial advisor	(1)	13,200
Total	9	\$75,216

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

WATER UTILIZATION SECTION—Continued

Land and Water Use

The Land and Water Use Unit is engaged in classification of lands as to soil, fertility, land form, and drainage; with the making of crop surveys; with the development of consumption use requirements; and with the preparation of maps and reports related to the above for the purpose of supplying engineering personnel with specialized, technical information essential to water resources planning investigations and engineering reports resulting therefrom. The water use studies involve continuance of studies of various problems of water use at key stations already established, particularly in relation to consumptive use, irrigation efficiencies and water requirements. In addition, it involves establishing criteria and procedures for estimating evaporation rates based on pyroheliometers, atmometers or evaporation pans. The land use studies involve establishing a program for recurring land use surveys and land use planning for ultimate or stage development of water resources. To the extent staff is available, compilation of land use data will be initiated to indicate rate of development and water use.

It is proposed to subdivide the present unit into 2 separate

units with a senior land and water use analyst at the head of each unit. The additional senior land and water use analyst proposed for 1958-59 will provide continuing supervision over some of the major service projects. It is also planned in 1958-59 to establish a subunit to deal with the broad field of evaporation from water surfaces in order that planning engineers may have better estimates of evaporation rates at proposed reservoir sites. The additional staff is needed primarily for work on the California Water Development Program. 24 new positions are budgeted for the increased workload in the unit.

Senior land and water use analyst-----	(1)	\$8,940
Associate land and water use analyst-----	(1)	7,356
Assistant land and water use analyst-----	(8)	48,480
Junior land and water use analyst-----	(5)	27,480
Engineering aid II-----	(2)	9,024
Engineering aid I-----	(6)	21,240
Hydrographic aid-----	(1)	4,512
Total -----	24	\$127,032

TECHNICAL SERVICES SECTION

Administrative Office

This is a new organizational level being established to facilitate initiation of machine computing work of the department and to provide supervisory assistance necessary for the head of the branch. Included in this section will be the existing activities and organizational units of the Geologic Investigations Unit, the Maps and Surveys Unit, and the Drafting Unit.

The need for this organizational level arose from the need to organize and initiate on an accelerated basis the limited activities that have been possible to date on machine computing and control work; the need for supervisory assistance for the chief of the branch, involving stronger line supervision over the Geologic Investigations Unit, the Maps and Surveys Unit, and the Drafting Unit; and the need for establishing a unit to provide technical engineering review of reports of the Resources Planning Division. The unit was activated in 1957-58 with positions on loan from other sources. The following positions are included in the budget for 1958-59:

Principal hydraulic engineer-----	(1)	\$13,200
Intermediate stenographer-clerk-----	(1)	3,540
Total -----	2	\$16,740

Reports Unit

The purpose of the unit is to co-ordinate the preparation, review, editing, and processing of technical engineering reports issued by the Division of Resources Planning. This work was previously done by the division engineer and various section chiefs. In the past, the State Engineer did much of this work personally and as a result, the processing, editing, and reviewing of many reports were unnecessarily delayed. With the increased workload and the greater emphasis on engineering reports, it has become impossible for the division engineer to handle this responsibility. A small reports unit was established informally in 1 section of the Projects Development Branch to work on The California Water Plan reports. The establishment of a special staff unit is the next logical step in providing an orderly approach to this work. A minimum continuing staff is provided, which will be supplemented from time to time by assignment of lower level engineers to work on specific reports for specific periods of time under the head of this unit.

Supervising hydraulic engineer-----	(1)	\$11,400
Editorial aid-----	(1)	3,540
Intermediate typist-clerk-----	(1)	5,496
Total -----	3	\$20,436

Maps and Surveys

The Maps and Surveys Section administers the co-operative mapping program carried on with the Federal Government; continuously investigates the adequacy of topographical map coverage of the State and indicates priorities for new or revised mapping; co-ordinates mapping activities within the entire department and with the outside agencies in order to avoid duplication of effort; and maintains an index of state maps and provides a central source of maps and mapping information for state, federal, and local agencies and other parties. This section also supervises the production of maps from aerial photographs by photogrammetric means. Major items of increased expenditure for the Maps and Surveys Unit are 4 new positions amounting to \$23,652, and approximately \$70,000 for purchase of a heavy stereoscopic plotter for aerial mapping. The photogrammetrist II position is requested to man the heavy optical plotter. The other 3 positions are to provide adequate personnel to permit the necessary mapping and surveying services for other projects of the department. In addition the Anza-Borrego Desert State Park is being mapped at a scale of 1:24,000 rather than the planned scale of 1:62,500 at the request of the Division of Beaches and Parks. The additional cost for this mapping is \$40,000 and will be paid by the Division of Beaches and Parks over a 2-year period. The work will actually be done by the U. S. Geological Survey staff, but is included in this section's budget because it is a part of the co-operative mapping program carried on in conjunction with the U. S. Geological Survey.

The new positions are:

Photogrammetrist I-----	(1)	\$5,772
Photogrammetrist II-----	(1)	7,008
Engineering aid II-----	(1)	4,512
Assistant civil engineer-----	(1)	6,360
Total -----	4	\$23,652

Geologic Investigation

The Geologic Investigations Unit is engaged in geologic investigations in connection with the occurrence and movement of ground waters, with particular reference to quality of water; with relation to water well construction standards; and concerning field investigations relating to structural geology for the purpose of statewide planning for the location and construction of major dams, tunnels, canals, and other hydraulic structures. The services provided include investigation of geologic conditions pertaining to hydraulic engineering structures and ground water, evaluation of and supervision of drilling activities, and preparation of geologic reports. The support activities include

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

TECHNICAL SERVICES SECTION—Continued

Geologic Investigation—Continued

technical supervision of the geologic work done in the Division of Resources Planning; co-ordination of work done by personnel with that being done by contract; provision of staff geologic service to the division engineer on special studies; and the continued study of mechanisms, causes and effects of land subsidence in the San Joaquin Valley. Major items included in equipment are 2 trailer coaches to be used as mobile field offices for the geologic staff. These will be used as mobile offices in areas which are not convenient to a community having rentable office space or where there is not continuing need for office space.

The bulk of the work of this unit is services to other sections of the department. Additional staff proposed for this unit are:

Assistant engineering geologist	(3)	\$19,080
Geologic aids	(2)	9,024
Total	5	\$28,104

Drafting Unit

This unit provides drafting services to all programs in the department in need of such service. 4 new positions are required due to workload increase:

Senior delineator	(1)	\$6,060
Delineator	(2)	9,980
Senior drafting aid	(1)	4,512
Total	4	\$20,552

Machine Computing and Control

Machine computation and control has been brought into being by the need to increase the output of work by available engineers who are now engaged in highly technical but nevertheless repetitive manual computation procedures. The section is composed of a small, highly competent staff of engineers and technicians who will serve immediate additional workload demands of the department and who will develop and perfect a plan for a full staff and proper equipment to meet the growing demands for increasing efficiency by machine computing methods and machine recordation.

The potential application of electronic and mechanical methods in the department are unusually broad in scope and varied in type. Roughly they can be classified as follows:

1. Recordation—This is mechanization of recording, analysis, and reporting of basic hydrological data.

2. Computation—This is the performance of technical engineering computations by electronic equipment. These applications can be divided into 3 groups:

a. Routine and repetitive, regularly accruing, simple arithmetical computations, such as reductions of current meter measurement notes, ground water level observations, and land classification and land use data.

b. Intermittent, or infrequent, long sequences of repetitive computations, including simple reservoir operation, slip circle analysis, earthwork volume computations, and correlation computations.

c. 1-time computations involving intricate and exhaustive numerical processes, such as rigorous computation processes, extremely large volumes of data, and limited personnel time. During the last year progress has been made in developing both the organization and staffing. It has been determined, subsequent to the preparation of the detailed budget request, to establish 2 organizational units primarily concerned with machine computing and control activities. These will be an Engineering Methods Analysis Unit and a Machine Operations Unit, both of which will report directly to the chief of the Technical Services Section.

For 1958-59, \$69,780 is included for machine rental. Of this, approximately \$46,000 is for rental of 3 small computers which are being installed during 1957-58. The remaining \$24,000 is for a minimum complement of punched-card handling equipment. 3 small computers, the third of which is to be installed in 1957-58, are being leased with the option to purchase if the potential applications and advantages demonstrated by actual use recommend acquisition. The department plans for acquisition of an intermediate computer system in 1959-60, by which time it should be prepared to recommend the extent and kind of equipment required and whether it should be purchased. The following additional positions are budgeted to staff for the expanded program in 1958-59:

Associate hydraulic engineer	(1)	\$7,728
Assistant hydraulic engineer	(4)	25,440
Junior civil engineer	(2)	11,544
Engineering programmer	(1)	6,360
Civil engineering technician	(3)	16,372
Intermediate clerk	(1)	3,372
Junior clerk	(2)	5,832
Tabulating machine operator	(2)	7,800
Senior tabulating machine operator	(1)	4,296
Key punch operator	(5)	17,700
Junior typist-clerk	(1)	3,060
Total	23	\$109,504

HYDRAULIC SECTION

The Hydraulic Section is concerned with the measurement of stream flow; installation and operation of gaging stations; hydrographic studies of stream and tidal channels; administration of co-operative snow surveys program; collection and analysis of climatological and meteorological data for purposes of

developing annual statewide water crop forecasts; measurements of ground water levels throughout the State, including collection and assembling of well data; and other related activities having to do with the collection and analysis of hydraulic engineering data.

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

HYDRAULIC SECTION—Continued

Hydraulic Unit

The establishment of this unit is proposed to provide uniformity in hydrological methods through a specialized staff which keeps informed on all current developments and techniques in this specialized field. Initially, this unit will undertake the estimates of flood discharge and stream flow for use in planning and design. The unit will conduct studies involving the derivation of basin characteristics and rainfall-runoff relationship, including preparation of estimates of runoff and discharge rates for use by other activities of the department. One specific activity will be a continuing analysis of kind and location of stream gaging stations. The purpose of a centralized unit for this work is to insure the use of the most effective methods by other parts of the agency in hydrologic analyses, that the same techniques and data are used in the same areas on different investigations, and that duplications of work are kept to a minimum. The recommendation for actual construction of a project, as well as its size, location, and major features will depend upon the results of these analyses. 7 new positions are budgeted for 1958-59 and will make up the total complement of the unit.

Senior hydraulic engineer	(1)	\$8,940
Associate hydraulic engineer	(2)	15,456
Assistant hydraulic engineer	(2)	12,720
Junior civil engineer	(1)	5,772
Engineering aid II	(1)	4,512
Total	7	\$47,400

Ground Water Unit

The objectives of this unit established in 1956-57 are to collect and process ground water data for all ground water basins in central and northern California, and to act as a general statewide co-ordinating and clearing agency for all basic ground water data. The unit selects grids of wells for measurement which will permit the preparation of accurate water level contour maps showing for the spring and fall of each year the depth to, elevations, and changes in water levels. These data will be published in a series of annual reports.

Many of the records have been established through co-operative programs and the unit plans to establish and extend co-operative programs wherever possible. Local agencies are encouraged to make the bulk of well measurements and assist in making well canvasses. For 1958-59 the proposed additional personnel will permit continued expansion necessary to extend collection of data to all ground water basins within a reasonable period of years, and preparation of records for machine processing of the data.

Assistant hydraulic engineer	(1)	\$6,360
Junior civil engineer	(1)	5,772
Total	2	\$12,132

Surface Water Unit

The surface water unit operates the stream gaging program for the department. This includes the Sacramento-San Joaquin

Water Supervision Program, stream gaging stations, flood flows and stages in the Central Valley and the Tule River diversions. A new part of the budget of this unit is the continuing program of operation and maintenance of stream gaging stations installed for specific investigations outside of the water supervision area. There are about 700 stream gages in operation in California of which 300 are operated by the United States Geological Survey, 300 by the State in co-operation with the United States Geological Survey, and 100 solely owned and operated by the State. 80 stations of this latter group are operated outside the water supervision area on behalf of the California Water Development Program. 6 new positions are required to operate additional gaging stations, 4 are provided for the diversion studies for the California water development, and 2 positions are budgeted to offset reductions by the United States Bureau of Reclamation joint federal-state program. The following additional positions are provided in the 1958-59 Budget:

Assistant civil engineer	(1)	\$6,360
Assistant hydraulic engineer	(5)	31,800
Junior civil engineer	(3)	17,316
Engineering aid II	(3)	13,536
Total	12	\$69,012

Meteorologic Unit

The meteorologic unit is engaged in the weather modification, snow survey and weather modification programs. The primary function of the unit is that of co-ordinating the efforts of many state, federal, local, and private agencies in the collection and publication of data. In addition the unit takes snow measurements in limited areas, and publishes forecasts of runoff 4 times annually between April and July for 15 points in Central and Northern California. This unit administers the Snowpack Management Program conducted in conjunction with the United States Department of Agriculture. This is a 5-year program started in 1956-57 and financed through the appropriation for work in co-operation with the Federal Government. 7 new positions are provided in 1958-59. 2 positions will be used to increase the weather bureau's field inspection and office support staff to aid the federal weather bureau to publish more climatologic data for California.

1 engineer is provided to handle the increase in workload and to pre-edit snow survey notes preparatory to machine processing. An engineering technician is provided to pre-edit weather data before machine processing and to assist generally with increased workload and 3 engineers are provided for increased workload in connection with the California Water Development Program, as follows:

Assistant hydraulic engineer	(1)	\$6,360
Junior civil engineer	(3)	17,316
Civil engineering technician	(2)	10,992
Key punch operator	(1)	3,540
Total	7	\$38,208

SPECIAL ACTIVITIES BRANCH

The Special Activities Branch is concerned with conducting engineering investigations and preparation of reports concerning activities that are not properly a part of the work of the other 2 branches of the division. Such activities are in part dictated by statute under various sections of the Water Code and specific

sections of federal statutes, and in part by the need to secure and analyze data necessary in a variety of special investigations, including work for the California-Nevada Interstate Compact Commission. The branch is divided organizationally into the following sections:

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

SPECIAL ACTIVITIES BRANCH—Continued

Water Quality Section

The activities of the Water Quality Section include federal co-operation and water analyses; investigations and formulation of plans for the reclamation of waste waters for beneficial uses; ground water studies and recommendations for minimum standards of well construction; investigations for the State and regional water pollution control boards; investigation of the quality of all water, including saline water, as related to sources of pollution; monitoring of surface and ground waters; and all water quality studies required in connection with water resources investigations undertaken by the department. The work program includes 3 major programs; statutory investigations, the southern Alameda salt water intrusion study, and the lower San Joaquin Valley water quality investigation.

18 new positions are provided in the budget as follows:

Associate hydraulic engineer.....	(2)	\$15,456
Assistant hydraulic engineer.....	(9)	57,230
Junior civil engineer.....	(1)	5,772
Engineering aid II.....	(5)	22,560
Total	18	\$101,018

7 additional positions are budgeted for services to other expanding programs including the California Water Development Program, design and construction of facilities, and basic data gathering units throughout the department. 3 positions are included for work on the Southern Alameda Salt Water Intrusion Study. The remaining 8 positions are for statutory investigations. These statutory investigations are basic data gathering programs relating to the investigation of water quality conducted under broad general authorization contained in Sections 229-231 and 13052 of the Water Code. These positions are for expanded programs in surface and ground water monitoring, waste water reclamation, well construction standards and municipal and industrial waste discharge. Much of this work is generated by increased demands for the California Water Development Program in all its investigations across the board. The monitoring program is being expanded to include radiological monitoring of ground water.

Special Investigations Section

The Special Investigations Section is concerned with engineering investigations which are broad in scope and which have as objectives making possible the orderly development of the State's water resources by promoting intrastate and interstate agreements on water rights, the determining of exportable water supplies from all watersheds of the State, and need for such supplies in areas of deficiency. An example of such investigations would be the work being done as requested by the 1956 Legislature to make an inventory by watershed of the quantities of water originating therein; the amounts needed in each watershed for use therein; and the amounts available for export. A further example would be the work done on trial distribution

of the waters of the Sacramento, Feather, and American Rivers, as well as the work being done for the intrastate compact commissions mentioned above. 2 additional positions are included for expansion in activities in the California Water Development Program in the areas of trial distribution and inventory of water resources.

Associate hydraulic engineer.....	(1)	\$7,728
Intermediate stenographer-clerk	(1)	3,540
Total	2	\$11,268

Engineering Reports and Review Section

The work of the Engineering Reports and Review Section involves the broad technical studies required by the department in acting on the numerous legal and engineering problems involved in representing the State in connection with operation and construction of the Central Valley Project and studies necessary in review of federal reports dealing with reclamation, flood control, and water conservation in California. Specifically, activities include analysis of construction plans and costs; preparation of an annual report on the status of the Central Valley Project containing recommendations to the Congress for appropriation of funds; and making operational studies to determine yields of water and power from the project. Reports review activities result in recommendations by the State as to water requirements, water supply, design, operation, cost estimates, and economic and financial feasibility of proposed federal projects. Similar review reports are required for projects proposed under the Small Watershed Protection Act, Public Law 566, and under the Small Reclamation Projects Act, Public Law 984. This section will also be involved in review of projects to be financed under Chapter 2052, Statutes of 1957, when activated. This section also discharges the department's obligation under the law to conduct studies as to the engineering and economic feasibility of proposed formation of irrigation districts, water storage districts, replenishment districts, resort districts, and other public districts. Also, this group conducts investigations required by law concerning operations of existing public districts, including inspection and supervision of construction activities of the various districts and preparation of reports of operations of all irrigation districts.

Workload increases are experienced in 1957-58 and projected for 1958-59 in review of reports for Corps of Engineers, Bureau of Reclamation, reports under the Watershed Protection Flood Prevention Act, Public Law 566, and Public Law 984. Increased workload is also found in connection with Central Valley Project studies, investigations of public water districts, and the California Water Development Program. 3 engineers are provided to cope with the increased workload.

Associate hydraulic engineer.....	(3)	\$23,184
-----------------------------------	-----	----------

PROJECT DEVELOPMENT BRANCH

The Project Development Branch is assigned responsibility for planning studies leading to authorization of project construction. Such responsibility includes investigation and planning under the California Water Development Program; work in connection with co-operative water resources investigations with local agencies; and a large number of other major studies being made at the specific direction of the Legislature. For purposes of organization, the branch is divided into the following sections:

Major Project Section

The Major Project Section is assigned responsibility for the investigation and development of plans for major water conservation projects in the North Coastal and Sacramento Valley areas. The work in each area has been assigned to a unit of the section. These projects will be designed to provide large quantities of water for transfer to areas of deficient supply within

the State. Investigation in each of the 2 areas will entail studies and designs to a greater and more detailed extent than those originally made in connection with the Feather River Project.

Local Projects Section

The Local Projects Section is assigned responsibility for 2 major functions, each of which is assigned to a unit. These units are: Local Projects Unit and Special Investigation Unit. Work of the Local Projects Unit includes investigation, planning and design of complete stream basin developments, particularly on those streams where the available water supply is not sufficient to provide surplus water for large-scale transfer between major hydrographic areas. The Special Investigation Unit conducts investigations and analyses, and prepares plans and reports on water resource investigations conducted in co-operation with local agencies.

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF RESOURCES PLANNING—Continued

PROJECT DEVELOPMENT BRANCH—Continued

California Aqueduct Section

The California Aqueduct Section is assigned responsibility for 3 major functions, each of which is assigned to a unit. The Salinity Control Barrier Unit is doing work which is a continuation of that initiated by the Abshire-Kelly Salinity Control Barrier Act of 1955. Work of the Co-ordinated Planning Unit includes detailed investigation and planning or works necessary for the large-scale transfer of water from areas of surplus in the north to areas of water deficiency in the south. This unit is undertaking staging studies necessary to the orderly development of the program. The order of development of projects is not described in Bulletin No. 3. Considerable continuing effort must be expended to introduce the elements of need and economics into the master plan, before it will be possible to predict the desirable order of project development. The desired program, as presently envisioned, constitutes a staging of water development projects as far into the future as adherence to realism will permit, with the timing of specific

projects dictated by need and relative economic justification. This branch is totally financed through the California Water Development Program. The budget increase in the branch is due to the expansion in the California Water Development Program. This program is shown and discussed in the other current expense section of the department's budget.

DEPARTMENT OF WATER RESOURCES—Continued

DIVISION OF DESIGN AND CONSTRUCTION

Objectives

The Division of Design and Construction has responsibility for performing the detailed engineering design for construction of all projects within the jurisdiction of the department, including the necessary surveys, geologic and materials investigation, and preparation of construction plans and specifications. Projects include those delegated to the department directly and those performed for other state agencies; flood damage repair; San Joaquin River Flood Control Project; coastal engineering; development projects for Division of Beaches and Parks or Department of Fish and Game; the operation of the Sacramento River Flood Control Projects, including the maintenance thereof, and water supply forecasting and flood hazard forecasting and warning.

Program and Performance

The Design Branch has responsibility for preparing detailed engineering designs, drawings, and plans and specifications for the construction of all projects within the jurisdiction of the department. At the present time, the major design project is the Feather River Project, and this work is being done by 4 sections within this branch—Dam Design Section, Aqueduct Section, Electrical and Mechanical Section, and Exploration Section. Other design work on other projects is performed by the Special Services Section within this branch.

The Dam Design Section is concerned with the study and investigation of alternate designs of all dams proposed for construction on the Feather River Project.

The Aqueduct Section is responsible for the design of the aqueduct portion of the Feather River Project from the intake at the Delta to the aqueduct terminus in Southern California. Structures include canals, siphons, bridges, buildings for housing the pumping plants, and other physical features involved in the aqueduct, except those for the motors and pumps at the pumping plants.

The Electrical and Mechanical Section handles the work involving design and preparation of drawings and specifications for all the electrical and mechanical equipment at the power plants and pumping plants for the Feather River Project.

The Exploration Section is concerned with all subsurface geologic investigations necessary to determine the design criteria for structures on the Feather River Project.

The Special Services Section has responsibility for the work not normally of a design nature, such as hydraulic studies, including model studies; collection and analyses of hydrologic data; planning and designing of miscellaneous structures for other state agencies for flood control, beach erosion control, navigation channel control, and related works; and preparation of construction plans and specifications therefor.

The Hydraulic Engineering Laboratory Branch embraces the physical and chemical testing of all materials in which the Department of Water Resources is interested. The work is divided among 3 sections, each of which is described as follows:

The Chemical Section makes the chemical, biochemical and biological analyses of water in connection with Statewide Water Quality Investigations and the determination of water quality as involved in numerous other studies conducted by the department.

The Concrete Section is responsible for the determination of concrete mixes and the testing of concrete aggregates, as well as determining the physical character of concrete.

The Materials and Soils Section carries on the work involved in making the laboratory tests, both structural and physical, of materials and soils as they affect projects under consideration for construction by the department.

The Project Administration Branch is involved in the acquisition of properties and of rights-of-way, relocation of facilities, bidding and award of contracts, and marketing of water and power made available by the Feather River Project. The branch is divided into 3 parts as described below:

The Contracts Administration Section has the responsibility for preparing final specifications; for prequalification of contractors; opening of bids; awards of contracts; contract changes; and progress payments.

The Surveys and Acquisition Section has the responsibility of preparing maps; performing necessary surveying; making rights-of-way locations; and negotiating for acquisition of all properties required for the highway and railroad relocations and for aqueduct line and reservoir sites.

The Marketing Section is concerned with the collecting and evaluating of data affecting the marketing of water and power. Analyses and recommendations are made of rates to be charged for various classes of water and power by areas which are based on ability of the market to absorb and ability of consumer to pay. Contracts for the sale of water and power will be negotiated by the staff in this section.

The Construction Branch has responsibility for actual construction of any project being built under the supervision of the department, except the Feather River Project. Until such time as a Division of Operations may be activated, the Construction Branch will also have the responsibility for such items as flood forecasting and water supply, supervision of flood control projects, and the installation of communications systems.

The Special Projects Section is charged with the responsibility of supervising the construction of special projects authorized by the Legislature or transferred from other departments pursuant to the State Contract Act, such as work of flood damage repair; San Joaquin River Flood Control; coastal engineering; and development projects for Division of Beaches and Parks or Department of Fish and Game.

The Flood Control Projects Section is responsible for the operation and maintenance of the Sacramento River Flood Control Project; the supervision of local agency maintenance of other flood control project works in accordance with federal regulations and state law; co-operation with the Corps of Engineers, State Reclamation Board, and local agencies regarding flood control projects maintenance; review of applications to Reclamation Board; Yuba River Debris Control Project co-operation; investigations and plans for operation and maintenance of the Sacramento River Flood Control Project; flood control features investigation for Bay Barrier and California Water Plan; and review of federal reports relating to flood control and co-operative studies for formulation of rules for multi-purpose reservoir operations.

Flood Control Projects Operations Section is concerned with water supply forecasting, flood hazard forecasting, and flood hazard warnings.

The Communications Section is organized for the purpose of designing and installing a communication system for use in flood forecasting and for use during flood emergencies. During the construction and subsequent operation of the Feather River Project, a communication network will be installed throughout the State for use in the operation of the project. The system will be designed, operated, and maintained by personnel within this section and within the State Division of Communications.

Under the engineering activities, there will be a need for 2 additional engineers to handle the increase in workload of Reclamation Board co-operative activities. There has been a marked increase in the number of applications in the past year for permits to the Reclamation Board for encroachments on flood control works which are investigated and inspected by the department. It is anticipated that there will be still further increases as presently authorized levee projects are completed in the next several years. An additional engineer will be required to do the routine work in connection with the processing of the flood damage applications as the claims move into court as well as other engineering work in connection with the maintenance and construction activity. An additional equipment operator is needed due to an increase in workload and equipment. The dispatcher-clerk and radio-telephone technician were added in 1957-58 and will be continued in 1958-59. The clerical positions are necessary due to expanded operations throughout the construction branch.

CALIFORNIA WATER DEVELOPMENT PROGRAM

SUMMARY

Objectives

The California Water Development Program is in an intensive and continuing program of study of the needs for specific local and statewide water development projects, analysis of their economic justification and financial feasibility, and determination of the recommended priority of their construction, using the California Water Plan as a general guide. It is believed such a program is necessary to enable the planning endeavor to keep pace with the needs of a rapidly growing State. As an example, the population of the State is increasing at a rate exceeding 500,000 per year. This increase demands the development of new sustaining supplies of water at the rate

of some 750,000 acre-feet per year. The authorized Feather River Project, if constructed and in operation at the present time, would have brought the developed water supply only abreast of the year 1953 water demands.

The California Water Development Program is of necessity a long-range program, wherein works will be recommended for construction when and as they are needed with due consideration to varying interests. The program, which was initiated in Fiscal Year 1956-57 is now only in its second year. This program was financed by a separate appropriation in its first 2 years separate and apart from the basic data gathering program in the Division of Resources Planning.

Program and Performance

MAJOR PROJECT SECTION

The work program of the Major Project Section for 1958-59 will be a continuation of the 5-year investigation of alternative export water development projects in the North Coastal area and in the Sacramento River Basin. This program will be complete in 1962. At that time the next major project, complement-

ing the Feather River Project, will have been defined and a report thereon will be submitted to the Legislature.

Preliminary investigation of the Eel and Klamath-Trinity River systems in the North Coastal area will soon determine

DEPARTMENT OF WATER RESOURCES—Continued

CALIFORNIA WATER DEVELOPMENT PROGRAM—Continued

SUMMARY—Continued

Program and Performance—Continued

MAJOR PROJECT SECTION—Continued

which of the 2 systems should be selected for detailed feasibility study.

In the Sacramento River Basin continued study will be concentrated on the comprehensive development of the Yuha and Bear Rivers pursuant to specific legislative direction under Chapter 296, Statutes of 1957.

In addition, a feasibility investigation will be initiated for development of the upper Sacramento River and its tributaries

between Shasta Dam and Red Bluff for both local and export purposes. Economic and engineering considerations may dictate a combination of works in this area and in the Yuha-Bear River Basins as the next logical major water development project in the Sacramento River Basin.

Anticipation of feasibility-type studies in the North Coastal area and Sacramento River Basin is reflected in this increased budget request for Fiscal Year 1958-59.

LOCAL PROJECT SECTION

During 1957-58, investigations will be completed of water conditions and proposed projects in the Upper Feather River Basin, Shasta County (co-operative), Klamath River Basin, Northeastern Counties, and Wilson Valley Dam (co-operative). 3 projects developed by this section in the Upper Feather River Basin Investigation were authorized by the 1957 Legislature as features of the Feather River Project.

Continuing investigations during 1958-59 consist of the Northeastern Counties Ground Water Investigation, second of 3 years; Shasta Valley, completion of 2 years; Upper Pit River Basin, writing and printing the results of a 1-year study; Calaveras-Stanislaus Basin, second of 5 years; Cache Creek

Basin, second of 3 years; and Mariposa area, second of 3 years.

2 new investigations are contemplated in the 1958-59 Budget at the request of local interests—Tuolumne County Co-operative and Tule River Basin Co-operative—and work will commence on these studies if state funds are matched by the interests involved. In addition, a study of the Branscomb Project on the South Fork of the Eel River will be initiated to determine its potential for development of water for fish, wildlife, and recreation purposes. House Resolution No. 296 (1957) requested that investigation of the Branscomb site under the California Water Development Program be expedited.

CALIFORNIA AQUEDUCT SECTION

The California Aqueduct Section is presently concerned primarily with planning in areas of water deficiency. In 1958-59 the major effort of this section will be concentrated in the San Joaquin Valley and Sacramento-San Joaquin Delta. The specific studies are reflected in the units comprising this section, namely, the Salinity Control Barrier Unit, San Joaquin Valley Drainage Unit, and Co-ordinated Planning Unit. This section also has responsibility for technical supervision of the Feather River Project Alternative Route studies being conducted by the Southern California District Office.

Salinity Control Barrier Unit. This unit is conducting the current investigation of salinity control barriers as authorized by the Ahshire-Kelly Salinity Control Barrier Act of 1955, Chapter 1434, Statutes of 1955, which is a continuation of the investigation initiated by the Water Project Authority of California pursuant to Chapter 1104, Statutes of 1953.

The conclusions reached between July, 1955, and March, 1957, were published in Department of Water Resources Bulletin No. 60 entitled "Salinity Control Barrier Investigation." Subsequently, Senate Bill No. 2212 was passed by the Legislature, approved by the Governor, and became Chapter 2092, Statutes of 1957. This act, known as the Ahshire-Kelly Salinity Control Barrier Act of 1957, authorized the department to limit its future studies of salinity control barriers to the Biemond Plan.

During 1957-58 the majority of the field work on the Biemond Plan will be completed, and the design studies will be intensified. The work during Fiscal Year 1958-59 will consist primarily of office studies to complete the design of the proposed facilities, determine the economic justification of the Biemond Plan and its financial feasibility. A portion of the time will be expended in preparation of a preliminary draft of a final report, public hearings thereon, and preparation and publication of the final edition.

San Joaquin Valley Drainage Unit. This unit will be conducting the second of a 4-year investigation of drainage practices, problems, and solutions in the San Joaquin Valley. In recognition of such drainage problems, a 2-part investigation will be carried forward in Fiscal Year 1958-59.

Under the first part of the investigation ultimate relief from drainage problems in the San Joaquin Valley will require formation of a detailed master drainage plan for the valley. This will involve review of the studies made for Bulletin No. 3, and other related works, especially recent works of the United States Geological Survey. Following such review, a comprehensive study of all factors relating to drainage of the valley will be made, to establish the location and details of the master drain as it should ultimately be constructed.

Evidence has shown conclusively that adverse drainage and water quality degradation conditions in that area of the San Joaquin Valley west of the San Joaquin River between Mendota and Tracy are now seriously impairing agricultural production, forcing changes in crop patterns, and generally impairing the economy of the area. The situation is steadily growing worse and is approaching a crisis.

Therefore, an intensified program, designated the second part of the investigation, will be maintained in this area to determine the need for drainage and to design necessary works which would fit into the master drain plan. This phase of the investigation would also include design of works, economic studies to determine feasibility and staging, financing proposals, and other studies leading to recommendations for construction of specific projects, if such projects are found feasible. An interim report of this investigation is scheduled for publication in the latter part of Fiscal Year 1958-59.

Co-ordinated Planning Unit. This unit is responsible for studies and planning which will ultimately affect the direction and timing of all future investigations and construction proposals of the Department of Water Resources.

The order of development of projects is not described in Bulletin No. 3. Considerable continuing effort must be expended to introduce the elements of need and economics into the master plan, before it will be possible to predict the desirable order of project development. The establishment of such a project timetable is the long-range objective and major responsibility of the Co-ordinated Planning Unit.

The desired program, as presently envisioned, constitutes a staging of water development projects as far into the future as adherence to realism will permit, with the timing of specific projects dictated by need and relative economic justification. The Governor and various State Legislators have requested such a phased program, covering the next 15 to 20 years, for use in estimating state financing requirements.

Furthermore, the work program of the Co-ordinated Planning Unit during 1958-59 will include necessary and specific continuing investigations of water marketing, Central Valley operations, ground water operations, aqueduct planning, project design, cost allocation and project justification, and staging and programming.

Incidental to its major work there will be continued a delegation of responsibility to the unit to keep abreast of developments on the Colorado River, and to assist the Colorado River Board and the State Department of Justice in the preparation of engineering testimony for use in the United States Supreme Court case, Arizona vs. California.

Program and Performance—Continued

OTHER INVESTIGATIONS

The following investigations are associated with the California Water Development Program but are, and will be, prosecuted by sections of the Special Activities Branch of the Division of Resources Planning.

Work of the *Trial Distribution Investigation* is divided into 2 parts—the Sacramento River Trial Distribution and the Feather and American Rivers Trial Distribution program.

It is anticipated that the negotiation of an agreement among water users along the Sacramento River and the Delta will extend into the 1958-59 Fiscal Year. State personnel will probably be called upon to take a leading part in these negotiations by supplying supplemental information, and to advise the negotiators concerning the engineering and legal matters pertaining to the points at issue. In addition to the services of the staff as just outlined, it is believed essential that the continuity of hydrographic records be provided for furtherance of the agreement.

The Feather and American Rivers Trial Distribution program was commenced in 1956. In 1958-59, detailed information on water rights of water users along the Feather River will be obtained so as to bring that information up to the level of data now available for water users along the Sacramento River. Analyses of the effect of water right assumptions will be made to present the basis for agreements among the water users along the Feather and American Rivers for agreements between these water users and the operators of existing or proposed federal and state projects concerning rights to natural flows and supplemental waters to be purchased from such projects.

Objective of the *Southern Alameda Salt Water Intrusion Study* is to make a comprehensive investigation of salt water intrusion conditions in southern Alameda County. In the fall of 1956, an area of 2,830 acres of the main water-producing zone in the vicinity of Fremont showed excessively high chloride, and indications are that the area is progressively increasing. This study was initiated in 1957-58 under Item 263 of the budget, and during 1957-58 basic data was collected and in-

vestigations were made of methods of obtaining well measurements.

During the second year (1958-59) of this 2-year study, particular attention will be given to detailed evaluation of the various factors which may be causing these increases in chloride concentrations, and, where pertinent, to recommend remedial measures required to protect this valuable underground resource.

The *Inventory of Water Resources* was initiated as authorized by Chapter 61, Statutes of 1956 (First Extraordinary Session), which directed that investigations be made of boundaries of watersheds, quantities of water originating in each, amounts of water required for beneficial use in each, and the amounts of water, if any, available for export, and areas which could be served.

Work to date has consisted primarily of collection and assembly of data on present and historical water use and field surveys of land classification and present land use in the Tule River, Trinity River, and Yuba-Bear Rivers Hydrographic Units. These data will be included in reports to be prepared in the near future for each of the hydrographic units named. Work has been initiated on detailed water supply and water requirement studies, the results of which will be published in reports on each major hydrographic area of the State.

Work during 1958-59 will consist of completion of water utilization and land classification reports on the Yuba-Bear Rivers, Eel River, Mad River-Redwood Creek, Klamath River, Smith River, and Shasta-Scott Valleys Hydrographic Units; and preliminary work on the water supply and water requirements report on the North Coastal area. It is presently contemplated that all reports will be completed for North Coastal area by 1962, Northern Lahontan area by 1963, Sacramento River Basin by 1964, San Joaquin River Basin by 1966, Tulare Lake Basin by 1968, Central Coastal area by 1969, and San Francisco Bay area by 1970. No schedule has been established for the South Coastal, Colorado Desert, or Southern Lahontan areas.

WORK IN CO-OPERATION WITH FEDERAL GOVERNMENT

Objectives

Through the Department of Water Resources, the State participates co-operatively with agencies of the Federal Government in various activities directed toward the accomplishment of mutual interest and to develop solutions to problems in which there is a common concern. State funds are matched by the expenditure of equal or greater amounts by agencies of the Federal Government.

Program and Performance

The program proposed for the 1958-59 Fiscal Year includes provision of the continuation of activities now in progress at approximately the same level as authorized for the current year. In general there will be an increase in stream gaging by the United States Geological Survey, and increased subsidence studies. Topographic mapping and the Yuba River Debris Control are continuing at about the same level of operation. The increase amount for mapping represent higher costs for the Federal Government.

Of the \$112,500 budgeted for investigation in the San Joaquin Valley, \$55,000 has been provided for subsidence investigations. These investigations will be continued in general accordance with the program prepared by the Interagency Committee on Land Subsidence in the San Joaquin Valley.

The funds being budgeted are to be used to complete field work on the major subsidence investigation in the Los Banos-Kettleman City area and to arrive at preliminary findings on the causes and rates of subsidence and possible methods of alleviation. Also planned is the partial preparation of an overall report on subsidence in the area. Certain field observations will be continued beyond the 1958-59 Fiscal Year, such as periodic releveling for vertical control operation of subsidence records attached to deep bench marks, and measurement of water level fluctuations.

For the Tulare-Wasco and Arvin-Maricopa subsidence, funds budgeted for 1958-59 will permit field studies to be carried ahead, with formulation of some preliminary findings by the end of the 1958-59 Fiscal Year. \$45,000 of the \$112,500 will be used

for water development studies. Work will be expanded in the Ducor-Famoso area westward across the San Joaquin Valley to adjoin work done in the Avenal-McKettick area, work in the Edison-Maricopa area is to continue at the same rate. The remaining \$12,000 will be spent for the basic data and observation well program in the desert area. This provides for a slight increase in activity due to the expansion of the observation well set.

The specific yield studies are needed to improve the estimates of storage capacity of California ground water basin. The program was begun in 1957-58 and is being expanded in 1958-59. Current estimates of storage capacity used in the bulletins on the California Water Plan are based on well log examination and the assignment of specific yield values derived from an earlier work in the South Coastal Basin and in the Mokelumne area.

\$10,000 is appropriated for further development on ultrasonic device for the measurement of stream discharge and velocities. \$25,000 was appropriated last year. Other contributors to the development of the device are the United States Geological Survey and the United States Corps of Engineers.

Mechanical methods of securing these data have apparently reached the peak of development and show little promise for the solution of problems for which they have not yet been adapted. The development of an ultrasonic instrument would provide more accurate results than can now be obtained and make possible the continuous measurement of stream flow under conditions which prevent such measurements with existing equipment.

The 1958-59 Fiscal Year will be the third year of the 5-year research program in snowpack management conducted in co-operation with the United States Department of Agriculture. These studies have as their objective developing and testing ways of conserving the State's water supply through management of the mountain snowpack. About 40 percent of the State's stream flow comes from a belt of 9,000,000 acres of high elevation forest land of which snowpacks lie deep in winter and spring. This research ties in closely with the current activities of the Department of Water Resources and is co-ordinated with statewide studies for full conservation development of water resources.

Expenditures by Project

Restore and maintain debris control work in the Yuba River in co-operation with the United States Army Engineers	\$15,000	\$100,000	\$100,000
Topographic mapping in co-operation with the United States Geological Survey	300,000	314,380	345,000
Investigation of the use, transpiration, evaporation, and percolation of irrigation water in co-operation with the Soil Conservation Service, United States Department of Agriculture	15,000	15,830	15,830
Stream gaging in co-operation with the United States Geological Survey to obtain data on water supply, runoff and diversions on streams not otherwise covered by this department	178,975	205,040	274,095

GENERAL ANALYSIS

Objectives

The State Water Rights Board is charged with sole responsibility for administration of the following programs outlined in Division 2 of the Water Resources Code:

1. The appropriation of unappropriated water through the permit and license procedure;

2. Assistance to the courts and parties in adjudication of water rights;

3. Administration of the recordation of data relating primarily to use of ground water in the counties of Riverside, San Bernardino, Los Angeles, Ventura, and Santa Barbara;

4. Administration of the act which authorizes the use of water from a nontributary source without loss of an existing right to ground water by failure to use the water. This act is also restricted in operation to designated counties of Southern California and consists of registration of notices only.

Program and Performance

The 1956-57 Fiscal Year was mainly given over to setting the board into operation as a new agency on the creation of the board and the Department of Water Resources in July, 1956. Dividing staff and finances between the department and the board created an obstacle to adequate organization but steps were taken to correct this situation through a reorganization of the staff in August, 1957. At that time a hearing unit and an executive officer position were established.

In 1956-57 the board held major water rights hearings pertaining to Putah Creek, American River, United-Calleguas Water Conservation Districts, and the Cashman Project of the United States Bureau of Reclamation on the Santa Ynez River.

During 1957-58 the board has held hearings on the Santa Margarita River, Bear River, Arroyo del Valle, Coastside Water District, Oroville-Wyandotte Irrigation District, and Yuba County interests, and proposes to hold hearings on the San Joaquin River, Calaveras River, Stampede Project, on the Little

Truckee River, Humboldt Municipal Utility District on the Mad River, Tule River, and Clear Lake.

During the 1958-59 year it is expected that hearings will be held on Sacramento River and Delta, Yuba River, Feather River, Russian River, Kings River, Kaweah River, and Tulare Lake in 1958-59.

Legislative action in the 1957 General Session effected changes in the board's handling of fees; provided authority for the board to supervise trial distribution of water; authorized the board to take final action by majority vote rather than by unanimous vote; and, provided a deficiency appropriation of \$121,500 for support.

On June 30, 1957, there were 8,303 active water right files in the board's custody including 3,917 active licenses, 3,048 active permits, and 1,338 pending applications.

From July 5, 1956, to June 30, 1957, the activities of the State Water Rights Board concerning appropriations of water may be summarized as follows:

Applications received -----	530
Permits issued -----	302
Licenses issued -----	241
Applications canceled -----	81
Permits and licenses revoked -----	120
Orders allowing changes in points of diversion, place, and purpose of use -----	79
Decisions rendered (involving 34 applications) -----	22

The 1958-59 Budget includes 7 new engineering positions and 4 related clerical positions. 2 senior hydraulic engineers and 1 associate engineering geologist are necessary to fulfill the new organization requirements and workload. 1 associate hydraulic engineer and 1 clerk are positions approved by the Legislature in 1957 on a 1-year basis and are needed on a permanent basis now because of workload. 3 engineers are proposed on the basis of workload in the Application Processing and Hearing units.

GENERAL ANALYSIS

Objectives

Co-operates with the Corps of Engineers, United States Army, in construction of flood control projects through the acquisition of rights-of-way for such projects; acts as governing body for the Sacramento and San Joaquin Drainage District; approves construction on levee systems and flood channels; and fulfills such construction obligations as have been assumed by the State in its agreement with the Federal Government.

Program and Performance

The agency program involves work on several projects summarized as follows:

Sacramento River Flood Control Project:

The Sacramento River Flood Control Project is divided into two parts: that relating to the works authorized prior to 1941 which is called the "Old Sacramento River Flood Control Project" and work authorized subsequent to 1941 referred to as "Major and Minor Tributaries."

A. Old Sacramento River Flood Control Project

Since the signing of the Memorandum of Understanding in November, 1953, between the Corps of Engineers and the board, the federal construction program upon the so-called "Old Sacramento River Flood Control Project" has been stepped up to assure the rapid completion of the work outlined in the Memorandum of Understanding.

There is presently under negotiation a modification of the Memorandum of Understanding which will provide for approximately \$8,000,000 of additional work. While this additional work will not be accomplished during the next fiscal year, it indicates that a continued high level of activity can be anticipated on the Old Sacramento River Project. \$2,000,000 is included in state funds for this project in the capital outlay budget for 1958-59.

B. Major and Minor Tributaries

The current work upon this project involves the construction of levees and channels on the minor tributaries of the Sacramento River where there are few, if any, flood control works. State experience in acquiring right-of-way for the project units on these small tributaries has indicated that a greater amount of right-of-way is necessary than on some of the larger streams, such as the Sacramento and Feather Rivers where there are existing flood control works. One of the major units of work anticipated upon this project will involve levee construction through the City of Chico and will include 150 to 200 parcels of subdivided land and the relocation of numerous buildings. It is anticipated that plans for this project unit will be transmitted to the agency in the spring of 1959 and that right-of-way clearance will be required by the fall of that year. This particular unit of work appears to be one of the largest single units ever handled by the Reclamation Board. No new appropriations are proposed in the 1958-59 Budget for this project.

Lower San Joaquin Project:

The state authorization for the Lower San Joaquin River Project is contained in Section 12651 of the Water Code and includes the lower San Joaquin River and tributaries and the Tuolumne and Stanislaus Rivers. For administrative purposes the project has been divided into 2 parts: the Upper Project which is from the mouth of the Merced River to Friant Dam and the Lower Project which is downstream from the mouth of the Merced River.

The Capital Outlay budget request of the board included \$1,700,000 for this project of which \$700,000 was for the Lower Project and has been included in the budget. The State has

been advised by the Corps of Engineers that its construction program on this project for the 1958-59 Fiscal Year will involve the construction of new levees of both the east and west banks of the San Joaquin River from the mouth of the Merced River downstream to the Tuolumne River. This will require approximately 35 miles of right-of-way. The balance of \$1,000,000 was for the Upper Project and has not been included in the budget pending legislative clarification of the Levee District Act (Chapter 1075, Statutes of 1955, as amended by Chapter 1028, Statutes of 1957). The Attorney General in an informal opinion raises the question as to whether the act in its present form is sufficient to protect the State against potential damages. The budget proposes the continued availability of the \$2,350,000 appropriated by Item 419 of the Budget Act of 1957, for the Upper Project.

Middle Creek:

Project plans have been completed and the Corps has requested right-of-way clearance for the entire project by June, 1958. Preliminary surveys indicate that between 75 and 100 parcels of right-of-way must be acquired for this project. This substantial right-of-way burden is considerably beyond that originally anticipated for this project in the current fiscal year. The 1958-59 Capital Outlay budget includes \$450,000 in state funds for this project.

Claims for Flood Damage:

There are now approximately \$68,000,000 worth of claims on file against the State, of which approximately \$23,000,000 are for damages resulting from the floods of 1955-56, and \$45,000,000 are for gas and oil claims in the vicinity of Rio Vista. Included in the operating expenses is an amount of \$50,000 to finance work in connection with the prosecution of claims against the State relating to the floods of 1955 and 1956. Most of this work for 1956-57 and 1957-58 was financed from the Flood Control Fund of 1946, and inasmuch as the ultimate financing would be the General Fund, it is better to include this program as a specific line item in the support budget. The Attorney General anticipates that the litigation involved may reach trial stage during Fiscal Year 1958-59, but, in any event, will not be settled prior to that fiscal year.

In order to carry on its activities in connection with these projects it has been necessary to add 2 engineers and 1 appraiser in 1957-58 to be continued as proposed new positions in 1958-59. These positions plus supporting clerical help are necessary to handle increased load in acquisitions and increased workload in engineering. In addition the positions will strengthen the organization.

It is anticipated that the agency will have to acquire between 300 and 350 parcels of right-of-way during the current year. Approximately 350 parcels of right-of-way will have to be acquired during Fiscal Year 1958-59. The agency currently has approximately a 6 months' backlog of right-of-way acquisition and is faced with an increasing backlog unless additional personnel is provided.

Of interest is the fact that during the period 1946-1953, this agency secured right-of-way for 3 or 4 construction units each year, while it is currently securing right-of-way for approximately 11 construction units per year.

The agency is continuing to receive an increased number of applications for the installation of works affecting flood control structures within its jurisdiction. It is also continuing in its program of completing a land inventory. This land inventory program has been slowed down in order to free engineering personnel, normally assigned to that program, for use in connection with right-of-way acquisition.

GENERAL ANALYSIS

Objectives

The Colorado River Board was created by Chapter S3S, Statutes of 1937, for the purpose of protecting California's rights pertaining to the Colorado River. The board and its staff collect, compile and analyze engineering and legal data on the existing and proposed utilization of the Colorado River water supply, appear before congressional committees and interested federal agencies, and confer with representatives of other Colorado River Basin states regarding legislation and developments affecting California's rights and interests.

Program and Performance

The board comprises 6 members appointed by the Governor representing 1 of the 6 agencies having rights to the use of water or power from the Colorado River. The 6 agencies are the Metropolitan Water District of Southern California, Department of Water and Power, City of Los Angeles, San Diego County Water Authority, Imperial Irrigation District, Coachella Valley County Water District, and Palo Verde Irrigation District.

Major phases of the board's work program as anticipated for the current fiscal year and the Fiscal Year 1958-59 are summarized as follows:

1. Preparation of legal and engineering material for appearances before congressional committees and for conferences with interested federal agencies regarding legislation pending before the Congress affecting California's rights and interests on the Colorado River.

2. Exhaustive study of reports on proposed projects for development, control and utilization of water of the Colorado River system; analysis of engineering and financial aspects as required; and preparation of views and recommendations.

3. Collection, compilation and analysis of all available basic information on the water supply of the Colorado River system and present and future use thereof, with a view to ultimate determination of: the longtime average water supply available for beneficial use, and unit rates and total requirements of beneficial consumptive use of water in agricultural, industrial, domestic and municipal purposes.

4. Collection and study of repayment and crop data on existing and proposed developments.

5. Detailed analysis of the operations of existing and proposed projects to determine their effects upon the water supply available to the Lower Basin and upon the rights of California.

6. Studies relating to the legal and engineering aspects of the administration of the Upper Colorado River Basin Compact, Mexican Water Treaty, Colorado River Storage Project Act, and other relevant statutes, regulations and court decrees.

7. With the Attorney General and his staff as legal counsel the board assists in the planning, prosecution and presentation of legal and engineering studies and research needed in connection with making the most effective preparation for defense of the suit, Arizona vs. California, et al., now pending before the United States Supreme Court, and participation in trial proceedings before the special master appointed by the court. It is anticipated that California's presentation will be made during the current fiscal year, and costs will decrease for special consultants and travel during 1958-59.

GENERAL ANALYSIS

Objectives

The major purposes of this compact are, with respect to the water resources of the Klamath River Basin:

A. To facilitate and promote the orderly, integrated and comprehensive development, use, conservation and control thereof for various purposes, including, among others: the use of water for domestic purposes; the development of lands by irrigation and other means; the protection and enhancement of fish, wild-life and recreational resources; the use of water for industrial purposes and hydroelectric power production; and the use and control of water for navigation and flood prevention.

B. To further intergovernmental co-operation and comity with respect to these resources and programs for their use and development and to remove causes of present and future controversies by providing (1) for equitable distribution and use of

water among the two states and the Federal Government, (2) for preferential rights to the use of water after the effective date of this compact for the anticipated ultimate requirements for domestic and irrigation purposes in the Upper Klamath River Basin in Oregon and California, and (3) for prescribed relationships between beneficial uses of water as a practicable means of accomplishing such distribution and use.

Program and Performance

This commission, created by Chapter 113, Statutes of 1957, has one-half of its expense funded by the State of Oregon. 2 part-time positions are provided, sufficient only to handle the routine work connected with arrangements for meetings and publication of the record.

^a Composed of savings in salaries and wages, \$7,557; operating expenses, \$28,206; and equipment, \$383.

^b Composed of savings in operating expenses, \$2,660; and equipment, \$175.

GENERAL ANALYSIS

Objectives

Program and Performance

This commission was created by Chapter 1473, Statutes of 1953, for the purpose of co-operating with a similar commission representing the State of Oregon in formulating and submitting to the legislatures of both states, for their approval, an inter-state compact relative to the distribution and use of the waters of the Klamath River.

A compact has been formulated and presented to the legislatures of the respective states for their approval. Ratification of the compact was completed by both states on April 17, 1957, and consent of the United States was received on August 30, 1957. The Klamath River Basin Compact became effective on September 11, 1957.

By terms of California's ratification act the Klamath River Commission of the State of California was abolished effective September 11, 1957.

GENERAL ANALYSIS

Objectives

The state board formulates statewide policy for control of water pollution, administers statewide programs of research, and reviews actions of the regional boards. The 9 regional boards have 3 principal responsibilities: to formulate and adopt long-range plans and policies for abatement and prevention of water pollution; prescribe and enforce discharge requirements; and co-ordinate the interests of other agencies. They also recommend projects needing financial assistance.

Program and Performance

Continuation of the current level of program is provided for in 1958-59. A budget planning program will be initiated during 1958-59 leading to a long-range program from the agency. Collection of statistics on discharge requirements has been initiated

during 1957-58 and should provide this information for the next budget.

The agency administers the federal grant program for the construction of sewage facilities at the local level under Public Law 660. The boards in the 1956-57 Fiscal Year began processing applications from communities for federal grants for sewage treatment works construction. Grants are limited to 30 percent of the cost of the project or \$250,000 (whichever is smaller) and at least half of the funds must go to municipalities of 125,000 population or less. Annual allocations to California have been slightly more than \$2,000,000 while requested grants have totaled about \$8,000,000 each year. In 1956-57, available funds were sufficient for 24 grants from 81 applications, and in 1957-58 about 16 grants could be made from 64 applications. Water pollution control needs are determined by the regional boards, and financial needs evaluated by the state board. Actual grants are made by the United States Public Health Service upon certification of overall priority as set by the state board.

RESEARCH IN TECHNICAL PHASES OF WATER POLLUTION CONTROL

Objectives

A basic research program is carried on to provide technical data to assist the boards to properly discharge their responsibilities under the law.

Program and Performance

This research is carried out through special projects under contractual arrangements with various organizations.

The research program was expanded in 1956-57 using federal funds under Public Law 660. The State level support is to continue the basic program. In 1956-57 a 3-year investigation of waste water reclamation and utilization was completed and the final report printed.

Completed studies and investigations of pollution of the Sacramento River between Keswick Dam and Redding isolated causes of fish mortality and provided the basis for corrective action.

Beginning in 1956-57 greatest emphasis has been placed on research in the field of submarine outfall disposal of sewage

and sludge. Previous research dealt with inland waste disposal. The largest project currently in operation is an oceanographic survey of the continental shelf area of Southern California. This study, conducted by the University of Southern California Hancock Foundation, will obtain biological, chemical, and physical data of representative marine areas in relation to waste discharges.

In the 1957-58 Fiscal Year 3 oceanographic studies were initiated. 1 contract with the University of California Institute of Marine Resources is for the determination of the effect of wastes upon kelp, and is co-ordinated with the kelp studies of the Department of Fish and Game. A north coastal investigation was initiated in representative marine areas unaffected by waste discharges at the present time, but subject to future contamination. The third project is a study of oily substances on Southern California beaches and inshore waters, particularly in the areas of natural seeps. Continuation of the Southern California and north coastal oceanographic studies, and the kelp studies, is planned for 1958-59.

Development of current meters suitable for the measurement of relatively weak ocean currents is scheduled to begin in the 1958-59 Fiscal Year.

OPERATING EXPENSES

Investigation of waste water reclamation and utilization-----	\$25,000	-	-
Studies and investigations of pollution of the Sacramento River between the City of Redding and Keswick Dam-----	4,428	\$3,885	-
Submarine outfall surveys and research-----	106,000	193,620	\$192,000
Investigation of pollution by leaching from dumps-----	-	4,000	-
Totals, Research in Technical Phases of Water Pollution Control -----	\$135,428	\$201,505	\$192,000

FIELD AND LABORATORY SERVICES BY OTHER AGENCIES

Program and Performance

To prevent duplication or overlapping activities, necessary field and laboratory work is performed by state and other agencies best qualified to render the required technical services. Such service consists of studies of the pollution effects of sewage and industrial wastes; providing technical information necessary for

prescribing and checking discharge requirements; determining effects of drainage wells, dumps, and other wastes on ground waters; and special investigations as required.

The special investigation program is increased in the 1958-59 Fiscal Year to carry out expanded monitoring and enforcing of discharge regulations.

30	GENERAL ANALYSIS			
31				
32	Support for the Division of Small Craft Harbors, Department of Natural Resources, is provided from the Small Craft Harbors			
33	Revolving Fund. During the budget year it is proposed to transfer sufficient funds from the State Lands Act Fund to supplement			
34	the balances in the revolving fund available for support of this division. The amount to be appropriated is the difference between			
35	estimated support and funds available for support in the revolving fund after financing the current year expenditure program.			
36	Continuation of the program of loans to local agencies for planning of small craft harbors is contingent upon additional funds being			
37	made available. This loan program for planning purposes is a responsibility of the Division of Small Craft Harbors. The initial			
38	allocation of funds for planning loans made by Chapter 2375, Statutes of 1957, is estimated to be obligated during the current			
39	year. The additional funds provided in the budget year will permit continuation of a limited program of loans for planning.			
40	Item 279 of the Budget Act of 1957 appropriated \$500,000 for the augmentation of the Purchasing Revolving Fund to provide for the			
41	purchase of additional automotive equipment for use by the State Automotive Pool. The increased activities of agencies using the			
42	services of the pool require the purchase of more equipment which would otherwise have been budgeted in various agencies. How-			
43	ever, since it is possible to postpone the purchase of a portion of the automobiles until 1958-59 provision is made for extending the			
44	availability of this item for later allocation. Provision is also made for the return of the funds advanced when no longer required.

GENERAL ANALYSIS

Under the pay plan adopted by the State Personnel Board, salary ranges of state employees usually are established with intermediate steps at intervals 5 percent above the previous rate. Under Section 18854 of the Government Code, such employees receive an increase of one 5 percent step each year until they reach the maximum rate of the salary range established for the position. These merit salary adjustments are explained in greater detail on pages 3 through 5 of the Budget Supplement of Authorized Salaries and Wages, which also describes position titles and numbers, salary ranges, and authorized positions.

In determining appropriate salary levels, the following factors are considered by the State Personnel Board:

1. Rates of pay of private employers and of other public jurisdictions for comparable work.
2. Internal consistency of rates; equal pay for equal work; and pay differentials based on differences in the kind, difficulty, and responsibility of the work.
3. Conditions of work in the class.
4. Adequacy of existing appropriations which may be used for salary increase purposes.

Based on the above criteria, State Personnel Board salary surveys are conducted semiannually to determine the State's relative position to comparable employment, and from such surveys, a recommendation is made to the Governor of salary needs for budgetary consideration. For the 1958-59 Fiscal Year, the State Personnel Board has recommended that funds be provided for a general salary increase of approximately 3 percent, and in addition that \$250,000 be made available from the General Fund for special salary adjustments. A comparable amount is provided for employees paid from special funds, for the University of California, and for those whose salary is set by other than the State Personnel Board.

^a See list of allocations in the budget for Reserve for Contingencies.

^b Savings due to use of excess salary savings in lieu of allocations from the Salary Increase Fund.

^c Executive orders are issued by the Department of Finance to augment legislative appropriations from special funds in the amount required to provide for salary increases in accordance with the provisions of the Budget Act. Executive orders are not required from those funds with fixed or continuing appropriations. The amount for 1958-59 includes the estimated requirements from salary increase authorizations and from fixed and continuing appropriations.

^d Federal, trust and other funds are excluded from overall budget totals.

12	GENERAL ANALYSIS				
13					
14	Objectives				
15					
16	To pay interest and redemption charges on general obligation bonds.				
17					
18	Program and Performance				
19					
20	The State Construction Program Bond Act of 1955 provides for the issuance of bonds to finance major building construction, equip-				
21	ment and site acquisition needs for the departments of the State Government which are financed primarily from general revenues.				
22	The first sale of bonds in the amount of \$30,000,000 is scheduled to occur in May 1958, with a second sale scheduled to occur in				
23	November 1958, for an amount of \$25,000,000. The interest cost from these bond sales will be due in the 1958-59 Fiscal Year.				
24	Subsequent sales of \$30,000,000 in February and May 1959, will have interest and redemption costs in the following fiscal years.				
25	Interest and redemption charges on highway bonds are withheld from motor vehicle license fee revenues.				
26	Interest and redemption charges on bonds issued for construction of state and university buildings, and for acquisition of areas for				
27	state park purposes were met from funds which were set aside from General Fund surplus, and placed in the Bond Sinking				
28	Fund of 1943. Sufficient funds were set aside to meet all debt service requirements to final maturity; however, \$5,000,000 was				
29	transferred to the Highway Fund to be used as a loan to the Golden Gate Bridge and Highway District, to be returned out of				
30	toll revenues after the bonded indebtedness of the district is retired in 1971. Interest on the \$5,000,000 loan shall be paid to the				
31	General Fund at a rate not to exceed 2 percent per year when the loan is repaid by the State Highway Fund in accordance with				
32	Chapter 1505, Statutes of 1945. Available funds to meet bond obligations in the Bond Sinking Fund of 1943, were exhausted				
33	during the 1956-57 Fiscal Year and are currently paid by the General Fund.				
34	There has been transferred to the State Buildings Interest and Sinking Fund sufficient money to retire the outstanding Sacramento				
35	State Building Bonds, which will become due in 1965. These moneys have earned interest which provides excess money in the				
36	fund. It is proposed to transfer this excess to the General Fund.				
37	Debt service charges on school building bonds are considered as assistance to local units of government and are reported under the				
38	Local Assistance Budget, Subventions for Education.				
39	These debt service charges do not include charges on bonds issued for construction at the San Francisco Harbor or charges on bonds				
40	issued for the veterans' farm and home loan program. They are general obligations bonds; however, the charges are primarily the				
41	obligations of, and are paid from, the respective utility funds. The activity of these funds are reported in the appendix section				
42	of the budget.

STATE BUILDING PROGRAM

SUMMARY OF PROPOSED NEW CAPITAL OUTLAY APPROPRIATIONS FOR 1958-59

LINE	AGENCY AND PROJECT	PROPOSED NEW APPROPRIATIONS		
		FROM CAPITAL OUTLAY AND SAVINGS FUND	FROM STATE CONSTRUCTION PROGRAM FUND	FROM OTHER FUNDS
1	The following table summarizes the proposed new appropriations for the 1958-59 Fiscal Year for the State Building Program by departments. Detailed explanation and description of each project is contained in the following agency detail budgets.			
2				
3				
4	Department of Agriculture:			
5	Plant quarantine station—site acquisition	\$4,500	—	—
6	Construct and equip plant quarantine station—Twentynine Palms	750	\$283,600	—
7	Construct and equip plant quarantine station—Truckee	750	83,900	—
8				
9	Totals, Department of Agriculture	\$6,000	\$367,500	—
10				
11	Department of Corrections:			
12	Men's Colony:			
13	Site acquisition	\$5,000	—	—
14	New medium security facility (partial cost)	—	\$4,684,433	—
15	New medium security facility (partial cost)	—	5,941,600	—
16	Institution for Men:			
17	Reception-guidance center addition	—	1,612,700	—
18	Dairy facilities (partial cost)	—	362,200	—
19	Additional sewage facilities	—	194,300	—
20	Hospital	—	1,679,700	—
21	Additional laundry facilities	—	555,770	—
22	Equip laundry addition	10,760	—	—
23	Equip bakery addition	20,500	—	—
24	State Prison at Folsom:			
25	Honor dormitory additions	—	283,072	—
26	Equip honor dormitory additions	30,000	—	—
27	State Prison at Soledad:			
28	Vocational shops	—	750,000	—
29	Equip vocational shops	184,000	—	—
30	Industries building	—	350,000	—
31	Water closets and lavatories	116,750	—	—
32	Warehouse	—	104,900	—
33	Equip warehouse	4,600	—	—
34	Institution for Women:			
35	Additional boiler	—	99,600	—
36	Administration building additions	—	156,000	—
37	Equip administration building addition	9,900	—	—
38	Laundry building addition	—	171,949	—
39	Equip laundry building addition	8,000	—	—
40	Minor construction and improvements	506,558	—	—
41				
42	Totals, Department of Corrections	\$896,068	\$16,946,224	—
43				
44	Department of the Youth Authority:			
45	Northern California Reception Center:			
46	Administration building	—	\$165,000	—
47	Equip administration building	\$6,500	—	—
48	Fred C. Nelles School:			
49	Perimeter fence and roads	—	75,000	—
50	Preston School of Industry:			
51	Kitchen alterations and improvements	195,200	—	—
52	Laundry addition and improvements	—	148,200	—
53	Equip laundry addition and improvements	14,000	—	—
54	Youth Training School:			
55	Initial 400-boy increment (partial cost)	—	811,800	—
56	Second 400-boy increment (partial cost)	—	4,928,000	—
57	Equip initial increment (partial cost)	400,000	—	—
58	Los Guilmos School:			
59	Water supply and distribution system	—	58,200	—
60	Ventura School:			
61	New school, phase 1	—	4,254,900	—
62	New school, phase 2	—	1,728,000	—
63	Minor construction and improvements	366,579	—	—
64				
65	Totals, Department of the Youth Authority	\$982,279	\$12,169,100	—
66				
67	Department of Education:			
68	Departmental Administration:			
69	Alterations for Sutro Library	\$96,198	—	—
70	Equipment for Sutro Library	5,000	—	—
71	State Colleges:			
72	Chico:			
73	Construct physical science and classroom building	—	\$1,231,300	—
74	Develop farm site	—	—	\$150,000 ^r
75	Equip humanities classroom building	—	—	—
76	Equip library building	70,000	—	—
77	Site acquisition for new buildings	140,000	—	—
78	Fresno:	30,000	—	—
79	Construct science wing	—	1,116,300	—
80	Construct classroom building No. 3	—	598,600	—
81	Construct cafeteria addition	—	576,900	—
82	Equip speech drama building	—	—	—
83	Equip outdoor physical education facilities	165,000	—	—
84	Equip enology building	3,000	—	—
85				43,000 ^r
86	^r State College Fund.

DEPARTMENT OF AGRICULTURE

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1				
2	The work of this department is of a regulatory and service nature. It is headquartered in Sacramento and has offices, field crews,			
3	advisors and consultants operating throughout the State. A major portion of the departmental responsibility is accomplished in			
4	co-operation with the 53 offices of county agriculture commissioners and consists of protection of plants and animals from in-			
5	fectious diseases, pest animals, weeds and injurious insects and the prevention of the introduction and spread of crop and live-			
6	stock pests and diseases.			
7	This budget provides for purchase of land and construction of 2 additional facilities for border quarantine inspection necessitated by			
8	relocation of existing highways or improvement of highways which has permitted increased vehicular traffic.

GENERAL ANALYSIS

The 5-year building program of this department is designed to provide facilities which will meet the anticipated population growth and ultimately permit housing of inmates in accordance with the following standards:

For cell buildings—1 bed and 1 prisoner per cell.
For dormitories—1 bed per 50 square feet of floor space.

The program also includes rehabilitation of the older prisons and elimination of unsafe facilities. The rated capacities shown below are computed on the above standards with 25 percent of the hospital beds being included at all institutions except the Medical Facility and the Men's Colony where all beds are counted.

The projected population is based on an anticipated court commitment rate of 70 per 100,000 population in the 18-49 age group for adult male felons and 4.5 per 100,000 in the same age group for adult female felons.

The 1958-59 major construction program is primarily directed toward an expansion of capacity to meet the needs of increasing inmate population and to progress toward the goals set forth above. Additional construction to increase rated capacity is proposed, including 1,200-cell capacity at the Men's Colony, 72 in dormitory capacity at the State Prison at Folsom, plus 150-cell capacity in the Reception-Guidance Center and 51 in hospital capacity at the Institution for Men, Chino. Treatment facilities, utilities, and auxiliary buildings are proposed to meet the requirements at the various institutions to handle the increasing inmate population. These facilities include vocational shops, an industrial building, increased warehouse space, and increased dairy, laundry, and sewage disposal facilities.

The 1958-59 minor construction program mainly proposes essential projects at the older institutions, and minor improvements and alteration projects at newer institutions.

c Expenditures from bond funds not included in budget totals.

47	Medical Facility			
48	This new permanent institution, with a rated capacity of 1,420, provides special custody of inmates who are mentally ill, chronically			
49	ill, narcotics addicts, sex offenders, or otherwise physically or mentally abnormal. Due to the type of inmates there is a limited			
50	training program with the emphasis on psychiatric treatment. Close custody is provided in the Reception-Guidance Center unit			
51	for observation and study of new commitments, prior to assignment to other institutions. This unit, with a rated capacity of			
52	550, began receiving inmates in July, 1957.			
53	The institution is located in Solano County about two miles south of Vacaville and consists of 903 acres of land, of which approxi-			
54	mately 100 acres are to be used for inmate and employee building areas.

3				
4	Men's Colony			
5	The present facility is located in the hospital section of Camp San Luis Obispo with a capacity for 1,250 inmates in army barracks.			
6	Pursuant to Section 2046 of the Penal Code, it is planned eventually to build a 3,000 capacity medium security institution on this			
7	state-owned property. Funds to start construction of the initial increment of 1,200 capacity were authorized in the Budget Act			
8	of 1957. The purchase of a small parcel of real property and auxiliary buildings for the first 1,200 are proposed in this budget.			
9	The second 1,200-man increment together with certain auxiliary units is also proposed in this budget.

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1				
2				
3	Institution for Men, Chino			
4	This is primarily a minimum security prison with an extensive agricultural and industrial program. The institution is located in			
5	Sau Bernardino County about 2 miles south of Chino on 2,566 acres of land. It was opened in 1941 and consists of reinforced			
6	concrete permanent main buildings, semipermanent steel industrial buildings, frame farm buildings and temporary steel barracks			
7	buildings. It has a rated permanent-type capacity of 828. Temporary barracks with a capacity of 350 are now in use, and it			
8	is planned to reopen additional temporary barracks with 140 capacity during 1958-59. The perennial state camps have a capacity			
9	of 510. The southern reception-guidance center is located on a 15-acre portion of the Chino site, and is reinforced concrete con-			
10	struction with a capacity of 408 inmates.			
11	The Tehachapi branch, located at the former women's institution near Tehachapi, is administered by the main institution at Chino.			
12	It has a rated capacity of 300.			
13	This budget proposes to expand facilities largely in order to provide services for the new Youth Training School which will be			
14	located on a portion of the Chino site. This proposed expansion includes: replacement of the present hospital with a 100-bed			
15	capacity hospital, increase sewage plant capacity, and increase capacity of laundry. It is also proposed to construct a 150-cell			
16	addition to the reception-guidance center to increase total inmate capacity to 558, and expand the dairy facilities to provide			
17	for the milk requirements of Metropolitan State Hospital.			
18

21	AND EQUIPMENT			
22				
23	PROPOSED 1958-59 EXPENDITURES ^a			
24				
25	Construct addition to reception-guidance center-----	-	-	\$1,612,700
26	This project will provide for additional capacity of 150 to meet			
27	the reception center requirements of the increasing number			
28	of inmates committed to the department by the courts in the			
29	southern 11 counties. This will bring the capacity to 558.			
30	Construct additional dairy facilities (partial cost)-----	-	-	362,200
31	This project will provide the additional dairy facilities to ade-			
32	quately handle milk production to meet the requirements of			
33	Metropolitan State Hospital.			
34	Construct additional sewage facilities-----	-	-	194,300
35	This project will increase sewage plant capacity to meet the			
36	additional requirements of the Youth Training School.			
37	Construct hospital-----	-	-	1,679,700
38	This project will provide a new 100-bed hospital which will re-			
39	place the present 49-capacity unit and provide additional			
40	beds required for this expanding institution and for the			
41	population of the new Youth Training School.			
42	Construct additional laundry facilities-----	-	-	555,770
43	This project will provide the increased laundry capacity required			
44	to service the increased population of this institution and			
45	the new Youth Training School.			
46	Equip bakery addition-----	-	-	20,500
47	<i>Capital Outlay and Savings Fund</i>			
48	To provide equipment for the bakery expansion project author-			
49	ized in 1957-58 and scheduled for completion in 1958-59.

State Prison at Folsom

This is a maximum custody prison with a large industrial program. The permanent facilities are constructed of reinforced concrete. The institution is located 2 miles northeast of Folsom and was constructed in 1858. The rated capacity of this institution consists of permanent facilities for 1,513 inmates and temporary structures housing 444 men. This budget provides for 2 additional wings to the present honor dormitory outside of the custodial area which will house an additional 72 inmates and increases the permanent capacity to 1,585. At the end of the 1958-59 Fiscal Year 4 perennial camps and 2 six-month camps will be in operation with a total of 340 beds.

MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENTPROPOSED 1958-59 EXPENDITURES ^a

Construct additions to Honor Dormitory including dayroom and messhall-----	-	-	\$283,072
This project will add 2 additional wings to the present honor dormitory outside of the custodial area to house 72 additional inmates. This will provide housing for all inmates who work outside of the walled area. The project also includes an addition to the dayroom and a new messhall.			
Equip honor dormitory additions-----	-	-	30,000
Capital Outlay and Savings Fund			

ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^b

Construct industrial warehouse-----	-	\$266,960	-
Extend telephone system-----	-	82,500	-
Construct industries office building-----	-	67,275	-
Construct filtration plant-----	-	49,225	-
Addition to cannery-----	\$197,650	4,550	-
Additional water pipeline and stand box-----	27,488	-	-
Site clearing—removal of hill-----	62,963	-	-
Construct metal stamping industrial building-----	75,596 ^d	-	-
Replace pumping and chlorination facilities-----	110 ^d	-	-

State Prison at Soledad

This is a medium security institution with an agricultural and vocational training program. Construction of permanent facilities of reinforced concrete was completed in December, 1951, to house 1,552 inmates. A temporary unit with a rated capacity of 436 houses inmate farmworkers in prefabricated steel buildings, and the perennial camps have a capacity of 150. The institution is located in Monterey County about 4 miles north of Soledad on 936 acres of land of which approximately 100 acres are used for inmate and employee building areas. The remainder of the site is used for an extensive agricultural program. The new North Facility with an additional capacity of 1,200 is scheduled for completion in July, 1958. This will bring the rated capacity of the institution up to 2,752 in permanent facilities.

This budget proposes the construction and equipment for 12 vocational shops, the construction of an industries building, an industries warehouse, and the final increment of the installation of water closets and lavatories in existing cells.

MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENTPROPOSED 1958-59 EXPENDITURES ^a

Construct additional vocational shops	-	-	\$750,000
To provide 12 additional vocational shops at the North Facility.			
This will provide program for 240 inmates which will partially eliminate idleness created by the continued operation of the 436 capacity barracks. Program planning had been projected to handle an expected 1,200 adult capacity increase upon the opening of North Facility, with a partial offset based on the deactivation of the barracks. The Department of Corrections is now planning to handle 600 Youth Authority wards who generally require more extensive vocational training.			
Construct industries building No. 3	-	-	350,000
This project provides housing for the paper converting enterprise which will manufacture cartons, mimeograph paper, and other paper products. This will partially meet the inmate idleness problem in the main institution and furnish training for approximately 50 inmates.			
Construct additional warehouse	-	-	104,900
This project provides for an outside receiving warehouse to facilitate the distribution of supplies to all parts of this institution, including the barracks and the camps. Present storage space shortages and the increase of storage space required by the opening of the North Facility are relieved by this addition. The camp supervision offices will also be located in this building.			
Install water closets in existing cells (final increment)	-	-	116,750
Capital Outlay and Savings Fund			
This proposal is the fourth and final increment of this program which is designed to provide increased security at this institution.			
Equip additional vocational shops	-	-	184,000
Capital Outlay and Savings Fund			
Equip additional warehouse	-	-	4,600
Capital Outlay and Savings Fund			

ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^b

Install water closets and lavatories in existing cells (3d increment)	-	\$289,050	-
Additional boiler	-	85,200	-
Additional sewage disposal capacity	-	64,300	-
Construct sewage effluent holding basin and pipeline	-	82,800	-
Expand dairy facilities	-	111,850	-
Construct additional cell buildings	\$224,964	57,536	-
Equip additional cell buildings	-	610,000	-
Equip farm annex for additional capacity	3,422	-	-
Install water closets and lavatories in existing cells (1st increment)	4,365	-70 ^d	-
Install water closets and lavatories in existing cells (2d increment)	106,221	3,129	-
Construct and equip industries building	1,470	-	-
Preliminary Plans for:			
Additional warehouse	-	1,500	-
Vocational shops building	-	2,600	-
Additional dairy facilities	1,600	1,500	-

^a From State Construction Program Fund unless otherwise indicated.

^b From Capital Outlay and Savings Fund unless otherwise indicated.

^d Unexpended balances previously reported as expended in a prior year.

Deuel Vocational Institution

This medium security institution is located in San Joaquin County about 4 miles east of Tracy. It is primarily an agricultural-vocational training institution. It has a capacity of 1,227 beds. The site consists of 783 acres of land, of which approximately 80 acres are used for inmate and employee housing areas, with the remainder used for farming.

The construction of a 300-bed reception-guidance center to receive and process Youth Authority wards committed from the criminal courts is scheduled to begin in the 1957-58 Fiscal Year.

3				
4	Institution for Women			
5	This institution includes all types of custody and is also the reception center for new commitments. It has an industrial vocational			
6	training and treatment program. Permanent housing presently financed provides for 679 inmates.			
7	The institution is located in San Bernardino County about 7 miles northwest of Corona, and consists of 120 acres of land.			
8	To meet expansion needs for population increases, this budget proposes an addition to the laundry, an additional boiler, and an			
9	extension to the administration and clinic process building.

68				
69	GENERAL ANALYSIS			
70				
71	The Capital Outlay program of the Department of the Youth Authority is planned to meet the capacity requirements resulting from the increasing California juvenile population and an increase in rate of commitment from the counties. The demand for additional capacity is being alleviated to some extent by a program of encouraging improvements in juvenile law enforcement and probation, increased use of county juvenile homes and camps through both maintenance and construction subsidies, and increased use of parole.			
72	The major projects in the Capital Outlay program for the 1958-59 Fiscal Year consist of replacement of the Ventura School for Girls with a new 300-bed facility, the second 400-boy increment of the new Youth Training School, and certain auxiliary facilities for these two institutions.			
73	A new administration building is included for the Northern California Reception Center, kitchen improvements and laundry expansion for Preston School of Industry, and a perimeter security fence at Fred C. Nelles School for Boys.			
74	Minor construction projects are budgeted for all existing institutions to provide for necessary alterations, improvements, and smaller scale additions.

Departmental Administration

Funds have been allocated on a department-wide basis in the 1956-57 and 1957-58 Fiscal Years for the preparation of preliminary plans for the Capital Outlay projects to be budgeted in the subsequent year. The allocations in the 1956-57 Fiscal Year include funds for revision of the institutions' master plans. Preliminary plans expenditures are reported in the respective institutions' budgets.

3				
4	Northern California Reception Center and Clinic			
5	This institution is located on a 17-acre site approximately 7 miles east of Sacramento, near Perkins. This facility receives all boys			
6	and girls from Northern California. The major purpose of this facility is to centralize intake and to make diagnostic studies and			
7	training recommendations on each case. Intensive medical, dental, psychological, and psychiatric treatment are given. Serious			
8	medical and psychiatric cases developing in the schools are also treated.			
9	This institution has a capacity of 211 dormitory beds and 28 hospital and detention beds.

Fred C. Nelles School for Boys

Fred C. Nelles School for Boys was constructed in 1890 at Whittier, California. The institution is largely of brick construction with a capacity on June 30, 1959, of 354 including the hospital and detention units with a capacity of 37.

**MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENT****PROPOSED 1958-59 EXPENDITURES ^a**

Construct perimeter security fence and roads-----	-	-	\$75,000
This project includes new security fence and gates and increases the height of portions of the present fence to enclose all boys housing and activities except the farm within a security area to reduce escapes. A small amount of road work near the fence is also included.			

ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^b

Roads, fence, and site improvements-----	-	\$111,900	-
Improve water supply and distribution system-----	-	135,530	-
Emergency gas line replacement-----	-	51,000	-
Remodel cottage to provide 2 dormitories-----	\$3,134	17,434	-
Equip 2 dormitories-----	10,102	898	-
Construct admissions unit and control center-----	23,700	4,000 ^d	-
Equip admissions unit and control center-----	11,354	646	-
Replace powerhouse, laundry and trades building-----	42,500	-	-
Equip powerhouse, laundry and trades building-----	-	20,000	-
Remodel bakery-----	-11,189 ^d	2,500	-
Equip bakery-----	9,489	11	-
Extend and reroute sewer facilities-----	-3,286 ^d	-	-
Replace street lighting system-----	37,150	-	-
Scullery alterations-----	25,145	-	-
Construct restricted-detention building-----	-2,229 ^d	-	-
Preliminary Plans for:			
Special treatment program buildings-----	2,500	-	-
2 50-bed dormitories-----	3,700	-	-
Security fence and roads-----	300	-	-
Addition to dining room and kitchen-----	1,000	-	-
Water supply and distribution system-----	1,200	-	-
TOTAL EXPENDITURES (Major Construction)-----	\$154,570	\$335,919	\$75,000
Capital Outlay and Savings Fund-----	154,570	335,919	-
State Construction Program Fund ^c -----	-	-	75,000

**MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS,
AND EQUIPMENT ^b**

Install fire escapes in boys' cottages-----	-	-	\$12,400
Improvements to baseball backstops-----	-	-	2,260
Construct corporation yard-----	-	-	25,000
Rewire and improve lighting fixtures in the hospital, gymnasium, and Greenleaf Cottage-----	-	-	2,700
Electrical improvements to transformer substation-----	-	-	2,750
Rewire maintenance shops-----	-	-	7,900
Construct field toilets in recreation area-----	-	-	2,000
Raze condemned buildings-----	-	-	17,000

^a From State Construction Fund Program unless otherwise indicated.

^b From Capital Outlay and Savings Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

^d Unexpended balances previously reported as expended in a prior year.

4	Paso Robles School for Boys			
5	The Paso Robles School for Boys is located near Paso Robles, San Luis Obispo County. The school site covers 203 acres and the			
6	institution occupies an area of approximately 40 acres. The permanent facilities will have a capacity of 455 plus hospital and			
7	detention capacity of 39 when new facilities are completed. All buildings at this institution are of single-story construction and			
8	are of reinforced brick construction with radiant heating. Each cottage houses 50 boys and is of dual type; single rooms and dor-			
9	mitories.

Preston School of Industry

Preston School of Industry was constructed in 1894 near Ione. A reconstruction program to replace and relocate many condemned and inadequate facilities is nearing completion. It is proposed to remodel the kitchen to meet public health requirements and present operating needs, and to remodel and enlarge laundry which was damaged by fire in the 1957-58 Fiscal Year. Upon completion of projects financed in the 1957-58 Budget, this institution's capacity will total 832 plus 94 hospital and detention beds.

REAL PROPERTY ACQUISITION

ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^b

Acquire site for additional reservoir-----	\$1,114	\$13,850	—

DEPARTMENT OF THE YOUTH AUTHORITY—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1				
2				
3				
4				
5	Chapter 303, Statutes of 1949, added Section 1250 to the Welfare and Institutions Code which provides for "an institution for the			
6	confinement of males to be known as the Youth Training School." It will be located on the site of the Institution for Men, Chino.			
7	It is planned that this school will ultimately house 1,200 wards of the 18 to 21 age group. It will have a vocational education			
8	type program. The capacity of the initial development will be 400 beds plus 44 hospital and detention beds. This budget includes			
9	funds for auxiliary facilities necessary to make the first increment a fully operable institution plus the equipment which must be			
10	ordered well in advance of the expected September 1959 completion date. The second increment of 400 beds plus 32 detention beds			
11	is also included in this budget.			
12				
13				
14	MAJOR CONSTRUCTION, IMPROVEMENTS,			
15	AND EQUIPMENT			
16				
17	PROPOSED 1958-59 EXPENDITURES ^a			
18				
19	Construct Youth Training School—first increment (partial cost)---	-	-	\$811,800
20	This project includes auxiliary facilities necessary for the operation			
21	of the first 400-bed increment but not previously			
22	financed because of the shorter period of construction necessary			
23	for these units.			
24	Equip Youth Training School (partial cost)-----	-	-	400,000
25	Capital Outlay and Savings Fund			
26	This provides part of the equipment for the first increment of			
27	construction. This includes equipment which must be			
28	ordered well in advance of the completion of construction			
29	in order to assure delivery and installation in time for			
30	early occupancy of the institution.			
31				
32	Construction Funds for Projects With Working Drawings			
33				
34	Construct Youth Training School—second increment-----	-	-	4,928,000
35	This provides the second 400-boy housing unit, auditorium,			
36	warehouse, automotive storage building, commissary and			
37	vocational shops additions, the second chapel, and employee			
38	housing.			
39

5	Los Guilucos School for Girls			
6	Los Guilucos School for Girls is located near Santa Rosa. The school property includes 420 acres. The building area occupies approxi-			
7	mately 40 acres. By June 30, 1960, the total capacity will be 295 beds, including 57 hospital and detention beds. A 40-bed dormi-			
8	tory is scheduled for completion in 1959-60. The new school is of reinforced concrete construction with radiant heating either in			
9	floor slabs or in the walls. All buildings are of 1-story construction.

5	Ventura School for Girls			
6	This institution is located near Ventura in Ventura County. The present school was constructed in 1916 on hillside terrain. Present facilities are of a 2-story cottage type, each cottage containing its own kitchen, dining room, and living area. Dormitories are located on the second story and consist of 2 15-girl dormitories in each cottage making supervision difficult and expensive. The present plan is to construct a new institution on a level site acquired in the 1952-53 Fiscal Year. The capacity of the existing institution is 216, including 30 hospital and detention beds.			
7				
8				
9				
10	The proposed school will have a capacity of 300 plus 14 hospital and 50 detention beds. The ultimate planned capacity for this institution is 550.

26	Construct new Ventura School for Girls, phase I.....	-	-	\$4,254,900
27	It is proposed to construct a new institution for girls on a site several miles south of Ventura. The present institution was constructed in 1916 and has reached a point where maintenance costs are excessive. This project will provide facilities with 300 beds plus 14 hospital and 50 detention beds. Certain additional auxiliary units, phase II, necessary for a completely operable institution, are included in a separate appropriation. The ultimate planned capacity for this institution is 550.

DEPARTMENT OF EDUCATION—Continued

DEPARTMENTAL ADMINISTRATION

The funds provided by Chapter 1681, Statutes of 1957, for the establishment of 2 state colleges and site acquisition for 2 additional colleges are contained in the budget of the Department of Education. These appropriations are reported here because the initial acquisition and development phases of these colleges is done by the Department of Education. Work is now being carried on in connection with the acquisition of sites for all 4 of the colleges and will continue during the 1958-59 Fiscal Year. In addition the departmental administration budget contains funds to remodel and equip approximately 9,000 sq. ft. of space on the first floor of the San Francisco City Library in order to house the Sutro Branch of the State Library.

STATE COLLEGES

Enrollments

The construction program for the 12 state colleges is based on a projection of enrollment growth of 11,200 regular students (FTE) between the years 1958 and 1961. This is an increase of 22.1 percent over the 50,600 regular students (FTE) anticipated in 1958. In California, enrollments in the state colleges during the next several years are estimated to increase at a rate almost five times that of the growth of the population as a whole. Enrollment trends have been estimated from statistics on prior experience of the progression of students from high schools to the colleges and through the various collegiate-level grades. The data include a compilation of numbers of students by county of origin in order to allow a reasonably accurate distribution of students by college or university area. The projections also assume a continual increase in the percentage of population attending college in tax-supported institutions. The following table outlines actual enrollments of regular students in the several state colleges from 1955 to 1957 and estimated enrollments from 1957 to 1961.

Full-time Equivalent Enrollment of Regular Students—1955-61

	ACTUAL		ESTIMATED			
	1955-56	1956-57	1957-58	1958-59	1959-60	1960-61

Capacity

The basic unit for measuring classroom student capacity is the student station. The stations are weighted differently depending upon whether they are in lecture rooms, activity rooms, or laboratories. A room is categorized by its primary use. A student station count is assigned the room based on accepted measurements, and a weighting, based upon the time of required attendance per unit of student credit in each type of classroom, is given each student station.

The weighting is predicated on utilization standards which fix practical maximum utilization at 30 hours per week for lecture rooms, 25 hours per week for activity rooms and 20 hours per week for laboratories. Lecture rooms must be occupied an average of 75 percent of student station capacity each hour of use, while activity rooms and laboratories must be occupied an average of 85 percent of student station capacity each hour of use.

The categorization of a room as lecture, laboratory or activity can shift from year to year depending on its planned use. For example, a large enrollment in art courses will result in the shifting of lecture classrooms to art activity classrooms. These shifts can result in changes in the measured capacity of any given college plant from 1 school year to the next.

A fourth categorization, not mentioned above, is that of earned capacity. This is the capacity that results from actual enrollments in courses that use rooms which cannot be measured in terms of student stations. The best example of this type of capacity is the gymnasium.

The existing and funded capacity of the various college plants based on planned 1960 use is shown below.

Summary of Capacity—Existing and Funded—1960 Use

	LECTURE	ACTIVITY	LABORATORY	EARNED	TOTAL
Chico State College	2,174	609	139	221	3,143
Fresno State College	2,984	677	539	536	4,736
Humboldt State College	906	301	222	79	1,508

DEPARTMENT OF EDUCATION—Continued

STATE COLLEGES—Continued

Capacity—Continued

The total capacity of 58,104 regular students (FTE) is 3,696 short of the needed capacity to house the enrollments anticipated in 1960 (the time when the buildings financed in 1958-59 will be ready for occupancy). The buildings included in the budget for 1958-59 have a total capacity of 4537 regular students (FTE). A surplus capacity of 841 regular students (FTE) results from the building of certain facilities, primarily science and engineering laboratories, to house enrollments anticipated in 1963-64. This is more fully discussed below.

PROJECTS PROPOSED FOR FINANCING IN 1958-59

A total of \$46,224,040 is included in the budget to finance new major construction projects for the various state colleges. The kinds of projects and the justification for including them in the budget is summarized below.

Science and Engineering Facilities

Included in the budget are 7 projects at 6 schools to house approximately 1,400 additional regular students (FTE) in the sciences and engineering. The total cost of these projects is \$17,076,700, which is 37 percent of the total major construction budget. The projects were included in the budget because existing and funded capacity in the sciences and engineering was not sufficient to accommodate enrollments projected for 1960 at those colleges where the buildings are proposed. However, the buildings once justified were approved to accommodate enrollments projected for 1963 in these subject fields. This policy obviates the need for building small, uneconomical units of expensive facilities, but does result in a small excess capacity for a 3-year period.

Other Instructional Facilities

Included in the budget are projects to house approximately 3,050 regular students (FTE) in lecture programs, art, industrial arts, physical education, music and speech-drama. Lecture capacity is proposed for only those colleges which will have a significant shortage in existing and funded lecture capacity by 1960. The capacity included in the proposed projects is sufficient to meet the need for 1960.

The total cost of the projects is \$12,126,440. This is 26.3 percent of the total major construction cost.

Agriculture Facilities

Farm site development projects are included for Chico State College, and an agriculture engineering building is included for the Kellogg-Voorhis unit of California State Polytechnic College. The site development is needed at Chico to effectively implement the 4-year agriculture program approved in 1956. The agriculture engineering building at Kellogg-Voorhis is to house approximately 70 regular students expected to enroll in the agriculture engineering program. The cost of these developments and buildings is \$650,900. This is 1.4 percent of the total major construction budget.

Libraries

Only one library is included in the budget. This is an addition to the library facilities at San Jose State College. With this addition, the library facilities at the college will accommodate an enrollment of 14,400 regular students. The cost of the project is \$2,174,000. This is 4.7 percent of the major construction budget.

Health Centers

The budget includes 3 health centers. Two of the projects are the initial buildings for health centers at Humboldt and the Kellogg-Voorhis unit of California State Polytechnic College. The third project is an addition to the health center at San Diego State College. The present health center on the campus of San Diego will accommodate an enrollment of 4,000 regular students. The enrollment for 1960 is projected at 10,000. The addition will provide sufficient facilities for a campus of this size. The total cost of these projects is \$775,400. This is 1.7 percent of the total major construction budget.

Cafeterias

The budget includes 6 cafeterias. These are for colleges with a present cafeteria seating capacity which is under 8 percent of the total regular individual enrollment. However, in planning the capacity of the approved projects, seating was allowed for a total of 14.5 percent of the regular individual enrollment in 1963. The need for this amount of seating was obtained by an extensive study of cafeteria utilization in the state colleges and takes into consideration the feeding requirements of students living in on-campus housing.

The total cost of these projects is \$5,074,200. This is 11 percent of the total major construction budget.

Maintenance Facilities

The budget includes a central power and communication distribution center for Humboldt State College and a corporation yard for San Jose State College. The former is to meet the needs of buildings added to the campus in the last 5 years; the latter is to replace the corporation yard that will be destroyed by construction of the engineering building addition.

The total cost of these projects is \$318,400. This is 0.7 percent of the total major construction budget.

Equipment

A total of \$7,918,000, or 17.2 percent of the total major construction budget, is included for equipping buildings that were financed by the Budget Act of 1957 or that are to be financed in 1958 and are to be completed in the same fiscal year. The amounts included for equipping the various buildings are based on itemized equipment lists which have been carefully screened.

Site Clearance

There is one project for site clearance in this budget at a total cost of \$110,000. Land purchased at San Jose in 1957-58 must be cleared before residence halls can be erected on it. This project accomplishes that clearance.

DEPARTMENT OF EDUCATION—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59		
1	SPECIAL SCHOOLS					
2	At the present time the Department of Education administers 6 special schools; 2 for the education of deaf children, 2 for cerebral					
3	palsied children, 1 for the education of blind children and 1 orientation center for the adult blind.					
4	The facilities of the deaf school at Berkeley have been augmented by the completion of a new gymnasium during 1957-58. An addition					
5	to the existing vocational building to provide students with those skills necessary in the metal fabricating trades is provided in					
6	the 1958-59 Budget. It is anticipated that the presently financed addition to the classroom facilities for the intermediate and					
7	advanced schools will be completed and ready for instructional purposes in 1959-60. This will allow the school to reach its maxi-					
8	mum planned capacity of 500.					
9	The School for the Deaf at Riverside will complete currently financed dormitories and classrooms with an additional capacity of 64.					
10	Thus during 1958-59 the school's maximum capacity of 500 will be reached. In order to provide a complete physical education					
11	program for a school of this size, funds have been included in this budget for the construction of a gymnasium.					
12	The School for the Blind at Berkeley completed a new kitchen and dining room facility during 1957-58. The old kitchen and					
13	dining room facilities have been converted into dormitories which provide the school with capacity to educate and house 200					
14	students. No major projects have been proposed for 1958-59.					
15	The 2 schools for cerebral palsied children located at Altadena and San Francisco each have a capacity of approximately 30 resi-					
16	dents. The school in San Francisco is a relatively new facility, being housed on the campus of San Francisco State College,					
17	and having been completed in 1955. The southern school occupies rented quarters of a somewhat older nature. No major capital					
18	outlay projects have been proposed for these schools.					
19	The Oakland Orientation Center for the Blind utilizes the facilities formerly known as the Industrial Home for the Blind. The					
20	present capacity is sufficient to care for the students and residents. No provision has been made for capital outlay expendi-					
21	tures at this location.

5	Fresno State College			
6	This college was established in 1911. The new 880-acre campus includes 720 acres for the college agricultural program. Permanent facilities include: a laboratory school, men's gymnasium, library, music building, administration building, industrial arts building, education and psychology building, science building, agriculture classroom building, agriculture units, corporation yard, cafeteria, art-home economics building, student health service building and engineering building. The new campus is partially occupied and further moves from the old campus are expected to occur in 1957-58 and 1958-59. However, the old campus cannot be entirely abandoned until the facilities and buildings financed in 1957-58 are constructed. The final move should occur by fall, 1959.			
10	An enrollment of 6,500 regular students (FTE) is anticipated in 1960.

3	Humboldt State College			
4				
5	Analysis			
6				
7	Humboldt State College offers 4-year programs in teacher education, liberal arts, wildlife management and selected 2-year vocational training. The campus now includes 75 acres and 14 permanent facilities. Currently under construction are the speech arts-little theater building, fieldhouse and natatorium, residence halls, administration and business education building. An enrollment of 1,500 regular students (FTE) is anticipated in 1960.

San Diego State College

The college was established in 1899 and moved to the present site in 1931. The campus covers approximately 250 acres. Courses in general education, teacher training, industrial arts and vocational education are offered.

Buildings currently financed or under construction include physical education facilities, administration addition, two science building additions and residence halls.

An enrollment of 8,200 regular students (FTE) is anticipated in 1960.

MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENTPROPOSED 1958-59 EXPENDITURES^a

Construct addition to education building	—	—	\$820,500
To provide additional classroom capacity in the education division for 578 regular students (FTE).			
Construct engineering and applied science building addition	—	—	2,592,500
To provide additional capacity for 323 regular students (FTE) in engineering. This project also includes facilities for housing a nuclear reactor that will be given to the college.			
Construct health service building addition	—	—	291,500
To construct an addition to the health service building that will provide facilities for 10,000 regular students.			
Equip addition to health service building	—	—	22,000
Capital Outlay and Savings Fund			
Remodel science building	—	—	166,300
Capital Outlay and Savings Fund			
To provide additional capacity for 72 regular students (FTE) in life science and psychology.			
Equip remodeled science building	—	—	48,000
Capital Outlay and Savings Fund			
Remodel gymnasium	—	—	136,100
Capital Outlay and Savings Fund			
To convert the existing men's and women's gym to meet the needs of the women's physical education department.			
Equip remodeled gymnasium	—	—	4,500
Capital Outlay and Savings Fund			
Equip men's physical education building and swimming pool	—	—	111,000
Capital Outlay and Savings Fund			
To equip the physical education facilities financed by the Budget Act of 1957.			

^a From State Construction Program Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	San Fernando Valley State College			
2				
3	San Fernando Valley State College will become a separate state college on July 1, 1958, as the result of Chapter 2265, Statutes of			
4	1957. The campus, consisting of 240 acres near Northridge, has no permanent buildings in existence. However, a library, science			
5	building, music building, fine arts building, speech-drama building, and residence halls are financed. The library will be occupied			
6	early in 1959.			
7	It is anticipated that the college will have an enrollment of 2,200 regular students (FTE) in 1960.

1	San Francisco State College			
2				
3				
4	This college was established in 1899. In 1939 a new campus site was acquired at 19th Avenue and Lake Merced Boulevard. Additional			
5	purchases have increased the new campus until it now covers 97.5 acres.			
6	In addition to existing facilities, additions to the administration building, a classroom building, a fine arts building and a library are			
7	under construction.			
8	An enrollment of 5,800 regular students (FTE) is anticipated in 1960.			
9	An ultimate enrollment ceiling of 9,000 regular students (FTE) has recently been established by the State Board of Education. The			
10	campus and all proposed new facilities have been masterplanned to this ceiling.

San Jose State College

This college, established in 1870, offers courses in general education and teacher training. Most buildings are permanent in nature except for a few temporary classrooms and some old converted houses which are to be replaced as new buildings are constructed. The 107-acre campus is divided between the main downtown campus and the stadium and playfield areas. An enrollment of 10,500 regular students (FTE) is anticipated in 1960.

REAL PROPERTY ACQUISITION**ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^b**

Site acquisition -----	-	\$2,500,000	-
------------------------	---	-------------	---

**MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENT****PROPOSED 1958-59 EXPENDITURES ^a**

Working drawings for engineering building addition-----	-	-	\$350,000
To provide facilities for an additional 490 regular students (FTE) in engineering.	-	-	45,000
Working drawings for aeronautics building-----	-	-	2,174,000
To provide facilities for 89 regular students (FTE) in aeronautics.	-	-	720,240
Construct library building addition-----	-	-	617,800
To provide an addition to the library building in order that the total library facility will accommodate an enrollment of 14,000 regular students (FTE).	-	-	
Construct music building addition-----	-	-	
To provide music classroom and activity space for an additional 216 regular students (FTE) in music programs.	-	-	
Construct speech-drama building addition-----	-	-	
To provide classroom and activity space for an additional 135 regular students (FTE) in speech-drama programs.	-	-	

^a From State Construction Program Fund unless otherwise indicated.

^b From Capital Outlay and Savings Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

2				
3	California State Polytechnic College			
4	Established in 1901, this college, located on 2,838 acres at San Luis Obispo, provides agricultural and vocational education, sup-			
5	plemented by a liberal arts program. Except for permanent administration, library, auditorium, power plant, agricultural			
6	mechanics, and engineering and science buildings, all structures are of temporary farm-type construction. Development of the			
7	master plan for this campus requires the relocation and replacement of many such buildings as each permanent building area			
8	develops.			
9	The Southern California campuses are maintained near Pomona. The Voorhis unit specializes in citriculture, ornamental horti-			
10	culture, and related subjects, with frame and stucco classrooms and dormitories and temporary farm-type structures occupy-			
11	ing its 150 acres. The Kellogg unit consists of 812 acres received as a restricted gift in 1952, and funds have been appropriated			
12	to date to provide a science (and general classroom) building, gymnasium, cafeteria, engineering building, and some agricultural			
13	instructional units.			
14	An enrollment of 5,200 regular students (FTE) at the San Luis Obispo campus and 2,500 regular students (FTE) at the Kellogg-			
15	Voorhis campus is anticipated in 1960.			
16				
17	REAL PROPERTY ACQUISITION

41				
42	San Luis Obispo Campus:			
43	Construct outdoor physical education facilities -----	-	-	\$722,200
44	To construct outdoor physical education facilities for men.			
45	The project includes playfields, outdoor tennis courts,			
46	handball courts, and basketball courts to serve men stu-			
47	dents on a campus of 6,200 FTE.			
48	Construct cafeteria -----	-	-	1,700,900
49	To provide a dining room, snack bar, and faculty dining room			
50	with related facilities to serve 6,200 students.			
51	Construct little theater-music building -----	-	-	1,697,000
52	To provide classrooms, activity rooms, practice rooms and re-			
53	lated facilities and faculty offices to serve 90 FTE students			
54	in music and drama.			
55	Construct graphic arts building -----	-	-	1,415,000
56	To provide lecture rooms, activity rooms and laboratory rooms			
57	with auxiliary facilities and faculty offices to serve 228			
58	FTE students in printing, industrial engineering and ag-			
59	ricultural journalism.			
60	Equip agriculture classroom building -----	-	-	214,000
61	Capital Outlay and Savings Fund -----			
62	To equip agriculture classroom building funded in Budget			
63	Act of 1957.			
64	Equip men's physical education facilities -----	-	-	87,000
65	Capital Outlay and Savings Fund -----			
66	To equip physical education facilities funded in Budget			
67	Act of 1957.			
68	Equip home economics building and cottage -----	-	-	119,000
69	Capital Outlay and Savings Fund -----			
70	To equip home economics building funded in Budget Act			
71	of 1957.			
72	Kellogg-Voorhis Campus:			
73	Construct outdoor physical education facilities -----	-	-	295,300
74	To complete the initial development of the physical education			
75	area for both men and women including turfed play fields,			
76	outdoor tennis courts, handball courts and basketball			
77	courts to serve 4,200 FTE students.			
78	Construct agriculture engineering building -----	-	-	500,900
79	To provide lecture rooms, activity rooms and laboratories with			
80	related offices to serve 72 FTE in agriculture engineering.			
81	Health service building -----	-	-	280,800
82	To provide facilities for examinations, first aid, and related			
83	services for 4,400 FTE students.			
84				
85	^a From State Construction Program Fund unless otherwise indicated.			
86	^b From Capital Outlay and Savings Fund unless otherwise indicated.

4				
5	California School for the Deaf, Berkeley			
6	The School for the Deaf, Berkeley, is housed in a relatively complete plant with a capacity of 450 students. The ultimate capacity			
7	of the school will be 500 students with the completion of additional classrooms which were financed in the 1957-58 capital			
8	outlay budget. The 1958-59 program contains an addition to the vocational building as a part of the educational program.			
9	This will provide facilities for teaching those skills necessary for students to enter the metal fabricating trades.

UNIVERSITY OF CALIFORNIA

The University of California maintains 8 campuses throughout the State from La Jolla in the south to Davis in the north. 2 of these campuses, La Jolla and Mt. Hamilton, are research centers rather than teaching institutions. The other 6, Berkeley, Davis, Los Angeles, Riverside, San Francisco and Santa Barbara, are teaching campuses. San Francisco is a specialized institution, concentrating on medical sciences.

In addition to the 8 campuses, numerous agricultural experiment and field stations are maintained throughout the State. The capital outlay for these stations and the agricultural activities on the teaching campuses is provided from a continuing appropriation from the Fair and Exposition Fund.

The 1958-59 Capital Outlay program for the University totals \$55,663,222. Of this amount \$54,213,222 is from state sources. The balance of \$1,450,000 is from University contract overhead funds. The distribution of amounts by campus and source of financing is shown in the table below:

Campus	Total	Capital Outlay and Savings Fund	Construction Program Fund	Fair and Exposition Fund	University Contract Overhead Funds
Berkeley	\$21,682,375	\$343,800	\$21,279,075	\$59,500	-
Davis	3,311,650	-	-	3,311,650	-
La Jolla	2,189,070	272,070	1,917,000	-	-
Los Angeles	21,381,130	961,230	18,744,700	225,100	\$1,450,000
Mt. Hamilton	10,500	10,500	-	-	-
Riverside	3,281,222	12,800	3,092,272	176,150	-
San Francisco	687,000	612,000	75,000	-	-
Santa Barbara	241,300	241,300	-	-	-
Field stations	146,500	-	-	146,500	-
Statewide	2,732,475	455,000	700,000	1,577,475	-
Totals	\$55,663,222	\$2,908,800	\$45,808,047	\$5,496,375	\$1,450,000
Less funds from University contract overhead	-1,450,000				
Total, State Funds	\$54,213,222				

The amount of \$1,450,000 from contract overhead funds is scheduled to be used as the partial cost of a nuclear medicine and radio-biology building at Los Angeles. A like amount will be necessary in 1958-59 from the same source. In addition it is expected that the Federal Government will participate in the construction of such a building in an amount approximating \$1,000,000.

Expenditures from the Fair and Exposition Fund total \$5,496,375. Of this amount \$4,336,343 is from current appropriations while the balance, \$1,160,032, is available from reserves built up over prior years from these appropriations.

The 1958-59 program continues the policy of providing needed instructional capacity with only those auxiliary facilities necessary to carry on the instructional program.

The program is built on a need to meet requirements in 1960 and 1961 in cases where the project is very large and would require an additional year to complete.

The table below contains the enrollment projections through 1961 on which the Capital Outlay budget was based. Only instructional campuses are included. Specialized teaching and research campuses such as La Jolla, Mount Hamilton and San Francisco are excluded from these projections.

	1956	1957	1958	1959	1960	1961
Berkeley	17,757	18,500	19,400	20,100	21,250	22,750
Davis	2,144	2,400	2,550	2,750	3,000	3,300
Los Angeles	15,823	16,850	17,650	18,650	19,800	21,550
Riverside	709	750	800	950	1,250	1,550
Santa Barbara	2,217	2,400	2,600	2,750	3,000	3,250

28	Shop building for department of irrigation-----	-	-	31,400
29	Fair and Exposition Fund			
30	Prepare working drawings for and construct metal-and-			
31	woodworking shop to replace present inadequate facilities			
32	in hydraulic laboratory and to release that space			
33	for research and teaching in hydraulics.			
34	Utilities for central campus and Hopkins Tract—steps 1 and 2--	-	-	139,500
35	Fair and Exposition Fund			
36	Prepare working drawings for and provide utility extensions			
37	to existing and funded buildings.			
38	Biological sciences unit 2 for plant pathology and bacteriology--	-	-	2,251,300
39	Fair and Exposition Fund			
40	Prepare working drawings for and construct building with			
41	classrooms, laboratories, and offices for departments of			
42	plant pathology and bacteriology, thereby providing relief			
43	for all departments of biological science and for			
44	veterinary medicine.			
45	Farm division—move and re-establish headquarters-----	-	-	210,000
46	Fair and Exposition Fund			
47	Prepare working drawings for, construct, and equip new			
48	farm division headquarters relocated for more efficient			
49	and economical service, replacing present outdated facilities.			
50	Poultry husbandry—egg-laying house-----	-	-	23,500
51	Fair and Exposition Fund			
52	Prepare working drawings for and construct egg-laying			
53	house to permit research in genetics and nutrition.			
54	La Jolla Campus:			
55	Equip laboratory building—unit 2-----	-	-	240,460
56	Capital Outlay and Savings Fund			
57	Purchase equipment for laboratory building—unit 2 to house			
58	oceanographical teaching and research.			
59	Laboratory building unit 3-----	-	-	1,917,000
60	Prepare working drawings for and construct building on exist-			
61	ing campus site temporarily for activities of new campus			
62	and ultimately for oceanographical research of Scripps			
63	Institution.			
64	Los Angeles Campus:			
65	Equip plant sciences building-----	-	-	112,000
66	Fair and Exposition Fund			
67	Purchase equipment for building with classrooms, labora-			
68	tories, and offices for plant sciences departments.			
69	Equip botany building-----	-	-	45,000
70	Fair and Exposition Fund			
71	Purchase equipment for building with classrooms, labora-			
72	tories, and offices for botany department.			
73	Equip alterations to physics building—step 1 completion-----	-	-	35,000
74	Capital Outlay and Savings Fund			
75	Purchase equipment for space released to physics by transfer-			
76	ence of departments of bacteriology and zoology to new			
77	life science building.			
78	Equip geology building addition for geophysics-----	-	-	86,800
79	Capital Outlay and Savings Fund			
80	Purchase equipment for addition to geology building to house			
81	research activities of institute of geophysics.			
82				
83				
84	^a From State Construction Program Fund unless otherwise indicated.			
85				
86

2	AND EQUIPMENT—Continued			
3				
4	PROPOSED 1958-59 EXPENDITURES ^a —Continued			
5				
6	Los Angeles Campus—Continued:			
7	Equip service yard expansion—step 1-----	-	-	\$55,000
8	Capital Outlay and Savings Fund			
9	Purchase equipment for new service and maintenance facilities at corporation yard.			
10	Graduate school of business administration building-----	-	-	4,291,500
11	Construct building with classrooms, laboratories, and offices for graduate and undergraduate programs in business administration.			
12	Social sciences unit 1 and 2-----	-	-	160,000
13	Prepare working drawings for, and construct addition to, and offices for departments of social sciences and humanities.			
14	Theater arts unit 1-----	-	-	99,000
15	Prepare working drawings for building with basic theater facilities, classrooms, and offices for theater arts department, now dispersed among inadequate temporary buildings.			
16	Construct psychology clinic school addition-----	-	-	55,000
17	Prepare working drawings for, and construct addition to psychology clinic school to complete basic facilities which could not be completed within available funds for new school plant.			
18	Equip psychology clinic school addition-----	-	-	1,500
19	Capital Outlay and Savings Fund			
20	Complete alterations to Moore Hall-----	-	-	190,150
21	Capital Outlay and Savings Fund			
22	Provide alterations to Moore Hall to bring building up to code requirements and to increase utility of various areas.			
23	Equip Moore Hall-----	-	-	14,850
24	Capital Outlay and Savings Fund			
25	University elementary school—step 2 completion—kindergarten-nursery unit-----	-	-	135,000
26	Provide amount, in addition to available funds of \$135,000, to construct kindergarten-nursery unit to complete replacement of elementary school's temporary facilities with more adequate permanent buildings.			
27	Engineering unit 3-----	-	-	221,500
28	Prepare working drawings for building with classrooms, laboratories, and offices for college of engineering.			
29	Extended utilities, roads and walks to west campus—step 1-----	-	-	30,700
30	Prepare working drawings for extension of utilities to residence halls area.			
31	Los Angeles Medical Center:			
32	Install heat deflecting devices in medical center-----	-	-	109,600
33	Capital Outlay and Savings Fund			
34	Prepare working drawings for and install heat deflecting devices in areas where solar heat gain interferes with functions.			
35	Vivarium ventilation in medical center-----	-	-	275,000
36	Capital Outlay and Savings Fund			
37	Prepare working drawings for and construct improvements to vivarium ventilation system to eliminate health and safety hazards and effects of poor ventilation on research animals.			
38	Alterations to medical center for accommodation of neuropsychiatric unit-----	-	-	14,000
39	Capital Outlay and Savings Fund			
40	Prepare working drawings for additional facilities to accommodate services demand of new neuropsychiatric unit.			
41	Institute of nuclear medicine and radiobiology (partial)-----	-	-	1,450,000
42	University Contract Overhead Fund			
43	Prepare working drawings for, construct, and equip building with laboratories and offices for instruction and research purposes of Institute of Atomic Medicine and Department of Biophysics.			
44	Riverside Campus:			
45	Site development—north campus area-----	-	-	164,077
46	Prepare working drawings for and undertake provision of erosion control, drainage control, dust palliation, roads and walks, and lighting.			
47	Equip corporation yard and farm buildings-----	-	-	11,550
48	Fair and Exposition Fund			
49	Purchase equipment for service buildings and farm division buildings at new corporation yard.			

^a From State Construction Program Fund unless otherwise indicated.

1	MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
2	PROPOSED 1958-59 EXPENDITURES—Continued			
3	Riverside Campus—Continued			
4	Insecticide building ventilation -----	-	-	\$107,300
5	<i>Fair and Exposition Fund</i>			
6	Provide amount in addition to existing appropriation of \$56,200 to complete installation which could not be completed within available funds.			
7	Administration building and related alterations to social sciences-humanities building -----	-	-	1,314,600
8	Prepare working drawings for and construct building to house campus administrative activities.			
9	Physical sciences building addition -----	-	-	64,385
10	Prepare working drawings for building with classrooms, lab- oratories, and offices for division of physical sciences.			
11	San Francisco Campus:			
12	Completion of initial complement of equipment—medical sciences increment 2 -----	-	-	145,000
13	<i>Capital Outlay and Savings Fund</i>			
14	Complete purchase of initial complement of equipment for new medical sciences increment 2.			
15	Medical sciences increment 2—service elevator -----	-	-	75,000
16	Construct 2d service elevator for 13th-floor experimental an- imal tower.			
17	Alterations to existing facilities—stage 3 -----	-	-	394,000
18	<i>Capital Outlay and Savings Fund</i>			
19	Prepare working drawings for and construct 3d stage of rehabilitation of older buildings to extend and modern- ize clinical and service areas to increase efficiency and accommodate expanded student load.			
20	Equipment for alterations—stage 3 -----	-	-	26,000
21	<i>Capital Outlay and Savings Fund</i>			
22	Santa Barbara Campus:			
23	Equip science unit 2—step 1 -----	-	-	211,000
24	<i>Capital Outlay and Savings Fund</i>			
25	Purchase equipment for building with classrooms, labora- tories, and offices for division of biological sciences.			
26	Field Stations:			
27	Hopland—office and laboratory building -----	-	-	83,000
28	<i>Fair and Exposition Fund</i>			
29	Prepare working drawings for, construct, and purchase equipment for laboratory and office space for resident personnel.			
30	Construction Funds for Projects With Working Drawings			
31	Berkeley:			
32	Business administration-social science building -----	-	-	\$4,467,700
33	Chemistry development and related alterations—step 1—new chemistry building unit 1 -----	-	-	5,727,000
34	Los Angeles:			
35	Social science unit No. 1 -----	-	-	5,276,700
36	Theater arts building -----	-	-	2,474,000
37	Engineering unit No. 3 -----	-	-	5,418,000
38	Extend utilities -----	-	-	583,300
39	Riverside:

4	Expenditures From Capital Outlay and Savings			
5	Fund—Continued			
6				
7	La Jolla Campus:			
8	Rehabilitate aquarium floor to remedy sea water seepage and			
9	inadequate drainage	-	-	\$7,950
10	Building T-16—install fire sprinkler system, construct exterior			
11	fire escape, apply fireproofing material to exterior	-	-	11,660
12	Library building—make alterations to provide for stack ex-			
13	pansion and install additional stacks	-	-	12,000
14	Improve ventilation in Scripps Hall	-	\$12,800	-
15	Install improved electrical system in Scripps Building	-	15,000	-
16	Ritter Hall—convert reassigned space into biochemistry			
17	laboratory	-	6,000	-
18	Develop unfinished basement area of Ritter Hall addition	\$20,000	-	-
19	Remodel amphibious craft garage for aqua-lung storage and			
20	maintenance, and for core storage	10,000	-	-
21	Remodel temporary building T-2 for marine biological research	6,000	-	-
22	Library building—relocate restrooms and construct mezzanine	16,500	-	-
23	Remodel space in old Ritter Hall vacated by activities moving			
24	to new building	23,083	-	-
25	Purchase equipment for remodeled space in old Ritter Hall			
26	vacated by activities moving to new building	11,000	-	-
27				
28	Los Angeles Campus:			
29	Replace inadequate and deteriorated primary electrical switch-			
30	gear and feeder cables	-	-	76,530
31	Temporary building 3-L (theater arts)—alter building to pro-			
32	vide room for motion picture projection and rehearsal	-	-	10,000
33	Chemistry-geology building—expand branch library by remov-			
34	ing wall and utilizing corridor space	-	-	10,300
35	Correct settling on north side of engineering building	-	-	10,000
36	Men's and women's gymnasiums—partition, paint, and venti-			
37	late areas for increased utilization	-	6,400	-
38	Men's gymnasium—provide additional exit facilities to comply			
39	with State Fire Marshal's requirement	-	16,600	-
40	Art building—install spray booth and make minor improve-			
41	ments to exhibit facilities	-	2,800	-
42	Chemistry-geology building—engineering building—life sciences			
43	building—install sun-control devices for heat control	-	23,700	-
44	Chemistry-geology building—install audio-visual facilities in			
45	auditorium-classroom 2276	-	4,500	-
46	Install sidewalks and electroliers on north side of Le Conte			
47	Avenue between Gayley and Westwood Blvd.	-	9,000	-
48	Chemistry-geology building—convert room 4242 into expanded			
49	space for geology library	-	10,000	-
50	Chemistry-geology building—convert room 1653 into research			
51	laboratory for institute of geophysics	-	15,900	-
52	Men's and women's gymnasium—install new basketball back-			
53	boards and standards and recondition outdoor basketball			
54	court	-	6,000	-
55	Engineering building—improve ventilation in room 2032 to			
56	make space usable as a classroom	-	4,000	-
57	Install new water main connection to campus from Hilgard			
58	Avenue near Mira Hershey Hall	7,500	-	-
59	Alterations to business administration and economics building			
60	—convert room 55 to teaching laboratory for production			
61	management and construct mezzanine stack in library			
62	of industrial relations and business administration, re-			
63	leasing space for seminar use	13,900	-	-
64	Convert space in Franz Hall vacated by psychology clinic			
65	school to teaching laboratories for psychology department	6,000	-	-
66	Los Angeles Medical Center:			
67	Waterproof and flash exterior	-	-	45,000
68	Medical Center—General—install furnishings, including benches			
69	and chairs, essential for utilization of outside court areas	-	-	10,000
70	Hospital—install electronic eye to control doors and elevators			
71	9, 10, 15, 16	-	-	9,000
72	Hospital dietary—improve ventilation in offices and employees			
73	dining areas	-	-	3,000
74	Medical Center—enlarge laboratory to accommodate house staff			
75	and students; install additional laboratory facilities in			
76	rooms 47-175 and 48-188	-	-	3,000
77	Medical Center vivarium—install hot and cold water facilities,			
78	sink, bathtub, and amphibian tank in room 23-183N;			
79	install hot and cold water and standard vivarium sinks in			
80	rooms 43-183S and 33-215K	-	-	2,600
81	Medical center—install edging and bracing on shelving for			
82	safety, and complete laboratory benches in various areas	-	5,000	-
83	Medical center—install partitions in rooms 47-175 and 48-188			
84	to provide additional laboratory space	-	3,000	-
85	Install by-pass steam line to medical center to insure unint-			
86	errupted steam supply	7,500	-	-

3				
4				
5				
6				
7	Mt. Hamilton Campus:			
8	Provide additional apartment in unfinished area of dormitory building	-	-	\$10,500
9	Construct and equip new heating plant	-	\$16,200	-
10	Install emergency water supply system	-	7,500	-
11	Main building—replace windows and exterior doors	-	10,000	-
12	Construct residence for astronomer	\$20,000	-	-
13	Construct road to emergency water supply	5,000	-	-
14	Riverside Campus:			
15	Social sciences and humanities building—install sun-control louvers for first and second story faculty offices on west side	-	-	6,400
16	Install sprinkler system for physical education field	-	-	6,400
17	Library building—make minor improvements	-	1,600	-
18	Library building—install additional bookstacks for expanded collections	-	8,000	-
19	Construct 2 tennis courts	-	17,000	-
20	Physical science building—convert 2 storage rooms into labora- tories and develop storage room from space under lecture hall	11,000	-	-
21	San Francisco Campus:			
22	Metabolic laboratory—install fire sprinkler system	-	-	10,000
23	Medical research building No. 1—rehabilitate and modify heating and ventilating system	-	-	17,000
24	Medical sciences building increment 1—install sun-control devices	-	-	20,000
25	Pave, install fencing, construct carport for animal receiving building	-	5,400	-
26	Hooper Foundation Building—install fire sprinkler system	-	12,000	-
27	Shop building—install fire sprinkler system	-	5,000	-
28	Provide 2 storage facilities in service area of Moffitt (Teach- ing) Hospital for storage of patient equipment and main- tenance equipment	-	17,000	-
29	Construct shops at corporation yard and pave and fence en- larged corporation yard area	-	20,000	-
30	Develop surface parking in the incinerator area	-	5,000	-
31	Install suicide-proofing barricades on fire escape stairwells ad- jacent to patient areas in H. C. Moffitt Hospital and medical sciences building	15,600	-	-
32	Renovate physiotherapy pool in clinics building	4,500	-	-
33	Modernize elevators in clinics building	24,400	-	-
34	Old medical building—remove deteriorated bell tower and re- place roof	19,500	-	-
35	Renovate steel window sash in clinics building	22,000	-	-
36	Santa Barbara Campus:			
37	Convert room in building 440 to military science rifle range	-	-	9,000
38	Convert classroom space in building 406 to 5 biological science laboratory offices	-	-	5,000
39	Convert space in buildings 420 and 479 to laboratories for physical education	-	-	16,300
40	Convert space for administration expansion	-	20,000	-
41	Construct 2 tennis courts	-	17,000	-
42	Convert space for biological science laboratory	-	13,000	-
43	Construct permanent animal house with laboratory for bio- logical science and psychology	-	20,000	-
44	Install domestic water line to buildings 464 and 465	2,800	-	-
45	Athletic field area—construct building for restrooms and storage	15,000	-	-
46	Minor alteration and improvement projects	—13,222 ^a	-	-
47	Expenditures From Fair and Exposition Fund			
48				
49	Berkeley Campus:			
50	Alter and modernize room 307 of Agriculture Hall—ento- mology and parasitology	-	-	8,000
51	Install ventilating hood and drying chamber in room 115 of Mulford Hall	-	-	9,000
52	Construct storage shed for organic solvents and chemical rea- gents at forest products laboratory	-	-	11,500
53	Install roof temperature tanks in plant pathology greenhouse	-	-	20,000
54	Remodel service-storage building—Gill Tract	-	-	5,000
55	Expand distilled water facilities in home economics building	-	-	6,000
56	Agriculture Hall—alter space for landscape architecture	-	4,000	-

^a Unexpended balances previously reported as expended in a prior year.

5				
6	Berkeley Campus—Continued			
7	Forestry—convert storage space in room 26, Mulford Hall, to			
8	teaching laboratory	-	\$6,000	-
9	Gill Tract—remodel insectary to provide 4 culture and segre-			
10	gation rooms for biological control work	-	9,856	-
11	Gill Tract—rehabilitate and expand irrigation and drainage			
12	system	-	20,000	-
13	Forestry—make improvements to Meadow Valley summer			
14	camp, step 2	-	20,000	-
15	Hearst Greenhouse Range—install smog protection equipment			
16	in 4 greenhouses	-	12,000	-
17	Construct building for bioclimatic chambers on Gill Tract		2,900	-
18	Gill Tract—install fence and provide water for area A	\$3,500	-	-
19	Oxford Tract—improve roads, fences, drainage system, reha-			
20	bilitate old field building; improve landscaping	20,000	-	-
21	School of Forestry summer camp at Meadow Valley—install			
22	pipeline, bring in telephone service, make improvements			
23	to building facilities	4,000	-	-
24	Gill Tract—convert space in headhouse No. 3 into 6 offices and			
25	a photographic darkroom	13,200	-	-
26	Hilgard Hall—remodel obsolete laboratory (room 23) for soil			
27	physics research	10,000	-	-
28	Hearst Greenhouse Range and Gill Tract—install smog-control			
29	systems in genetics greenhouses	3,000	-	-
30	Hearst Greenhouse Range and Gill Tract—install smog con-			
31	trol, install sink in forestry headhouse	1,500	-	-
32	Modernize room 204, Agriculture Hall, as teaching laboratory			
33	for entomology and parasitology	1,284	-	-
34	Davis Campus:			
35	Construct storage-laboratory building for landscape			
36	management	-	-	\$20,000
37	Install irrigation facilities in fields A-3 and B-2 for viticulture	-	-	5,600
38	Dairy industry creamery—repair and bring up to health			
39	standards	-	-	31,600
40	Install laboratory henches (4) in room 150D, 150E, and 150F			
41	of food technology building	-	-	12,100
42	Construct extension of headhouse No. 31 for vegetable crops	-	-	12,000
43	Install central supply facilities for compressed air and vacuum			
44	in dairy industry building	-	-	3,700
45	Install walls for building which houses aseptic glass packing			
46	line for food technology (includes lighting, ventilation,			
47	and electrical bus bar)	-	-	5,250
48	Develop reserve-book reading room	-	-	20,000
49	Install pipelines (1.5 miles) and water troughs in field C-2			
50	for animal husbandry	-	-	20,000
51	Bring electric wiring up to code in campus buildings, step 1	-	-	25,000
52	Install hood and alter rooms 255 and 256 in home economics			
53	building	-	-	7,000
54	Replace and improve fencing for animal husbandry	-	-	18,500
55	Widen street and add sidewalks on California Avenue between			
56	Hutchison Drive and corporation yard	-	12,000	-
57	Install 20 refrigerated drinking fountains in older buildings	-	4,600	-
58	Genetics—construct lathhouse and headhouse	-	10,000	-
59	Animal husbandry—provide domestic water supply to beef field			
60	laboratory and sheep barn on area C-2	-	6,500	-
61	Animal husbandry—beef field laboratory and steer shed, install			
62	concrete slabs and feed bins	-	10,000	-
63	Irrigation—construct storage shed	-	10,500	-
64	Hopkins Tract (area D)—supplement and expand domestic			
65	water supply system	-	20,000	-
66	Provide additional sidewalks near memorial union, and make			
67	other landscaping and site improvements	-	5,000	-
68	Install security fence around poultry space in area D-1	-	15,000	-
69	Construct irrigation reservoir for areas B-6, B-7, B-8, B-9	-	15,000	-
70	Food technology—construct equipment storage building	-	20,000	-
71	Install rabbit-proof fencing in areas B-6, B-7, B-8, B-9 (15,500			
72	feet) and E-3 (8,300 feet)	-	17,250	-
73	Plant nematology—construct lathhouse	-	4,000	-
74	Irrigation—construct outdoor water measurement laboratory	-	17,000	-
75	Purchase of metering devices on the campus wells	-	15,000	-
76	Augmentation funds for Putah Creek Bridge project	-	3,180	-
77	Regrade and seal coat unsurfaced parking areas adjacent to			
78	chemistry building and library and administration building	6,528	-	-
79	Irrigation corporation yard—construct enclosure and pave			
80	yard area	10,500	-	-

7	Davis Campus—Continued:			
8	Armstrong barn—construct concrete floor and stanchions for			
9	mud-free handling of large animals in veterinary science			
10	instruction	\$4,000	-	-
11	Construct a shelter outside the chemistry building for the stor-			
12	age of inflammable, explosive, and toxic chemicals	6,000	-	-
13	Modernize lighting in the botany, physics, and horticulture			
14	annex buildings	8,700	-	-
15	Animal science building—replace deteriorated steam lines	25,000	-	-
16	Hopkins Tract—replace power panel	25,000	-	-
17	Install fire alarm boxes in buildings and connect them to			
18	campus fire alarm system	17,750	-	-
19	Plant pathology—construct lathhouse	12,000	-	-
20	Horticulture building—renovate auditorium, replacing seats			
21	and installing floor covering	9,250	-	-
22	Irrigation—construct outdoor drainage laboratory	4,000	-	-
23	Viticulture—construct 12 lysimeters	4,000	-	-
24	Campus boundary survey	21,000	\$500	-
25	Campus water study	7,500	-	-
26	Construct facilities for the new bacterial canker research			
27	project	31,000	-	-
28	Entomology building—provide laboratory facilities for pesti-			
29	cide residue research	17,000	-	-
30	Animal science building—augmentation funds to rehabilitate			
31	electrical system	7,500	-	-
32	Irrigation and vegetable crops—install rabbit-proof fencing	4,600	-	-
33	Los Angeles Campus:			
34	Subtropical horticulture area—subtropical horticulture—in-			
35	crease electrical capacity and install facilities for pre-			
36	cooling studies of fruits	-	-	\$7,500
37	Ornamental horticulture area—plant pathology—construct			
38	and install plant beds in field area north of plant path-			
39	ology greenhouse, including paved walks and steam line	-	-	8,000
40	Ornamental horticulture area—entomology—termitarium			
41	10'x13'x8'	-	-	1,600
42	Subtropical horticulture area—subtropical horticulture—pave			
43	soil-bin area and parking strips, extend access road to			
44	Westwood Blvd., and install barriers and gates	-	-	11,000
45	Plant physiology—botany—provide and install desmogification			
46	equipment in greenhouses	-	-	20,000
47	Ornamental horticulture area—landscape area	-	-	20,000
48	Botanical garden—installation of fencing	-	10,000	-
49	Ornamental horticulture area—entomology—construct metal			
50	lathhouse (40' x 40')	-	10,500	-
51	Ornamental horticulture area—floriculture and ornamental			
52	horticulture—provide and install smog removal equipment			
53	in floriculture glasshouse rooms 100-L, 100-M, and 100-N.			
54	replace fume hood and ducts in room 100-D	-	13,350	-
55	Ornamental horticulture area—floriculture and ornamental			
56	horticulture—install 3 controlled environment plant grow-			
57	ing chambers, each 9' x 12', with insulated walls, air con-			
58	ditioning and high heat intensities in the floriculture head-			
59	house	-	30,540	-
60	Ornamental horticulture area—construct concrete cold frames			
61	for floriculture	10,000	-	-
62	Subtropical horticulture area—construct storeroom addition to			
63	building A	3,664	-	-
64	Ornamental horticulture area—construct 6 semi-portable glass-			
65	house isolation units for ornamental horticulture	8,000	2,244	-
66	Subtropical horticulture area—install ventilating equipment			
67	in glasshouse rooms 100, 100-B, and 100-C of building A			
68	and glasshouse rooms 102-A, 102-B, and 102-F of build-			
69	ing B	4,200	-	-
70	Subtropical horticulture area—extend paved orchard road on			
71	east side of building site area	3,030	-	-
72	Botanical garden—preparation of arable land	7,500	-	-
73	Ornamental horticulture area—construct inoculation chambers			
74	in plant pathology glasshouses	3,500	-	-
75	Subtropical horticulture area—install fume hood in room 100			
76	of building B	1,500	-	-
77	Ornamental horticulture area—construct 10 soil storage bins	3,500	-	-
78	Ornamental horticulture—heating plant and utilities	13,000	-	-
79	Riverside Campus:			
80	Purchase and install wind machines for frost protection	-	-	19,000
81	Construct greenhouse for indexing foreign citrus importations			
82	under quarantine procedures	-	-	20,000
83	Soils and plant nutrition building—ventilate spectrograph en-			
84	closure and soil preparation room	-	-	5,500
85				
86				

UNIVERSITY OF CALIFORNIA—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS, AND EQUIPMENT—Continued			
2	Expenditures From Fair and Exposition Fund—Continued			
3	Riverside Campus—Continued			
4	Develop equipment protection for air pollution area	—	—	\$12,800
5	Purchase and install wind machines for frost protection	—	\$18,000	—
6	Install irrigation and drainage facilities for sagebrush land south of field S-1	—	20,000	—
7	Install irrigation supply line from Gage Canal to field S-6 and S-4	—	32,000	—
8	Install sprinkler irrigation system for avocado breeding orchard	—	5,000	—
9	Relocate and place in operating condition 4 walk-in refriger- ator boxes	—	6,500	—
10	Baldwin Park—construct 8 fumigation enclosures for bearing orange trees and 2 glasshouses	—	15,000	—
11	Soils and plant nutrition—install high metal lath fence for wind protection for water cultures	—	6,000	—
12	Provide necessary fencing, wind machines, and orchard heaters on the 78-acre southwest grove	\$44,200	—	—
13	Provide utilities to site of air pollution research	24,959	—	—
14	Purchase and install wind machines	15,000	—	—
15	Construct lathhouses for plant pathology and plant biochemistry	12,000	—	—
16	Construct greenhouse soil facility building and soil storage bins	20,000	—	—
17	Horticulture—construct cold storage room	3,000	—	—
18	Repair irrigation line	5,000	—	—
19	Develop Valencia Avenue along east boundary of campus	12,459	—	—
20	General:			
21	Hopland—clear 200-acre watershed and install water-and- debris measuring stations	—	—	9,000
22	Hopland—construct machinery storage facilities, step 2	—	—	7,500
23	Meloland—complete drainage and irrigation system	—	—	20,000
24	Whitaker's Forest—repair damage to facilities	—	—	21,000
25	Meloland—construct equipment storage buildings	—	—	6,000
26	Antelope Valley—construct additional residence and additional storage facilities for seed and machinery	—	18,000	—
27	Hopland—construct supply storage building	—	6,000	—
28	Meloland—replace cast iron domestic water lines with transite line	—	8,000	—
29	Meloland—enclose patios on all duplexes	—	2,500	—
30	South Coast—construct laborers' cottages	—	20,000	—
31	Meloland—replace irrigation pipeline	15,000	—	—
32	Hopland—construct 1 laborer's cottage	10,882	—	—
33	Meloland—air-condition laborers' cottages	15,000	—	—
34	Tulelake—establish equipment shelter	5,000	—	—
35	TOTAL EXPENDITURES (Minor Construction)	\$915,884	\$972,420	\$920,790
36	Capital Outlay and Savings Fund	397,678	488,500	491,640
37	Fair and Exposition Fund	518,206	483,920	429,150
38	TOTAL EXPENDITURES, CAPITAL OUTLAY	\$16,790,061	\$34,984,169	\$54,503,190
39	Capital Outlay and Savings Fund	11,372,941	15,693,567	2,908,800
40	State Construction Program Fund ^c	—	13,738,057	45,808,047

DEPARTMENT OF EMPLOYMENT

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1				
2	The proposed appropriations will provide for the continuation of the department's building program started in 1948-49. The long-term			
3	building program of the Department of Employment proposes to replace leased premises with state-owned buildings where eco-			
4	nomically sound.			
5	The department is presently leasing office space in many communities throughout the State. The acquiring of state-owned buildings			
6	will represent in the future a substantial savings in rent paid by the department. The Federal Bureau of Employment Security			
7	will provide a rental grant to the Department of Employment which will be used to amortize the cost of the building projects			
8	over a reasonable number of years. Similar grants will also be made for maintenance and repair costs during and after amortiza-			
9	tion.			
10	The proposed projects would provide sufficient working space correctly designed to meet the specific needs and would be designed to			
11	provide for future expansion. The department is continuing its efforts to build an outstanding employment service in California;			
12	and experience here and elsewhere in the nation indicates that suitable premises definitely contribute to employer and applicant			
13	acceptance of the program. With properly designed facilities the department can give better service to employers, applicants, and			
14	claimants.			
15	Funds are proposed for the construction of an office building in Huntington Park; expansion of the Fullerton office; site development			
16	for Santa Rosa and Salinas; and preliminary plans for the 1959-60 Fiscal Year Capital Outlay projects.

General Activities

GENERAL ANALYSIS

The proposed capital outlay program in this budget for the 1958-59 Fiscal Year includes no new major construction. It is limited to alterations to existing buildings. New state office buildings are being constructed under the authority of the State Building Construction Act of 1955 and are financed through the issuance of trust certificates by the State Public Works Board. The anticipated expenditures are shown in the appendix section.

Provision is made for alterations and improvements to the existing state buildings in San Francisco so that the actual alterations to these buildings may be started when the new State Building Annex is completed. Also included are funds for alterations to the Education Building and to Office Building No. 1 in Sacramento due to regrouping of tenant agencies to provide adequate facilities.

Provision is also made for 5 essential minor construction projects including establishment of a snack bar-type of vending stand in Office Building No. 2 in Sacramento.

REAL PROPERTY ACQUISITION

ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^b

Purchase of Real Property for Office Building Sites:

Fresno	\$1,200	\$148,800	-
Stockton	3,200	146,800	-
San Francisco (garage)	5,271	134,729	-
San Jose	-	250,000	-
San Diego	495,772	-	-
San Bernardino	-	250,000	-
Sacramento	-	650,000	-
Los Angeles	578	1,250,000	-

TOTAL EXPENDITURES (Real Property Acquisition) (Capital Outlay and Savings Fund)

\$506,021	\$2,830,329	-
-----------	-------------	---

MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT

PROPOSED 1958-59 EXPENDITURES ^a

Working plans for alterations and improvements to existing State

Building—San Francisco	-	-	\$42,000
------------------------	---	---	----------

Provides funds for drawings so that alterations may be accomplished as soon as old state building is vacated.

Working plans for alterations and improvements office space—515 and 540 Van Ness Ave., San Francisco

	-	-	7,000
--	---	---	-------

Provides funds for drawings so that alterations may be accomplished as soon as old building is vacated.

Construction Funds for Projects With Working Drawings

Alterations and improvements to existing state buildings—San Francisco

When the new State Building Annex is completed, a general relocation of agencies will be made to provide for necessary expansion and to increase efficiency of space layouts. Agencies now occupying leased quarters will be moved to their state-owned facility. The alterations to the old buildings are necessary to tie into the new annex floor-by-floor to allow for continuous use of each floor for agency space assignment.	-	-	1,000,000
--	---	---	-----------

Alterations to existing Education Building—Sacramento

Capital Outlay and Savings Fund	-	-	90,000
---------------------------------	---	---	--------

Provides necessary expansion for the Department of Education and the Teachers' Retirement System.

Alterations to Office Building No. 1—Sacramento

Capital Outlay and Savings Fund	-	-	60,400
---------------------------------	---	---	--------

Provides funds so that various agencies may be provided adequate space.

^a From State Construction Program Fund unless otherwise indicated.

^b From Capital Outlay and Savings Fund unless otherwise indicated.

State Fair and Exposition

Chapter 1071, Statutes of 1957, appropriated \$3,747,843 in 1957-58 and a like amount in 1958-59 from the General Fund together with the proceeds from sale of present facilities, and Chapter 1072, Statutes of 1957, authorized the State Public Works Board to issue either certificates or revenue bonds in the amount of \$6,500,000 annually for a period of 2 years to finance the construction of buildings and facilities for a new state fair. The projected date of the fair at the new site is 1960.

Anticipating the move to the new State Fair site the management has eliminated several construction projects and reduced the scope of others budgeted for the current year. This will result in a reversion of \$195,365 to the Fair and Exposition Fund.

MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENTPROPOSED 1958-59 EXPENDITURES ^e

New State Fair facilities -----	—	—	\$7,495,687
To provide facilities on the new site in Sacramento County for conducting the annual state fair and interim activities. This project is estimated to be completed in time to accommodate the 1960 fair.			

ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^f

Program development for new State Fair -----	—	\$132,955	—
Capital Outlay and Savings Fund -----			
Construct 2 racehorse barns -----	—	22,367	—

3	Sixth District Agricultural Association			
4				
5	Provision is made for the final research, planning design, construction and installation of the aviation exhibit. This exhibit is to			
6	be housed on the second floor of the existing building. Funds for the alteration and improvements of this area and for prelim-			
7	inary research and design were provided by the Budget Act of 1957. This amount represents approximately one-half of the total			
8	cost as the aviation industry will contribute the remaining funds.

DEPARTMENT OF CALIFORNIA HIGHWAY PATROL

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	This statewide traffic law enforcement agency functions through a Sacramento headquarters and field offices strategically located on major highways throughout the State. The department operates about 1,300 mobile units with nearly 2,500 uniformed officers. Their jurisdiction is limited to streets and highways outside incorporated areas. This budget provides for purchase of a highway site in Merced to relocate the office on the main highway which is being rerouted. Provision is included for an automotive shop on the training academy grounds to properly install the police and other emergency vehicle equipment on an excess of 700 automobiles annually.

DEPARTMENT OF MENTAL HYGIENE—Continued

GENERAL ANALYSIS

The Department of Mental Hygiene currently operates statewide, 8 hospitals for mentally ill patients, 3 hospitals for mentally retarded patients, and 2 hospitals housing both mentally ill and mentally retarded patients. In addition, it is planned that wards and other physical facilities of the new Fairview State Hospital, located near Costa Mesa, Orange County, will be utilized for mentally retarded patients about January, 1959. Provision was made in the 1957-58 Capital Outlay budget for bringing utility connections to the site acquired for a new hospital for the mentally ill in the San Fernando Valley. However, based on population and patient forecasts, it does not now appear that additional mentally ill bed capacity will be needed for several years and the unexpended balance of funds appropriated for site development are being reverted.

The Langley Porter Clinic for teaching, research, and clinical purposes in connection therewith, is operated by the department in conjunction with the University of California Medical School at San Francisco. Construction of a similar facility, the Neuropsychiatric Institute as part of the Los Angeles Medical School of the University has been authorized and is expected to be completed during the 1959-60 Fiscal Year.

Due to the leveling off of the mentally ill patient population, no major construction projects for additional bed capacity are proposed in this budget. As of June 30, 1957, 34,191 beds were available for an actual mentally ill population of 36,319, with an overcrowding of 2,128 patients. By June 30, 1959, 35,451 beds will be available for an estimated patient population of 36,051, with an overcrowding of 600 patients. An additional 1,078 presently funded beds will become available by the end of the 1959-60 Fiscal Year, at which time it is estimated that overcrowding for mentally ill patients will be eliminated. The tables that follow set forth in detail actual and estimated populations, and indicate the latest estimates of availability of presently funded capacity.

Additional mentally retarded patients are admitted as bed capacity and related treatment buildings become available, and a moderate amount of overcrowding occurs in order to fully utilize the facilities. As of June 30, 1957, 8,786 beds were available. These beds together with those presently funded, will provide a total bed capacity of 11,401 on June 30, 1959, and 11,681 by June 30, 1960. Patient population forecasts indicate that it will not be necessary to fund any additional mentally retarded capacity in this budget. The tables that follow include population and capacity estimates for the mentally retarded also.

The Langley Porter Neuropsychiatric Institute now has a rated capacity of 110 including 15 beds for the day-night hospital program. Completion of the 4-story addition in 1959-60 will add 8 additional beds as well as expand research and training facilities. As mentioned above, similar facilities will be completed at the Los Angeles Medical School of the University of California in the 1959-60 Fiscal Year, and will have a capacity of 196 beds. Thus, a total institute bed capacity of 314 beds will be available at that time.

While no additional bed capacity is proposed in this budget, a number of other major projects are included. They provide necessary service facilities, equipment for projects nearing completion, and essential improvements at the various hospitals, and are explained under their respective budgets. Essential minor construction projects in the amount of \$1,431,698 are proposed for all hospitals. These projects include fluoridation of the water supply of the mentally retarded hospitals for the prevention of dental decay of the children cared for there; the construction of a playground area on the roof of the 4-story addition at the Langley Porter Institute to replace play area lost due to construction of this facility; and construction of a badly needed firehouse at Patton State Hospital. Other projects are detailed in the individual budgets.

(See Page 780 for Summary of all Department of Mental Hygiene Capital Outlay Projects.)

Langley Porter Neuropsychiatric Institute

This institute in conjunction with the University of California School of Medicine in San Francisco, operates a research, training, and acute treatment center for Northern California. The institute had a rated bed capacity of 110 on September 30, 1957. The 4-story addition which was funded in the 1956-57 Fiscal Year is planned for completion in the 1959-60 Fiscal Year which will increase the bed capacity to 118. The minor construction proposal includes provision for a screened play area on the roof of the 4-story addition, and the complete painting of the exterior and interior of the building.

51	Agnews State Hospital			
52				
53	This hospital for the mentally ill shows a rated bed capacity of 3,623 as of September 30, 1957. Completion of the new receiving and			
54	treatment building, which is planned for the 1959-60 Fiscal Year, will add 512 beds to the present capacity. No additional bed			
55	capacity is submitted for the budget year; however, several other major projects including construction of a new administration			
56	building for the east area, water storage tank and settling basin, alterations and improvements to kitchen and dishwashing rooms,			
57	ward buildings, east area, and equipment for the new receiving and treatment building are proposed. These projects are explained			
58	in detail below. Minor construction projects totaling \$118,560 are also included to correct deficiencies and improve the hospital's			
59	physical plant.			
60				
61	MAJOR CONSTRUCTION, IMPROVEMENTS,			
62	AND EQUIPMENT			
63				
64	PROPOSED 1958-59 EXPENDITURES ^a			
65				
66	Construct administration building, east area	—	—	\$877,400
67	Project is primarily required to provide adequate administrative			
68	office space and office space for professional positions currently located in temporary offices and in areas intended for			
69	other uses. The project consists of the construction of a 2-			
70	story office building. Services, site development, roads, walks,			
71	paving and necessary mechanical and electrical work are			
72	included. Working plans were funded in the 1957-58 Fiscal			
73	Year.			
74	Construct water storage tank and settling basin, east and west			
75	areas	—	—	71,350
76	Project is for improvements and additions to the domestic water			
77	supply at both the east and west areas. The project consists			
78	of the construction of a metal settling basin, relocation of			
79	booster pumps in new metal pump house, installation of sand			
80	and water separator, and all necessary appurtenances. Related			
81	demolition, mechanical and electrical work is included.			
82	^a From State Construction Program Fund unless otherwise indicated.			
83	^c Expenditures from bond funds not included in budget totals.			
84	* This structure will be located on the University campus. The appropriations were made to the University and construction will be			
85	under general supervision of the University. However, the items were budgeted as a Department of Mental Hygiene project on the			
86	basis that the institute is primarily for mental hygiene purposes.

Camarillo State Hospital

This hospital for the mentally ill shows a rated bed capacity of 6,271 as of September 30, 1957. 2 projects were funded in the current year which will provide additional bed capacity of 63 in the 1959-60 Fiscal Year. The major program for the budget year includes equipment for a business and medical office building and a project to provide alterations and improvements to the steam plant. Minor construction projects totaling \$134,968 are included to correct deficiencies and to improve the physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENTPROPOSED 1958-59 EXPENDITURES ^b

Boiler plant alterations	-	-	\$133,550
Project will provide alterations and improvements to the existing steam plant to produce adequate steaming capacity, increased plant efficiency and reliability. The project to include the removal of 2 existing inadequate boilers and installation of a new boiler complete with all required accessories. Project also includes certain mechanical and electrical alterations and replacements to existing appurtenances to make existing plant operate efficiently.			
Equip business and medical office building	-	-	22,000
To properly equip business and professional offices in the 2-story business and medical office building funded in the 1957-58 Fiscal Year.			

^b From Capital Outlay and Savings Fund unless otherwise indicated.

4	Metropolitan State Hospital			
5	This hospital for the mentally ill has a rated bed capacity of 2211 as of September 30, 1957. Completion of the new ward buildings			
6	now under construction will add 1600 beds in 1958-59, and an additional 200 beds are currently funded and will be available			
7	in the 1959-60 Fiscal Year. This budget proposes the remodeling of 3 old buildings for commissary expansion and classrooms			
8	together with the necessary equipment. The project is explained in detail below. Minor construction projects totaling \$85,730			
9	are included to correct deficiencies and improve the hospital's physical plant.			
10

Modesto State Hospital

This hospital for mentally ill and mentally retarded patients shows a rated bed capacity of 3,195 as of September 30, 1957. No additional bed capacity is under construction or funded, however, it is planned to deactivate an old ward of 50 beds for the mentally retarded, during the budget year. This will make a total rated bed capacity of 3,145 by June 30, 1959. No major construction is proposed for the budget year. Minor construction projects totaling \$141,600 are included to correct deficiencies and to improve the physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENTESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^b

Alterations and improvements to kitchen	—	\$136,100	—
Preliminary Plans For:			
Alterations and improvements to kitchen	\$1,350	—	—
TOTAL EXPENDITURES (Major Construction) (Capital Outlay and Savings Fund)	\$1,350	\$136,100	—
MINOR CONSTRUCTION, IMPROVEMENTS, REPAIRS, AND EQUIPMENT ^b			
Install automatic controls for ward heating	—	—	\$6,000
Replace floor covering	—	—	15,000
Linoleum renewal in corridors	—	—	7,000
Repair and replace floors in ward kitchens and dining rooms	—	—	5,800
Remodel closed porches	—	—	5,600
Construct sun shelters in ward yards	—	—	12,000
Fence yard for motor vehicle storage and move gas station	—	—	3,200
Complete effluent irrigation system	—	—	3,000
Improve main electrical substation	—	—	8,500
Replace laundry equipment	—	—	40,500
Provide fire protection in wards	—	—	25,000
Renovation of wards	\$55,256	\$24,744	10,000

^b From Capital Outlay and Savings Fund unless otherwise indicated.

Patton State Hospital

This hospital for the mentally ill shows a rated bed capacity of 3,872 on September 30, 1957. The completion of 2 new ward buildings during the 1959-60 Fiscal Year will provide for 1,072 new beds which will make the total rated bed capacity 4,944 by June 30, 1960. While no further additional bed capacity is planned, 4 major projects relating to the expansion of the hospital are explained in detail below. Minor construction projects totaling \$246,400 are included to correct deficiencies and to improve the physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENTPROPOSED 1958-59 EXPENDITURES^a

Construct addition to administration building	-	-	\$682,500
Project will provide office space for professional personnel and the hospital medical records division currently housed in overcrowded or temporary areas and areas intended for other uses. The project to consist of the construction of a 3-story addition to the existing administration building. Necessary and related mechanical and electrical work, site work, services and grounds development work and alterations to existing building are included. Working plans funded in 1957-58 Fiscal Year.			
Convert old kitchen building to commissary building	-	-	104,000
Capital Outlay and Savings Fund			
Project will consist of required alterations and additions to convert the old kitchen building to a commissary. Necessary demolition, mechanical and electrical work, including refrigeration, plumbing, and grading and paving at loading dock are included.			
Additional cost of sewage disposal facilities	-	-	204,850
Capital Outlay and Savings Fund			
To provide additional funds to meet the \$407,750 cost to the State for sharing in a sewage disposal district with the East San Bernardino County Water District. The \$204,850 will supplement the \$202,900 appropriated by Chapter 1 Statutes of 1956.			
Equip 2 ward buildings, 1072-bed capacity	-	-	391,200
Capital Outlay and Savings Fund			
Provide necessary equipment to properly equip 2 new ward buildings, 1072-bed capacity, funded in the 1955-56 Fiscal Year.			

^a From State Construction Program Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

Stockton State Hospital

This hospital for the mentally ill shows a rated bed capacity of 4,237 on September 30, 1957. It is planned to deactivate Cottage No. 2 with a capacity of 102 in the 1958-59 Fiscal Year, and the old main male building with a capacity of 521 by July 1, 1959. Funds were appropriated to replace these structures in 1957-58 Budget. However, due to the leveling off of patient population in the State, this replacement of capacity will not be necessary until 1963, and the presently appropriated funds are scheduled for reversion.

The major construction program includes construction of an addition to the administration building, conversion of a recovery area in the receiving and treatment building to a ward, and replacement of a boiler at the steam plant. These projects are explained in detail below. Minor construction projects totaling \$67,300 are included to correct deficiencies and to improve the physical plant.

MAJOR CONSTRUCTION, IMPROVEMENTS,
AND EQUIPMENTPROPOSED 1958-59 EXPENDITURES ^a

Construct addition to administration building-----	-	-	\$130,925
Project will provide office space for administrative personnel currently housed in overcrowded facilities or operating in areas intended for other uses. The project to consist of a 1-story addition to the existing building. Certain alterations within the existing building, related site, mechanical, electrical and demolition work is included.			
Replace boiler at steam plant-----	-	-	126,700
Capital Outlay and Savings Fund			
Project will provide for the replacement of an existing, low capacity, 35-year-old boiler in poor condition with a new boiler of greater capacity in order that the steam plant will meet the required peakload requirement. Removal of an existing boiler; necessary and appurtenant controls and meter platforms and walkways; foundations; electrical work; insulation and painting are included.			
Convert recovery area in receiving and treatment building to a ward (48 beds)-----	-	-	51,550
Capital Outlay and Savings Fund			
Project will provide for alterations and additions necessary to convert male and female recovery area to a 48-bed ward.			

^a From State Construction Program Fund unless otherwise indicated.

^c Expenditures from bond funds not included in budget totals.

5	Fairview State Hospital			
6	This is a new hospital for the mentally retarded, and it is planned to receive the first patients beginning January 1, 1959. At that			
7	time, adequate facilities for care and treatment will be available and equipped. Bed capacity will be 1,665, and an additional			
8	capacity of 250 is currently funded and will be available in the 1959-60 Fiscal Year.			
9	Major projects included in the budget provide for further site development, the construction of a building to house the library,			
10	occupational therapy, canteen and barbershop, construction of additional school facilities, and equipping of all school facilities			
11	planned thus far. These projects are explained in detail below. The minor construction program includes an addition to the com-			
12	missary building, and fluoridation of the domestic water supply.			
13				
14	MAJOR CONSTRUCTION, IMPROVEMENTS,			
15	AND EQUIPMENT			
16				
17	PROPOSED 1958-59 EXPENDITURES ^a			
18				
19	Site development—Units 5 and 6	—	—	\$71,000
20	Project is continuation of site development and consists of finish			
21	grading, furnishing planting, sprinklers, walks, terraces, and			
22	fencing.			
23	Construct library, occupational therapy, canteen, and barbershop			
24	building	—	—	603,900
25	Project will provide a building to house the library, various oc-			
26	cupational therapy areas, canteen and barbershop to serve			
27	an ultimate patient population of 4,000. Working plans were			
28	funded in 1957-58.			
29	Construct school, phase II	—	—	104,100
30	Project will provide a 4-classroom addition to school, phase I,			
31	funded under Chapter 1-56. Phase I and phase II will pro-			
32	vide for 255 children patients with one-half on full-time at-			
33	tendance and one-half on half-day attendance.			
34	Equip school, phases I and II	—	—	88,380

6	Pacific State Hospital			
7	This hospital for the mentally retarded shows a rated bed capacity of 2,867 on September 30, 1957. While no additional bed capacity			
8	is proposed for the budget year, major projects included provide for a continuation of the program to modernize and repair old			
9	wards and to remodel the old laundry building for maintenance shops. These projects are described in detail below. Minor con-			
10	struction projects totaling \$86,920 are included to correct deficiencies and to improve the physical plant.			
11				
12	MAJOR CONSTRUCTION, IMPROVEMENTS,			
13	AND EQUIPMENT			
14				
15	PROPOSED 1958-59 EXPENDITURES ^b			
16	Modernize and repair 2 wards.....	-	-	\$310,000
17	This project is the fourth increment of a program to modernize			
18	and repair the 9 oldest wards in the institution and consists			
19	of alterations and additions to Wards 9 and 10 to provide			
20	facilities more nearly conforming to present day hospital			
21	standards. The construction of a serving kitchen, installation			
22	of new partitions, additions and alterations to existing me-			
23	chanical and electrical systems, demolition, site work and			
24	certain equipment are included.			
25	Remodel old laundry building for maintenance shop building.....	-	-	182,600
26	Project provides for alterations and additions to existing old			
27	laundry building for use as maintenance shops, maintenance			
28	warehouse and chief of maintenance office. Included are: a			
29	new paved and fenced corporation yard; demolition; neces-			
30	sary alterations and additions to mechanical and electrical			
31	systems; site improvement; and certain equipment are in-			
32	cluded.			
33	Equip 2 wards.....	-	-	7,000
34	Equip maintenance shop.....	-	-	12,400
35				
36				
37	ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^b			
38				
39	Hospital annex equipment.....	\$102,505	\$95,527	-
40	Equip addition to kitchen.....	-6,750 ^d	-	-
41	Site development at ward buildings.....	-75,000 ^d	-33,800 ^d	-
42	Modernize and repair 2 wards (third increment).....	-	268,800	-
43	Equip and repair 2 wards.....	-	6,000	-
44	Equip new laundry.....	-	8,200	-
45	Install mechanical ventilation system in medical ward.....	-	62,200	-
46	Equip 2 wards.....	-	6,000	-
47	Additional mechanical services for enlarged hospital.....	-	472,100	-
48	Equip and repair 2 wards.....	-	3,000	-
49	Alterations to old school building.....	101,550	-	-
50	Equip therapy shops and offices.....	-	8,750	-
51	Construct new laundry building.....	1,047,900	-41,000 ^d	-
52	Modernize 2 wards (second increment).....	200,450	-	-
53	Remodel and enlarge kitchen and commissary.....	-1,336 ^d	-	-
54	Construct 3 ward buildings.....	-	-8,440 ^d	-
55	Equip 3 ward buildings.....	62,111	8,097	-
56	Equip 12 ward buildings.....	-19 ^d	-	-
57	Additional utility and mechanical services.....	55,800	-	-
58	Equip laundry (additional cost).....	-7,589 ^d	-	-
59	Administration building annex.....	-1,939 ^d	-	-
60	Preliminary Plans for:			
61	Maintenance shop building.....	-	4,000	-
62	Physical therapy annex.....	-	1,000	-
63	Warehouse addition.....	-	1,600	-
64	Additional parking facilities.....	-	2,000	-
65	Modernize 2 wards.....	-	930	-
66	Modernize and repair wards 11 and 12.....	1,140	-	-
67	Additional mechanical services.....	2,120	-	-
68	Modernize and repair 2 wards.....	3,000	-	-
69				
70	TOTAL EXPENDITURES (Major Construction) (Capital			
71	Outlay and Savings Fund).....	\$1,483,943	\$864,964	\$512,000

^b From Capital Outlay and Savings Fund unless otherwise indicated.^d Unexpended balances previously reported as expended in a prior year.

4	Sonoma State Hospital			
5	This hospital for the mentally retarded shows a rated bed capacity of 2,907 as of September 30, 1957. The completion of the funded			
6	new 6-ward building of 700 beds during the budget year will bring the total rated bed capacity to 3,607 by June 30, 1959. Major			
7	projects included in the budget provide for construction of an addition to the laundry with equipment and also the construction			
8	of an addition to the general warehouse. These projects are required to meet the needs of the expanded hospital population and			
9	physical plant. Minor construction projects totaling \$137,580 are included to correct deficiencies and to improve the physical plant.

MILITARY DEPARTMENT

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	GENERAL ANALYSIS			
2				
3				
4	The capital outlay program of the Military Department comprises the construction of armories, warehouses, rifle ranges, and other			
5	facilities essential to the organization, training, and morale of the California National Guard and the California Air National			
6	Guard. The long-range construction program would provide armories and other facilities to house and train all units.			
7	Since the 1951-52 Fiscal Year the Federal Government, under Public Law 783, Eighty-first Congress, has participated in the con-			
8	struction of armories on a cost sharing basis. Federal funds have been made available on the basis of up to 75 percent of			
9	qualifying phases of the construction.			
10	In addition to federal participation in the construction of armories, certain facilities such as: motor vehicle storage buildings,			
11	warehouses, airplane hangars, and shop buildings, primarily for the care and maintenance of federal equipment issued for state			
12	use, are financed entirely from federal funds except for the cost of planning and supervision of construction which is provided by			
13	the State.			
14	The capital outlay program for 1958-59 proposes additional funds for plans and supervision of construction of facilities to be			
15	financed from federal funds. It proposes that presently authorized funds be used to construct 14 armories in various areas as			
16	approved by the Budget Act of 1957. Delays in construction have occurred due to problems in site acquisition and failure			
17	of the Federal Government to administratively release sufficient appropriated construction funds to match state appropriations.

DEPARTMENT OF MOTOR VEHICLES

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	This service and tax collection agency, headquartered in Sacramento, functions through field offices located in all population centers			
2	throughout the State. During the budget year the department will register and collect the taxes and fees on an excess of 7,000,			
3	000 vehicles, issue new and renewed drivers licenses to about 2,500,000 applicants and license an estimated 10,000 automobile			
4	dealers and 500,000 automobile salesmen.			
5	This budget provides for state-owned land and office buildings in locations where existing facilities are inadequate to properly serve			
6	the existing population and privately-owned facilities are not available for leasing, and plans will be prepared and property pur-			
7	chased to expand the headquarters building.			
8				
9	REAL PROPERTY ACQUISITION			
10				
11	PROPOSED 1958-59 EXPENDITURES ^g			
12				
13	Purchase of site for Sacramento headquarters office building-----	-	-	\$285,000
14	For the purchase of a site for construction of Sacramento head-			
15	quarters office building. The existing facility is not adequate			
16	due to a greater workload than was anticipated when the			
17	building was constructed.			
18	Purchase of site for San Jose office building-----	-	-	100,000
19	For the purchase of a site to relocate the existing office. The			
20	present facility does not have an adequate area for off-			
21	street parking and on-street parking is not available. The			
22	office is overcrowded and adequate facilities are not avail-			
23	able for the staff or the public.			
24	Purchase of site for Santa Barbara office building-----	-	-	50,000
25	A rapidly increasing workload has rendered the present leased			
26	facility incapable of handling the volume of business occur-			
27	ring in the area.			
28	Purchase of site to provide off-street parking facilities for the Los			
29	Angeles office-----	-	-	150,000
30	The public parking situation at the Los Angeles office has reached			
31	a point where some relief must be provided. Off-street park-			
32	ing facilities are not available at the present time.			
33	Purchase of site for Stockton office building-----	-	-	80,000
34	Off-street parking facilities are not available at the existing			
35	leased location. Searches indicate that it is not possible to			
36	obtain adequate rental facilities.			
37	Purchase of site for Riverside office building-----	-	-	80,000
38	The present facility is leased from the Division of Forestry and			
39	they have indicated a need for the entire facility.			
40				
41	ESTIMATED 1956-57 AND 1957-58 EXPENDITURES ^g			
42				
43	Purchase of site for Glendale office building-----	\$213	\$149,787	-
44	Purchase of site for San Diego office building-----	346	214,654	-
45	Purchase of site for addition to Sacramento headquarters office			
46	building-----	-	275,000	-
47	Purchase of site for Hollywood office building-----	-	200,000	-
48	Purchase of site of Fresno office building-----	-	100,000	-
49	Purchase of site for Long Beach office building-----	-	200,000	-
50	Purchase of site for El Centro office building-----	-	40,000	-
51	Purchase of site for San Francisco office building-----	-	350,000	-
52				
53	TOTAL EXPENDITURES (Real Property) (Motor Vehicle			
54	<i>Fund)</i> -----	\$559	\$1,529,441	\$745,000
55				
56	MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT			
57				
58	PROPOSED 1958-59 EXPENDITURES ^g			
59				
60	Working drawings for Sacramento headquarters-----	-	-	\$350,000
61	To provide plans for construction of the Sacramento headquarters			
62	office building. The existing facility is not adequate due to a			
63	greater workload than was anticipated when the building			
64	was constructed.			
65	Convert second floor of warehouse to office building—Los Angeles---	-	-	56,250
66	To provide additional space required for driver improvement and			
67	registration investigation functions in the Los Angeles area.			
68	Construct office building—San Francisco-----	-	-	365,000
69	The present leased facility does not have off-street parking facilities.			
70	Construct office building—Hollywood-----	-	-	244,000
71	The present leased facility does not have off-street parking facilities.			
72	Traffic conditions are hazardous for driving tests. On-street			
73	parking is so restricted that it is unavailable for the public.			
74	Construct office building—Fresno-----	-	-	265,300
75	To relocate existing office due to inadequate office space and			
76	parking facilities.			
77	Construct office building—Santa Barbara-----	-	-	116,700
78	A rapidly increasing workload has rendered the present leased			
79	facilities incapable of handling the volume of business occur-			
80	ring in the area.			
81	Construct office building—Long Beach-----	-	-	242,400
82	The existing building is state-owned and is not adequate due to			
83	its improper location which does not provide service to the			
84	population concerned. Off-street parking facilities are not			
85	available. The existing facility will be sold.			
86	^g From Motor Vehicle Fund unless otherwise indicated.

DEPARTMENT OF FISH AND GAME

LINE	CAPITAL OUTLAY EXPENDITURES.	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	GENERAL ANALYSIS			
2				
3				
4				
5	The proposed 1958-59 Capital Outlay Budget provides for real property acquisition including a 3 $\frac{1}{4}$ -acre parcel of land in the Tulelake			
6	area which the department has leased for several years from the Federal Bureau of Reclamation and on which a building			
7	has been constructed for use of law enforcement personnel while on patrol during the hunting season. The land is being put			
8	up for sale and the State proposes to purchase the parcel to protect its investment and maintain the facility for department			
9	use. A second parcel of land of approximately 5 acres is required as a site for construction of a new water filtering system			
10	at the Mount Whitney Hatchery. The present deep well-type filter is badly deteriorated and soon will not supply sufficient			
11	water to operate the hatchery. A 1-acre sand-type filter with necessary appurtenances is planned.			
12	Minor construction projects include the construction of a new water filtering system at the Mount Whitney Hatchery; a new boat			
13	to replace the patrol boat Pompano; and various small projects for improvements and repairs to batcheries, game farms,			
14	game and waterfowl management areas, and marine resources facilities.			
15				
16				
17	REAL PROPERTY ACQUISITION			
18				
19	PROPOSED 1958-59 EXPENDITURES ^h			
20				
21	Purchase of building site from Federal Bureau of Reclamation----	-	-	\$1,000
22	To purchase site of state-owned building. Site is now leased but			
23	the federal bureau plans to put the property up for sale.			
24	Site for water filtering system at Mt. Whitney Hatchery-----	-	-	5,000
25	To purchase sufficient land for construction of a water filtering			
26	system proposed in the minor construction section for			
27	1958-59. Replacement of the present inadequate system is			
28	necessary to prevent possible loss of trout.			
29				
30	TOTAL EXPENDITURES (Real Property Acquisition) (Fish			
31	and Game Preservation Fund)-----	-	-	\$6,000
32

Wildlife Conservation Board

GENERAL ANALYSIS

Continuation of the acquisition, construction, and improvements of wildlife conservation projects is planned. The \$9,000,000 appropriated by Chapter 1327, Statutes of 1947, and the \$3,000,000 in revenue provided by Chapter 1401, Statutes of 1951, has been allocated to projects by the Wildlife Conservation Board. Additional revenue of \$750,000 each fiscal year was provided by Chapter 1313, Statutes of 1955. The budget reflects the actual and estimated expenditure of funds previously allocated to specific projects by the Wildlife Conservation Board, and estimated expenditures from revenue provided by Chapter 1313, Statutes of 1955.

REAL PROPERTY ACQUISITION AND CONSTRUCTION,
IMPROVEMENTS, REPAIRS, AND EQUIPMENT¹

50	Fish hatchery and stocking projects-----	\$95,027	\$48,989	-
51	For constructing and equipping of facilities for fish hatching and stocking.			
52	Warm water and other fish projects-----	282,804	527,753	\$500,675
53	For the acquisition and development of additional warm water fish lakes in various parts of the State.			
54	Flow maintenance and stream improvement projects-----	39,976	86,765	49,746
55	For the construction of small dams to provide stream flow during summer months. This will improve the fishing on many miles of streams.			
56	Fish screen and ladder projects-----	34,401	7,000	8,000
57	To prevent loss of fish through water diversions and to permit passage of fish over stream obstructions.			
58	Waterfowl projects-----	340,945	288,204	75,093
59	For the acquisition and development of waterfowl management areas to provide for duck depredation control and public hunting.			
60	General projects-----	7,327	183,109	284,278
61	To provide roads, trails, and parking areas to assist in access to ocean beaches and fishing areas.			
62	Special projects-----	10,218	8,000	5,456
63	For projects evaluation, land acquisition, and engineering studies of potential projects by the Wildlife Conservation Board staff.			
64				
65	TOTAL EXPENDITURES, CAPITAL OUTLAY (Wildlife Restoration Fund)-----	\$810,698	\$1,149,820	\$923,248

DEPARTMENT OF NATURAL RESOURCES—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	Division of Beaches and Parks			
2				
3				
4	The major responsibility of the Division of Beaches and Parks continues to be the acquisition and development program initiated			
5	by the 1956 and 1957 Legislatures. This program was developed to meet critical deficiencies in the recreational resources of			
6	the State. It was funded to a great extent with revenues received from impounded tideland oil money. Continuing revenues			
7	from the State Lands Act Fund have also been made available. Legislation enacted during the 1957 General Session provided			
8	for a revenue level of \$12,000,000 annually to support the division and to supplement acquisition and development resources.			
9	These moneys were to be transferred from the revenues of the State Lands Act Fund. Present estimates indicate that the			
10	total funds available for transfer will be insufficient to provide the revenue level previously anticipated. As a result, the			
11	program of the Division of Beaches and Parks is over-appropriated. Appropriation balances of \$24,142,365 for State Park			
12	Acquisition and Capital Outlay remain unexpended at the close of the 1958-59 Fiscal Year. These balances together with sub-			
13	sequent years development program and operating expenses must be met from a June 30, 1959 estimated State Beach and Park			
14	Fund surplus of \$11,675,061 and the subsequent revenues made available to the fund.			
15	The following table indicates projection estimates of revenues and expenditures and resulting deficit in the fund by June 30, 1961:			
16				
17				
18	Surplus, July 1	1959-60	1960-61	
19	Estimated Revenue to Be Realized:	\$11,675,061	\$6,326,969	
20	State Lands Act Fund (Authorized \$12,000,000)	\$9,400,000	\$9,400,000	
21	All Other	699,412	667,500	
22				
23	Total Resources Available	\$21,774,473	\$16,394,469	
24	Estimate of Expenditure Requirements:			
25	Support	\$7,924,000	\$8,716,000	
26	Acquisition (Carryover Appropriations) *	4,523,504	11,492,623	
27	Development:			
28	Carryover Appropriation **	—	8,126,238	
29	Additional Appropriations	3,000,000	3,000,000	
30				
31	TOTAL EXPENDITURES	\$15,447,504	\$31,334,861	
32				
33	Surplus, June 30	\$6,326,969	—\$14,940,392	
34				
35	Although all the areas included in the five-year plan are incorporated in this budget, the time-consuming task of consummating			
36	an acquisition program of this magnitude may reasonably be expected to extend over a period of several years. The sequence			
37	of acquisition is to be determined by the Park Commission. Programs are subject to review by the State Public Works Board.			
38	The major construction program proposed is directed primarily toward the expansion of facilities at existing parks and beaches			
39	so that the benefits from these expenditures may be realized as quickly as practicable. There are, however, several instances			
40	of initial development of state parks and beaches to provide recreational areas in regions of the State now seriously defi-			
41	cient in such facilities or to provide relief from overcrowded conditions at existing state parks.			
42	The minor construction projects proposed are for the most part required to correct deficiencies in the facilities of various units			
43	of the State Park System; to provide facilities for improved utilization of existing parks and beaches, and to repair or replace			
44	deteriorated facilities.			
45	In addition to the above, the budget anticipates continuation of collateral programs such as riders' and hikers' trails; roadside rests;			
46	and the Redwood Highway relocation.			
47	Because of increased costs of acquiring and rehabilitating the historic ships Tongass and Thayer, provision is made for the reap-			
48	propriation of a portion of the funds previously made available for a state park in San Francisco.

DEPARTMENT OF NATURAL RESOURCES—Continued

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1				
2				
3	Division of Beaches and Parks—Continued			
4				
5	MAJOR CONSTRUCTION, IMPROVEMENTS,			
6	AND EQUIPMENT			
7				
8	PROPOSED 1958-59 EXPENDITURES †			
9				
10	Caswell State Park:			
11	Picnic units (44)-----	-	-	\$4,200
12	Group picnic area-----	-	-	4,750
13	Comfort stations (2)-----	-	-	18,000
14	Roads and parking-----	-	-	43,152
15	Powerlines-----	-	-	1,140
16	Water system-----	-	-	10,050
17	Standard 4-car garage-----	-	-	6,000
18	Fill and grading-----	-	-	3,600
19	Fencing-----	-	-	8,663
20	Telephone-----	-	-	500
21	Standard office and contact station-----	-	-	6,000
22	The above items are the basic facilities and developments			
23	necessary to open this new park area for public use.			
24	Further development will be required as the public use			
25	pattern is determined.			
26	Clear Lake State Park:			
27	Kelsy Creek Channel correction-----	-	-	97,183
28	To eliminate flooding of the lakeshore area of Clear Lake			
29	State Park and to prevent erosion of the stream banks.			
30	This will make it possible to develop the lakeshore area			
31	in the park for public use.			
32	Columbia Historic State Park:			
33	Restoration of the Duchow, and Leavitt and Walker Buildings-----	-	-	60,000
34	Complete restoration is recommended in the 1948 Master			
35	Development Plan. The master plan recommends buildings			
36	be furnished with display materials to simulate the			
37	original or principal use. These 2 buildings continue the			
38	progressive restoration of Columbia.			
39	Donner Memorial State Park:			
40	Camp units (50)-----	-	-	11,000
41	Combination building-----	-	-	14,000
42	Comfort station-----	-	-	10,000
43	Powerline extension-----	-	-	1,980
44	Roads and parking-----	-	-	36,000
45	Water system extension-----	-	-	7,220
46	Area cleanup-----	-	-	700
47	Existing facilities of 100 campsites are being used to capacity.			
48	A new campground will accommodate a portion of the de-			
49	mands for camping facilities in this area.			
50	El Capitan Beach State Park:			
51	Camp units (53)-----	-	-	11,660
52	Combination building-----	-	-	14,000
53	Comfort station-----	-	-	10,000
54	Power extension-----	-	-	4,000
55	Gas line extension-----	-	-	1,000
56	Road-----	-	-	12,600
57	Parking spurs-----	-	-	7,250
58	Landscaping-----	-	-	7,525
59	Chain link fence-----	-	-	1,200
60	The water system for this campground is now under contract			
61	and it is important that the campground be completed as			
62	soon as possible to provide additional public use facilities.			
63	Folsom Lake State Park:			
64	Beals Point Area:			
65	Comfort station and dressing room (portable)-----	-	-	8,000
66	Waterline-----	-	-	10,000
67	Powerline-----	-	-	2,000
68	Parking area grading-----	-	-	64,000
69	The west side of Folsom Lake has had extremely heavy use			
70	during the past 2 years because of the proximity to			
71	large population areas. A pattern of dispersal is being			
72	developed as a means of alleviating over use in the			
73	relatively limited areas. This request is for the con-			
74	tinuing development of Beals Point, money having			
75	already been appropriated for the entrance road and			
76	kiosk.			
77	Mormon Island Area:			
78	Boat ramp—100 feet wide-----	-	-	30,000
79	Roads and parking-----	-	-	20,100
80	Kiosk-----	-	-	4,500
81	This will be the initial development on the east side of			
82	Folsom Lake. The boat ramp will provide facilities			
83	convenient to the city of Folsom and other areas in			
84	El Dorado County.			
85	† From State Beach and Park Fund unless otherwise indicated.			
86

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1				
2				
3				
4				
5	MAJOR CONSTRUCTION, IMPROVEMENTS,			
6	AND EQUIPMENT—Continued			
7				
8	PROPOSED 1958-59 EXPENDITURES i—Continued			
9				
10	Henry Cowell Redwoods State Park:			
11	Office and kiosk -----	-	-	\$12,000
12	Comfort stations (2) -----	-	-	20,000
13	Group areas (2) -----	-	-	15,120
14	Parking areas -----	-	-	10,128
15	Overflow parking area -----	-	-	2,000
16	Existing group areas do not meet demand. All of these facili-			
17	ties are in accord with the master plan.			
18	MacKerricher Beach State Park:			
19	Water line extension -----	-	-	11,000
20	Roads and parking area -----	-	-	50,915
21	Lake development -----	-	-	12,500
22	Comfort stations (2) -----	-	-	9,000
23	The 1956-57 Budget provided funds for the development of			
24	additional camp sites. Increased activity and attendance			
25	now call for the development of parking for the beach and			
26	development of Lake Cleone for boating and fishing. Many			
27	of the beaches are not now accessible except for long			
28	walks. Roads with parking areas are needed to provide			
29	adequate access for numerous fishermen and other beach			
30	uses.			
31	McArthur-Burney Falls Memorial State Park:			
32	Camp units (55) -----	-	-	11,980
33	Water system -----	-	-	10,250
34	Roads and parking -----	-	-	46,750
35	Combination building -----	-	-	14,000
36	Comfort station -----	-	-	9,000
37	Area cleanup -----	-	-	1,500
38	Powerline -----	-	-	1,875
39	Signs and barrier posts -----	-	-	500
40	For the past 4 years from July 1st through Labor Day the			
41	present 62 campsites have been fully occupied. Daily dur-			
42	ing this period visitors desiring to camp are turned away,			
43	often reaching a high of 100 parties. The park serves an			
44	area where there are no other state parks and where			
45	U. S. Forest Service campgrounds are limited. The area			
46	proposed for development is ideally suited for camping and			
47	has no features that would contribute to excessive costs.			
48	Morro Bay State Park:			
49	Water system -----	-	-	127,750
50	The water system is a new development to replace present			
51	public water supply ruined by infiltration of salt water.			
52	This is a serious and urgent problem, being the only source			
53	of water to this park, where public attendance is in excess			
54	of 600,000 people annually.			
55	Patrick's Point State Park:			
56	Individual picnic units (90) -----	-	-	27,000
57	Group picnic unit -----	-	-	11,000
58	Group camp -----	-	-	25,820
59	Seasonal employees' quarters (6) -----	-	-	4,800
60	Combination building, special design -----	-	-	7,500
61	Roads and parking -----	-	-	55,108
62	Underground powerline -----	-	-	3,600
63	Water system -----	-	-	51,240
64	Picnicking facilities are inadequate at this park. On summer			
65	weekends, more than 100 families per day have been trying			
66	to use the existing 32 units. Group and family picnicking			
67	will be provided for by establishing a separate group area			
68	and by adding individual picnic units. This is an increas-			
69	ingly popular area on a spectacular section of coastline with			
70	an improved highway, No. 101, passing through the park.			
71	Attendance increased by 10,000 visitors in the past year.			
72	San Buenaventura Beach State Park:			
73	Comfort station (2) -----	-	-	48,000
74	Administration building -----	-	-	35,000
75	Parking area -----	-	-	31,000
76	This is part of the continuing development program for this			
77	park. Present sanitary facilities are not adequate to handle			
78	dressing room functions and the existing park administra-			
79	tion building cannot be used for the multiple functions			
80	necessary for an operation of this scope.			
81	i From State Beach and Park Fund unless otherwise indicated.

4				
5	MAJOR CONSTRUCTION, IMPROVEMENTS, AND EQUIPMENT—Continued			
6				
7				
8	PROPOSED 1958-59 EXPENDITURES—Continued			
9				
10	Silver Strand Beach State Park:			
11	Concession building	—	—	\$21,800
12	Comfort station, first aid and concession combination (bay side)	—	—	46,800
13	Dressing room additions (3)	—	—	31,900
14	Ramada picnic units (25)	—	—	5,000
15	Equipment storage building	—	—	10,600
16	Comfort stations and dressing rooms (2)	—	—	53,300
17	Bay beach improvement	—	—	2,700
18	Promenade ramadas (12)	—	—	44,700
19	Lifeguard stands (2)	—	—	2,200
20	Landscaping	—	—	6,400
21	Water line extension	—	—	25,000
22	Signs	—	—	4,000
23	Area lighting	—	—	42,500
24	Architecture fees, plans, supervision of construction, and con-			
25	tingencies	—	—	32,800
26	These items will complete the planned development of the			
27	area, forming a well-planned unit designed to handle			
28	intensive use.			
29	Stinson Beach State Park:			
30	Comfort station with dressing room	—	—	25,000
31	Comfort station (1)	—	—	10,000
32	Lifeguard stands (4)	—	—	2,000
33	Picnic units (50)	—	—	7,000
34	Picnic walk	—	—	2,610
35	Picnic area, cleanup and grading	—	—	1,000
36	Park road	—	—	13,600
37	Parking area	—	—	45,800
38	Walk and header	—	—	3,147
39	Concrete curb	—	—	6,381
40	Stinson Beach, as yet undeveloped, had 361,981 visitors in 1956.			
41	The few existing facilities are inadequate for such a heavy			
42	attendance. These projects are in accord with the master			
43	plan.			
44	Sutter's Fort State Historical Monument:			
45	Central building repairs	—	—	55,000
46	The fort was built in 1837 and restored in 1900; since that			
47	time little money has been spent in repairs to the struc-			
48	ture. Powder post beetles and termites have been very			
49	active in the timbers of the building. With the many			
50	thousands of visitors, including many school children, it			
51	is the division's responsibility to take positive steps to			
52	make this structure as safe as possible. Sutter's Fort has			
53	a very important place in California history and the			
54	setting and surroundings should be as accurate as possible			
55	with the time period that is depicted.			
56	Tomales Bay State Park:			
57	Residence	—	—	17,500
58	Waterline extension	—	—	12,350
59	Roads and parking	—	—	20,925
60	Beach facilities	—	—	4,750
61	These expenditures will open the Indian Beach area to public			
62	use. Beach facilities will afford protection of swimmers			
63	from motorboats. The improvements are in accordance			
64	with the master plan.			
65	Hearst Castle State Historical Monument:			
66	Roads, parking and drainage structures	—	—	157,500
67	Comfort station and waiting room	—	—	33,000
68	Sewage disposal	—	—	5,000
69	Bus turning area	—	—	5,000
70	Remodel building to office	—	—	15,000
71	Reconditioning other structures and facilities	—	—	21,000
72	Engineering and overhead	—	—	19,500
73	With the acceptance of the Hearst Castle as an historical			
74	monument it is incumbent on the State to provide the			
75	developments and facilities necessary to open the estate			
76	to public view.

47	Analysis				
48					
49					
50	The Riding and Hiking Trail, authorized by Chapter 112, Statutes of 1946, was to be a 3,000-mile statewide loop. This was later				
51	amended to authorize secondary trails after completion of the statewide loop. Chapter 1536, Statutes of 1955, authorized lateral				
52	trails concurrently with the statewide loop to accelerate the program and provide for more effective use.

3				
4				
5	ROADSIDE RESTS			
6	Analysis			
7				
8	This project provides for the establishment and development of a statewide system of roadside rests. It is estimated that the original			
9	appropriation for roadside rests will be expended by the close of the current year and will result in acquisition and completion			
10	of approximately 30 units. The construction of an additional 30 units during 1958-59 at an additional cost of \$330,000 is proposed.			
11

26				
27				
28	ACQUISITION AND RESTORATION OF HISTORIC SHIPS			
29	Analysis			
30				
31	Because of the part played by early day sailing and steam schooners in development of California, this project was established to create			
32	a fitting monument. The project will provide for purchasing, moving, and rehabilitation of the 3-masted schooner, C. A. Thayer,			
33	and the steam schooner, Tongass. These 2 schooners will be displayed by the San Francisco Maritime Museum through agreement			
34	with the State Park Commission. Purchase and restoration of the Thayer has been completed and the ship is now in San Fran-			
35	cisco available for exhibit. The Tongass is being purchased and will be restored and brought to San Francisco also. In order to			
36	complete the transaction and provide 2 fully restored ships for public exhibit, an additional amount of \$206,000 is required. It is			
37	proposed to appropriate this amount from the \$2,000,000 provided for a state park in San Francisco.

52				
53	REDWOOD HIGHWAY RELOCATION			
54	Analysis			
55				
56	This project provides funds for acquisition of real property, construction and other costs related to the relocation of the highway			
57	through and in the vicinity of the Humboldt Redwoods State Park (U.S. 101). The funds proposed for 1958-59 expenditure			
58	are for development of certain needed access facilities to the state park, from funds appropriated in prior years.

Total Expenditures	\$12,556,404	\$29,218,334	\$22,913,697
Accumulated Surplus, June 30	\$33,268,832	\$16,874,534	\$11,675,636

* Of this amount, \$3,088,459 was originally withheld from transfer from the State Lands Act Fund because of a potential need in the 1956 flood damage program. Although these funds were eventually not required for flood damages, timing caused this amount to be transferred instead to the Investment Fund. The remaining \$5,000,000 represents the difference between the \$12,000,000 anticipated as a transfer during 1956-57 by Chapter 2367, Statutes of 1957 and \$7,000,000 which would have been transferred under prior legislation. Chapter 2367, Statutes of 1957 proposed transfer effective for the 1956-57 Fiscal Year; however, the legislation did not become effective until September 11, 1957, and a retroactive transfer was not possible.

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	Division of Forestry			
2				
3				
4				
5	The proposed capital outlay program for the 1958-59 Fiscal Year includes funds for acquisition of sites for lookout towers and fire			
6	control stations as further implementation of the continuing program of acquiring title to lookout and fire suppression sites now			
7	occupied under lease or easement.			
8	Major construction projects include an addition to the office at District I Headquarters based on an increased manpower in the dis-			
9	trict office, replacement of the Shasta County office with an office providing larger space required for recently added personnel,			
10	replacement of the office and barracks at Riverside County Headquarters based on the poor condition of the present facility and			
11	construction of a forestry camp at Folsom Lake to work on state park projects in addition to fire fighting and other forestry			
12	work. This will be a winter-use facility to utilize inmate work crews now at Beaver Creek in the summer. In addition working			
13	drawing and site development funds are provided for 2 additional forestry camps for Department of Corrections' inmates.			
14	The minor construction program provides for expansion of the Beaver Creek Forestry Camp to 60-man capacity, the Woodland Fire			
15	Control Station, shop and equipment storage buildings at Red Bluff and Oroville, and various improvement projects at fire con-			
16	trol stations and other facilities. Roads, truck trail, and bridge construction suitable for inmate work projects are also included.

CALIFORNIA OLYMPIC COMMISSION

LINE	CAPITAL OUTLAY EXPENDITURES	NO. OF POSITIONS			ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59	CHANGE FROM 1957-58
		56-57 (Filled)	57-58 (Auth.)	58-59 (Auth.)				
1	TOTAL EXPENDITURES				\$594,716	\$7,278,142	\$588,238	—\$6,689,904
2	State Beach and Park Fund				594,716	7,278,142	92,101	—7,186,041
3	Special Deposit Fund				—	—	496,137	496,137
4								
5								
6	GENERAL ANALYSIS							
7	The California Olympic Commission was established by Chapter 124, Statutes of 1955, which became effective on June 18, 1955,							
8	with the awarding of the VIIIth Winter Olympic Games to Squaw Valley, California, by the International Olympic Committee.							
9	The commission is composed of 5 members appointed by the Governor. The duties of the commission are to provide facilities for							
10	the 1960 Winter Games with the funds made available by the State; to encourage and assist participation in these games by							
11	persons from all parts of the world; to co-operate to the fullest extent with the Government of the United States and with							
12	other persons, corporations and agencies concerned with staging the winter games in California in 1960; and to engage in such							
13	other activities as may be necessary or desirable to make the holding of the games in California a success.							
14	Chapter 1069, Statutes of 1957, provides that all facilities constructed by the California Olympic Commission shall be transferred							
15	to the Division of Beaches and Parks, Department of Natural Resources, for inclusion in the State Park System as soon as							
16	practicable after the completion of the games and in no event later than June 30, 1960.							
17	The commission has negotiated a master contract with the Organizing Committee, VIII Olympic Winter Games, Squaw Valley,							
18	California, U. S. A., 1960, Incorporated, the organization appointed by the United States National Olympic Committee and							
19	authorized by the International Olympic Committee to stage the games.							
20	The location of the facilities and all plans for the development of the site have been completed and construction is in progress. It is							
21	anticipated that all major construction work will be completed during the budget year.

DIVISION OF HIGHWAYS—Continued

**Additional Statements of Expenditures and Obligations and Revenues for 1956-57 and 1957-58 Fiscal Years,
Submitted Pursuant to Section 143.2, Streets and Highways Code**

Statement 1—Comparison of proposed expenditures and obligations for the 1957-58 Fiscal Year in the current budget with proposed expenditures and obligations for the 1957-58 Fiscal Year as shown in the budget submitted to the 1957 Session of the Legislature.

Statement 2—Expenditures and obligations incurred for the 1956-57 Fiscal Year as revised to June 30, 1957, compared to budget allocations presented to the 1956 and 1957 Sessions of the Legislature.

Statement 3—Detail of major project allocations for construction of highways and bridges for the 1957-58 Fiscal Year as revised to November 1, 1957, compared to budget allocations presented to the 1957 Session of the Legislature.

Statement 4—Detail of major project allocations for construction of highways and bridges for the 1956-57 Fiscal Year as revised to June 30, 1957, compared to budget allocations presented to the 1956 and 1957 Sessions of the Legislature.

Statement 5—Expenditures for maintenance by routes for 1956-57 Fiscal Year.

Statement 6—Comparison of revised revenue estimates for the 1957-58 Fiscal Year with budget estimates submitted to the 1957 Session of the Legislature.

REASONS FOR REVISIONS

¹ Savings—funds in excess of project requirements.

² Project or portion of project deferred.

³ Decrease due to change in scope of work.

⁴ Decrease, project or portion of project financed from other funds.

⁵ Additional project to install or revise traffic regulatory or safety devices.

⁶ Additional project to alleviate hazardous traffic conditions.

⁷ Additional funds required because of low budget estimate or higher construction costs.

⁸ Additional funds required because of revision of design standards or scope of work.

⁹ Additional project to improve deficient roadway or structure.

¹⁰ Additional project to improve drainage.

¹¹ Additional project to improve traffic service.

¹² Additional project to relieve traffic congestion.

¹³ Additional project to improve traffic safety.

¹⁴ Additional project to provide improved traffic weighing facilities.

¹⁵ Additional project to replace a deteriorated or destroyed structure.

¹⁶ Additional project to repair a deteriorated roadway or structure.

¹⁷ Additional project to provide for erosion control of roadside and for delineation.

¹⁸ Additional project or funds, work deferred from prior year.

¹⁹ Additional project to stabilize slide area or remove underground water.

²⁰ Additional project, work advanced from ensuing year's budget.

²¹ Additional project, experimental bridge painting project.

²² Additional project, State's share of highway relocation for dam, canal, and levee construction, or airport expansion.

²³ Additional funds to cover increases in project costs.

²⁴ Additional project for erosion control.

²⁵ Additional project to acquire materials for use on construction.

²⁶ Additional project, reconditioning of ferryboats.

²⁷ Additional project, storm damage repair.

²⁸ Additional project, construction specified by right-of-way agreements.

REASONS FOR REVISIONS

- ¹ Savings—funds in excess of project requirements.
- ² Project deferred.
- ³ Decrease due to change in scope of work.
- ⁴ Decrease, project or portion of project financed from other funds.
- ⁵ Additional project to install or revise traffic regulatory or safety devices.
- ⁶ Additional project to alleviate hazardous traffic conditions.
- ⁷ Additional funds required because of low budget estimate or higher construction costs.
- ⁸ Additional funds required because of revision of design standards or scope of work.
- ⁹ Additional project to improve deficient roadway or structure.
- ¹⁰ Additional project to improve drainage.
- ¹¹ Additional project to improve traffic service.
- ¹² Additional project to relieve traffic congestion.
- ¹³ Additional project to improve traffic safety.
- ¹⁴ Additional project to provide drains for future freeway construction.
- ¹⁵ Additional project to replace a deteriorated or destroyed structure.
- ¹⁶ Additional project to repair a deteriorated roadway or structure.
- ¹⁷ Additional project to provide for erosion control of roadside and for delineation.
- ¹⁸ Additional project or funds, work deferred from prior year.
- ¹⁹ Additional project to stabilize slide area or remove underground water.
- ²⁰ Additional project, Martinez-Benicia Ferry safety improvements.
- ²¹ Additional project to replace traffic stripe obliterated by construction.
- ²² Additional project, State's share of highway relocation for dam, canal and levee construction.
- ²³ Additional funds to cover increases in project costs.
- ²⁴ Additional project for erosion control.
- ²⁵ Additional project to acquire materials for use on construction.
- ²⁶ Additional project, deferred railroad billings.
- ²⁷ Additional project, storm damage repair.
- ²⁸ Additional project, construction specified by right-of-way agreements.

6	The Capital Outlay program of the Department of Veterans Affairs affects only the Veterans' Home since the Woman's Relief Corps							
7	Home was leased to a private party in the 1953-54 Fiscal Year.							
8	The Veterans' Home, a 2,415-bed facility, is located near Yountville, Napa County. It is a home for aged and disabled, honorably							
9	discharged former members of the armed forces. The site of the home is on a hillside with both single- and 2-story buildings							
10	and a 4-story hospital. Most of the structures of the institution have been replaced in recent years or are in good condition.							
11	The budget proposes an additional 216 beds to be completed in the 1960-61 Fiscal Year.

DEPARTMENT OF WATER RESOURCES

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	FEATHER RIVER PROJECT AND NORTH BAY AQUEDUCT			
2				
3				
4	The Capital Outlay budget for 1958-59 includes funds to finance the design and exploration, and right-of-way and acquisition activity			
5	including marketing studies on 5 major projects. They are the San Joaquin Aqueduct, San Luis Reservoir, Upper Feather River,			
6	North Bay Aqueduct, and Oroville Features. In addition provision is made for test canal section in the San Joaquin subsidence			
7	area.			
8	The budget for 1957-58 provides for a carryover of \$1,080,000 from Item 419.5, Budget Act of 1956, for acquisition of San Luis			
9	Reservoir.			
10				
11	San Joaquin Valley Aqueduct			
12				
13	Exploration of the conduit route for design purposes will be			
14	made from the Intake Pumping Plant to Arenal Gap. It is			
15	also proposed to complete the design, plans and specifications of			
16	a major portion of the aqueduct from Intake Pumping Plant to			
17	the San Luis Reservoir. In connection with the design of the			
18	aqueduct, it will be necessary to prepare plans for utilities to			
19	be relocated and make surveys to stake the designed aqueduct			
20	line on the ground. Due to changes in the original aqueduct			
21	route to obtain the most economical line, photogrammetric map-			
22	ping will be necessary on portions of the alignment.			
23				
24	San Luis Reservoir			
25				
26	The work on the San Luis Reservoir will include the rights			
27	of way surveys required for determining the location of the			
28	proposed take line on the ground. The costs of appraisals and			
29	right of way negotiations for acquiring all of the reservoir not			
30	previously bought is included. The Marketing Section will			
31	continue with operation studies of the San Luis Reservoir in			
32	order to determine the best operation and utilization of off-peak			
33	energy and will confer with the purveyor of power as to the			
34	timing and ability to deliver off-peak energy for pumping			
35	purposes. It is proposed to substantially complete the geological			
36	exploration necessary for the foundations of the main dam, the			
37	forebay dam, and the borrow areas for material for these dams.			
38	Design of the dams and of Pumping Plant II will be started			
39	during this fiscal year.			
40				
41	Upper Feather River			
42				
43	The Contracts Administration Section will assist in the prepa-			
44	ration of a proposal, specification and contract for the con-			
45	struction of the Frenchman Dam and appurtenances. Certain			
46	preliminary surveys will be required in connection with the			
47	dam design and property lines will be surveyed and the right-of-			
48	way unit will complete property maps and the necessary			
49	computations. Proposed relocation of existing roads will be			
50	mapped by contract. It is expected to complete foundation			
51	exploration and the preparation of plans and specifications			
52	for the Frenchman Dam. It is also proposed to initiate			
53	foundation exploration and the design and preparation of plans			
54	and specifications for the remaining 4 dams in this portion			
55	of the work.			
56				
57	North Bay Aqueduct			
58				
59	Contracts Administration Section will assist with the prepara-			
60	tion of proposal, specification and contract forms for the sections			
61	of the aqueduct to be constructed in the near future. The route			
62	will be staked on the ground by survey crew and appraisals of			
63	property and surveys of property lines will be made. The Mar-			
64	keting Section will work on the cost of water and contact the			
65	organized areas to be served as to the extent, point of delivery,			
66	and absorption schedule for water use.			
67	In co-operation with the Marketing Section an economist will			
68	be assigned to work on the study of the costs and benefits to			
69	the water users and their ability to pay for the imported water. It			
70	is proposed to complete the design, and preparation of plans and			
71	specifications for the remainder of this project. This work will			
72	include the Cordelia Pumping Plant, the conveyance system in-			
73	cluding canals and syphons under the estuaries, any intransit			
74				
75				
76	PROPOSED 1958-59 EXPENDITURES^a			
77				
78	San Joaquin Aqueduct

84	Totals, San Joaquin Aqueduct-----	—	—	\$2,282,080
85				
86	^a From Investment Fund unless otherwise indicated.			

reservoirs found necessary or desirable and the terminal reservoir near Novato.

Oroville Features

It is expected to substantially complete the general design of the dam including the performance of certain items of additional geologic exploration needed to support this design. It is proposed to complete plans and specifications for the first items of construction to be placed under contract during the following fiscal year, such as, clearing, the diversion tunnel, and the penstock tunnels. It is also proposed to complete design of the diversion dam, the Thermalito Power Canal, the Thermalito Power Plant, and the afterbay. Preparation of purchase specifications for the major units of the Oroville Power Plant and Thermalito Power Plant will be started.

The Contracts Administration Section will prepare specifications, bid proposal and form of contract for portions of the relocation of the Western Pacific Railroad and other relocations to be constructed. Surveys will be made of the final location of the Western Pacific Railroad and utility crossings involved and right-of-way monuments will be established at the limits of state properties to be acquired. The Marketing Section will make operation studies on Oroville Reservoir to determine the most economic number of power units and the best operation to the end of securing the greatest return from power sales.

Alternate Aqueduct Routes Studies

The investigation of alternative Feather River Project aqueduct routes has as its objective the determination of the proper route by which to bring Feather River Project water into Southern California from the San Joaquin Valley. In order to accomplish this objective, the work of the investigation is being carried on along five major activities. These five major activities include the following:

- Coastal Aqueduct Routes
- San Joaquin Valley Routes
- Tehachapi, San Gabriel, and San Bernardino Mountains Routes
- Project Water Service in Southern California
- Demand for Project Water

It is proposed to submit a final report based upon the findings of the foregoing activities during the 1958-59 Fiscal Year.

South Bay Aqueduct

It will be necessary to relocate utility crossings of the proposed aqueduct and make surveys along the route on the ground as laid out on paper. The Marketing Section will be involved in making studies of the cost of water, the extent of possible water sales, and areas of delivery. It is proposed to substantially complete the foundation exploration, design, and preparation of plans and specifications for remainder of the conduit system beyond the Brushy Peak Tunnel. During this fiscal year it is also proposed to substantially complete the subsurface exploration and design of the storage reservoirs at Arroyo del Valle, Airport and/or Evergreen. The exact extent of the South Bay Aqueduct and the reservoirs to be utilized have not yet been determined, but this design work will be in accordance with a determination made from the studies currently under way and expected to be completed within a few months. This project is financed from Item 419.5, Budget Act of 1956.

RECLAMATION BOARD

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1				
2	Through this board, the State co-operates with the Federal Government in the construction of flood control projects in the Sacramento-			
3	San Joaquin River drainage basin. The extent of state participation is determined by the several acts adopting and approving			
4	specific projects and for which appropriations to meet the State's cost are made as necessary. Generally such participation con-			
5	sists of the acquisition of rights of way, easements, flowage rights, and the cost of replacement or relocation of permanent im-			
6	provements necessitated by the construction of the flood control works.			
7	The 1958-59 budget proposes the continuation of the Sacramento River Flood Control Project, the San Joaquin River Flood Control			
8	Project and the Middle Creek Flood Control Project.			
9	Total expenditures are estimated at \$5,750,000 of which \$2,600,000 are funds expected to be carried over from current year appro-			
10	priations. Further explanation of the program is found in the support budget for the board.

UNALLOCATED FUNDS FOR PROJECT PLANNING, INCREASED COST OF CONSTRUCTION AND MISCELLANEOUS REPAIRS AND IMPROVEMENTS

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	SUMMARY			
2				
3				
4	TOTAL EXPENDITURES, CAPITAL OUTLAY-----	-	\$1,136,175	\$7,125,000
5	Capital Outlay and Savings Fund-----	-	182,025	625,000
6	State Construction Program Fund ^a -----	-	954,150	6,500,000
7				
8				
9	GENERAL ANALYSIS			
10				
11				
12	Lump sum appropriations have been provided from which allocations to agencies are made as needed. The expenditures from such			
13	allocations are included in the individual agency budgets. That part which has not been allocated but which is estimated to			
14	be needed for further allocations, is included here as an expenditure.			
15	Funds for preparation of complete project planning are proposed to continue the presently authorized procedures for securing			
16	sound cost estimates for subsequently budgeted projects.			
17	Expenditures from available appropriation are estimated for allocation to state agencies upon approval of the State Public Works			
18	Board as prescribed by law for increased cost of construction when the lowest bid on a project is in excess of the available			
19	funds for such project. Savings from completed projects are transferred to this fund and are available by law for such			
20	allocations.			
21	Funds are proposed for miscellaneous repairs and improvements to be allocated to agencies upon subsequent determination of re-			
22	quirements.			
23

Part III. Local Assistance Section

SUBVENTIONS

FOR EDUCATION:

- Apportionments for Public Schools
- Vocational Education—Reimbursements to School Districts
- Child Care Centers
- School Building Construction
- Debt Service on Public School Building Bonds
- Contribution to Teachers' Retirement System
- School Lunch Program
- Special Milk Program
- Free Textbooks

FOR PUBLIC HEALTH:

- Assistance to Local Agencies for Mental Health Service
- Assistance to Local Health Departments
- Assistance to Counties Without Local Health Departments
- Assistance to Counties for Tuberculosis Sanatoria
- Assistance to Counties for Care of Crippled Children
- Assistance to School Districts for the Treatment of Cerebral Palsied Children
- Assistance to Local Agencies for Mosquito Control
- Assistance to Local and Nonprofit Agencies for Hospital Construction

FOR PUBLIC WORKS:

- Local Roads and Highways
- Flood Control
- Postwar Public Works Projects
- Redondo Beach Sea Wall
- Grade Crossing Protection Works
- Storm and Flood Damage Repair
- Earthquake Damage Repair
- Veterans Housing

FOR SOCIAL WELFARE:

- Old Age Security
- Aid to the Needy Blind
- Aid to Partially Self-supporting Blind
- Aid for Institutional Care of Needy Aged and Blind
- Aid to Needy Children
- County Administration of Assistance Programs
- Local Inspection of Homes and Agencies Caring for Aged and Children
- Reimbursements to Counties for Administration and Cost of Care of Adoptions
- County Administration of Child Welfare Services
- Transportation of Needy Children

FOR OTHER PURPOSES:

- Salaries of Superior Court Judges
- Contributions to Judges' Retirement Fund
- County Veterans Service Officers
- County Agricultural Commissioners
- Workmen's Compensation for Civil Defense Workers
- Assistance to Counties for Maintenance of Juvenile Homes and Camps
- Assistance to Counties for Construction of Juvenile Homes and Camps
- Assistance to County Agricultural and Citrus Fairs

SHARED REVENUES

FOR GENERAL GOVERNMENT:

- Apportionment of Liquor License Fees
- Apportionment of Motor Vehicle License Fees

APPORTIONMENT OF FEDERAL RECEIPTS:

- Flood Control Lands
- Forest Reserves
- Grazing Lands
- Potash Lease Rentals

FOR COUNTY ROADS:

- Apportionment of Motor Vehicle Fuel Tax
- Apportionment of Motor Vehicle Registration and Weight Fees

FOR COUNTY AIRPORTS:

- Apportionment of Motor Vehicle Fuel Tax

FOR CITY STREETS:

- Apportionment of Motor Vehicle Fuel Tax

13	GENERAL ANALYSIS			
14	Article IX, Section 6, of the Constitution, provides for state aid to local school districts so as to provide a statewide Public School			
15	System that will offer equal educational opportunities throughout the State. To accomplish this, this section provides that			
16	not less than \$180 per pupil in average daily attendance in the preceding fiscal year shall be apportioned to the Public School			
17	System.			
18	The 1957 Legislature raised this required apportionment to not less than \$193.37 by amending Education Code Section 5153. The			
19	1956-57 fiscal year's apportionment is at the old level of \$180 while those for 1957-58 and 1958-59 are at the new \$193.37 amount.			
20	The cost of the program in 1958-59 is projected at \$572,375,200 based on an average daily attendance of 2,960,000 in 1957-58.			
21	This is an increase of approximately \$40,500,000 over 1957-58.			
22	In addition to these amounts the excess cost of motor vehicle driver training is paid by the State. In 1957 this was likewise in-			
23	creased, from 75 percent of excess cost, or a maximum of \$30, to full cost at a maximum of \$35. These payments are made from			
24	the General Fund. At the time this program was inaugurated a series of fines was also imposed on moving violations of the			
25	Motor Vehicle Code to cover the cost of the new program. In 1958-59 the cost of this program is estimated to be \$2,870,000			
26	based on 82,000 students enrolled in such classes. This is an increase of \$533,713 over payments made in 1957-58.			
27	Other provisions in the Education Code (Sections 7661 to 7666) allow loans from the General Fund in the form of advance ap-			
28	portionments to newly formed junior college districts so that they may operate the first year. These loans must be repaid over			
29	a 2-year period by withholding one-half of the loan each year. In 1956-57 2 new districts were formed while 1 district com-			
30	pleted the repayment. No loans are anticipated in 1957-58 or 1958-59 but repayments of \$20,400 each year are anticipated			
31	from the loans of 1956-57.			
32

12	GENERAL ANALYSIS			
13	Objectives			
14				
15	The purpose of vocational education is to provide training to develop skills, attitudes, working habits and to impart knowledge and			
16	information needed by workers to enter and make progress in employment on a useful and productive basis.			
17				
18	Program and Performance			
19				
20	The vocational education program for California is based on a plan, co-operatively approved and financed by local school districts,			
21	the State Department of Education and the United States Office of Education.			
22	The available funds are expended for supervision and teacher training at the state level and as reimbursements to those local dis-			
23	tricts which meet the established qualifications of the approved program. These reimbursements are based on the magnitude of			
24	the excess costs to the school districts of meeting the prescribed standards.			
25	In accepting federal aids for vocational education, the State has provided continuing appropriations to match in part federal grants			
26	in aid contained in these acts. After deduction of state operating costs, the remaining balances of state and federal funds for			
27	supervision and teacher training costs are distributed to public secondary school districts maintaining approved courses in voca-			
28	tional instruction in agriculture, homemaking, business education, and industrial occupations.			
29	The available funds have been allocated to programs at the local level as follows:			
30				
31	Agriculture	\$355,095	\$343,688	\$339,714
32	Industrial	868,887	958,624	801,394
33	Homemaking	318,936	305,141	305,197
34	Business	116,471	103,083	94,035
35				
36	Total Expenditures to School Districts	\$1,659,389	\$1,710,536	\$1,540,340
37				
38	The 1956-57 expenditures were distributed between state and federal funds as follows:			
39				
40		STATE	FEDERAL	TOTAL
41	Agriculture	\$51,980	\$303,115	\$355,095
42	Industrial	116,068	752,819	868,887

7				
8				
9	Objectives			
10				
11	Child care centers are established to provide care and supervision of children where it is necessary for the parent to work, and the			
12	parent qualifies on the basis of need.			
13				
14	Program and Performance			
15				
16	To carry out this program the State furnishes two-thirds of the cost averaging \$0.26 per hour on a statewide basis for the mainte-			
17	nance and operation of the centers. The balance is paid from fees collected from those persons utilizing the program.			
18	The Child Care Center Program was established on a temporary basis by the 1943 Legislature and made a permanent program during			
19	the 1957 General Session of the Legislature. There are, at present, 247 Child Care Centers in 46 school districts, comprising 21			
20	counties within the State, which accounted for approximately 16,309,000 hours of attendance during 1956-57.			
21	The following table illustrates the past, current, and proposed year financial activities of this subvention:

School Building Construction

SUMMARY

54	TOTAL EXPENDITURES			
55	Local assistance (General Fund)-----	\$29,234	\$14,950	—
56	Local assistance (State School Construction Fund)-----	—	—	\$200,000
57				
58	Totals -----	\$29,234	\$14,950	\$200,000

GENERAL ANALYSIS

The State Allocation Board, under provisions of this program, apportions money to local school districts which are impoverished to the extent that their tax rate was within one-half cent of the legal maximum, and their bonded debt exceeded 95% of the amount permitted by law.

Chapter 1840, Statutes of 1955, appropriated \$50,000 to finance completion or reimbursement to districts for projects for which apportionments have previously been made.

Chapter 2391, Statutes of 1957, appropriated \$3,300 for impoverished school districts to reimburse the district for expenditures made for a project for which an apportionment has been previously made.

Chapter 2383, Statutes of 1957, created the School Building Construction Fund to make loans to school districts in construction project areas. A sum of \$1,000,000 is available for transfer to the State School Construction Fund from the Investment Fund.

It is estimated that preliminary work will require approximately \$200,000 in financing during the latter part of the 1958-59 Fiscal Year.

33	GENERAL ANALYSIS			
34	Objectives			
35	Proceeds from bond sales are loaned to impoverished school districts of the State of California for the purpose of providing adequate school facilities. The school districts repay the loans over a period of years. The bonds that have been authorized and sold constitute valid and legally binding general obligations of the State.			
36	Program and Performance			
37	The school building loan program was started in 1949, for the purpose of assisting local school districts in providing urgently needed public school facilities. The school districts which are financially able to do so will repay all or part of the amounts advanced to them. The amount to be repaid each year from each school district is measured by the relationship between the assessed valuation of the district and the amount the district must raise by local property taxes for payment on its bonded indebtedness. Effective in the 1957-58 Fiscal Year, school districts have the option of requesting deferment of part of the repayment due as authorized by Chapter 1880, Statutes of 1957. With respect to subsequent fiscal years, the school district request must be filed on or before July 1, with the State Controller.			
38	Of the bonds authorized, \$515,000,000 have been sold as of November 30, 1957, and it is estimated that additional sales of \$50,000,000 will be made in April, 1958, and in November, 1958. Interest and redemption charges on these bonds are initially paid from the General Fund. Any moneys in the bond funds which are derived from repayments by the school districts or from premium and accrued interest on bonds sold is available for transfer to the General Fund and is accounted as an offset against the debt service charges paid from the General Fund.			
39	The School Bond Retirement Fund was established by the transfer of \$50,000,000 from the General Fund in the 1952-53 Fiscal Year. Transfers returning funds to the General Fund surplus follow:			
40		1954-55	1957-58	1958-59
41		\$27,369,821	\$10,000,000	\$5,553,992 (estimate)
42	Annual transfers to the General Fund as an offset to debt service account for the remaining funds. The School Bond Retirement Fund will be closed in July, 1958, in accordance with provisions of Chapter 1073, Statutes of 1957.			
43	^a Expenditures from bond funds are not included in budget totals.

Contributions to Teachers' Retirement System

TOTAL EXPENDITURES (<i>General Fund</i>)-----	\$26,764,000	\$8,555,000	\$14,478,393
---	--------------	-------------	--------------

GENERAL ANALYSIS

The State Teachers' Retirement System by 1958-59 will contain 212,400 active members, with an additional retired roll of 20,575 members. Since July 1, 1944, members' contributions have been on a full reserve basis. State contributions are appropriated in amounts required to liquidate the amount of maturing liabilities not funded from the members' accumulated reserve, and the contributions of employers, rather than as the liabilities accrue.

The State's contributions to the Teachers' Permanent Fund and Retirement Annuity Fund is used to finance the major portion of expenditures for retirement allowances. Subventions to local retirement systems and a portion of death benefits from the Retirement Annuity Fund are also provided from state contributions. Expenditures not funded by state contributions are financed from the contributions of the employing agencies and the members.

The subventions to local systems consist of payments of amounts equal to the allowances which would have been payable had the retired members involved been entitled to benefits from the state system alone. The payments are made on the basis of the amounts withheld from local members in the preceding year, and are reduced by one-half of the benefit payable on account of service after 1944 on which no Retirement Annuity Fund contributions have been paid.

The following schedule outlines the expenditure program:

TEACHERS' PERMANENT FUND

Retirement Allowances:			
State Obligation:			
Budgeted -----	\$7,218,000	\$8,555,000	\$8,820,000
Surplus of appropriation brought forward -----	543,516	162,462	368,573
District contributions -----	1,441,582	1,550,000	1,700,000
Members' contributions -----	449,093	550,461	750,000
Total Retirement Allowances -----	\$9,652,191	\$10,817,923	\$11,638,573
Refund to members -----	914,369	990,000	1,080,000
Death benefits -----	139,104	151,000	165,000
TOTAL EXPENDITURES -----	\$10,705,664	\$11,958,923	\$12,883,573

^d Interest included in Pooled Money Investment Account per authority of Chapter 1542, Statutes of 1957.

47	GENERAL ANALYSIS			
48	Under the Federal School Lunch Act, federal funds are distributed to school districts offering approved lunches to children on a partially reimbursed basis. During 1956-57, 2,978 schools were participating in this program, an increase of 238 schools over the previous year. Also during 1956-57 a total of \$9,095,000 in surplus food commodities were donated by the Federal Government and distributed through the State Educational Agency for Surplus Property. Handling charges amounting to \$583,000 were reimbursed by the school districts to the Surplus Property Revolving Fund.			
49	No significant program changes are anticipated for the budget year.

71	GENERAL ANALYSIS			
72	This program is sponsored by the Federal Government under the Agricultural Adjustment Act of 1949 (Section 201c) which encourages the public school pupils to consume surplus milk. During 1956-57 4,753 schools within the State were participating in the program. This total represents an increase of 440 schools participating over the previous year.			
73	It is anticipated that during the 1958-59 Fiscal Year the number of participating schools will increase slightly as well as the total enrollment thereby increasing the consumption of this commodity.			
74	This program is administered through the Division of Public School Administration, Department of Education.

GENERAL ANALYSIS

This program provides for the publishing and purchasing of textbooks approved by the State Board of Education and distributing them so as to be available to each pupil in the state Public School System.

In order to meet the growing school enrollment several series of textbooks, amounting to 7,605,000 copies, will be reprinted to fill back orders and replenish depleted inventories in 1958-59. In addition to the reprinting, 2 new textbooks series are being considered for adoption. The first of the new adoptions is a science series which will be distributed as a basic textbook for grades 7 and 8 and as a supplemental text for grades 1 through 6. The second adoption is a health series to be distributed as a supplemental text for grades 1 through 8. The cost of printing these new series, including royalties, is estimated to be \$4,099,800.

57	GENERAL ANALYSIS				
58	Chapter 1989, Statutes of 1957, provided financial assistance to local governments in the establishment and development of mental health services, including services to the mentally retarded, through locally administered and locally controlled community mental health programs. It is designed to augment and promote the improvement and, if necessary, the expansion of already existing local psychiatric services in general hospitals or clinics that help to conserve the mental health of the people of California.				
59	The 1957-58 appropriation was based on a 6-month operation as it was understood that local mental health programs could not be started under this program before January 1, 1958. A 1958-59 appropriation of \$1,900,000 reflects the operational level anticipated during the second year.

1	Assistance to Local Health Departments--Continued						
2	GENERAL ANALYSIS						
3	These federal and state funds are allocated to qualified health departments to provide effective local public health services. State funds						
4	are allocated to local health departments in accordance with Sections 1100-1156 of the Health and Safety Code.						
5	The General Fund provision is based on a formula of the lesser of 60 cents per capita or \$16,000, as a basic amount, plus 20.735401						
6	cents per capita. The 1958-59 amount is calculated on a July 1, 1958, population estimate of 14,730,000. The federal funds						
7	are distributed in the same ratio as state funds. The federal administrative allowance for the polio vaccination program expired						
8	during 1956-57.						
9	An emergency poliomyelitis vaccination program in the past year concentrated on unvaccinated individuals under the age of 40 and also						
10	provided booster shots for those who started the series under the federal program.

28	TOTAL EXPENDITURES (General Fund)-----				\$97,974	\$141,058	\$191,825
29	GENERAL ANALYSIS						
30	Chapter 740, Statutes of 1953, authorized the Department of Public Health to furnish local public health services to those counties						
31	without recognized local health departments who contributed a minimum of 55 cents per capita. This program now includes						
32	Alpine, Colusa, Lassen, Mariposa, Modoc, Mono, Nevada, Sierra, and Trinity Counties. The item includes salaries for 25 exist-						
33	ing positions and their related operating expenses.						
34	Categorical expenditures are as follows:

26				
27	GENERAL ANALYSIS			
28				
29	This hudget provides funds which will permit the Department of Public Health to employ therapists or to enter into contracts with			
30	local health departments to provide for the employment of therapists, for classes for cerehral palsied children. It is intended that			
31	all such personnel will be transferred to local payrolls as soon as feasihle.			
32	The 1958-59 Budget provides funds for 166 therapists in existing classes and 12 new classes which are anticipated to he established.

55				
56				
57				
58	GENERAL ANALYSIS			
59	This subhsidy is allocated to local or public agencies to control mosquitoes. A major portion of the funds are distributed in accord-			
60	ance with an administrative formula which gives emphasis to the presence of mosquito-horne disease and the taxload of the			
61	local agency. During the hudget year, local jurisdictions having a tax rate of less than 15 cents will not participate beyond			
62	the hasis allotment. In accordance with the Budget Act of 1957, requiring a minimum expenditure of \$25,000 for research,			
63	\$42,572 is hudgeted for this purpose.			
64

11				
12	GENERAL ANALYSIS			
13				
14	The California Hospital Survey and Construction Act authorizes the State to participate in the federal hospital construction program.			
15	Hospitals include nursing homes, diagnostic and treatment and rehabilitation centers, and chronic disease hospitals. Allocations are			
16	made to nonprofit as well as governmental hospitals.			
17

45				
46	TOTAL EXPENDITURES, ALL FUNDS -----	\$10,414,340	\$14,387,198	\$9,772,236

^a Allocations from the General Fund in 1957-58, for which formal contracts will be executed in 1958-59, will be \$2,346,892 in excess of available state appropriations. A similar procedure is proposed for 1958-59. It is estimated that General Fund allocations to match available federal funds will amount to \$2,539,227 more than the proposed appropriation, to be formalized by contracts in 1959-60.

10	PROJECT DETAIL			
11	Payments to local agencies of not more than one-half the cost of preparing plans and acquisition of sites for postwar public works			
12	projects and for construction of projects. Funds for construction are allocated one-half to the counties in proportion to population,			
13	plus \$100,000, of which one-third shall be for construction of roads and highways; and one-half to the cities in proportion to popu-			
14	lation. Pursuant to Sections 26 and 27 of the Construction and Employment Act (as amended by Chapters 1435 and 1436,			
15	Statutes of 1955) appropriations for which application has not been made by January 1, 1957, will revert to the General Fund.

GENERAL ANALYSIS

FLOOD RELIEF LAW OF 1956: Chapter 9, Statutes of 1956 (First Extraordinary Session), appropriated \$24,900,000, of which \$14,500,000 is payable from the General Fund and \$10,400,000 was made available for loans from the State Lands Act Fund. The amount appropriated from the General Fund is subject to allocation by the State Public Works Board to provide assistance to local agencies; including any city, city and county, county, or public district, for repair and restoration of public property damaged or destroyed by storm and flood during the months of December, 1955, and January and February, 1956. The amount appropriated from the State Lands Act Fund is for loan to local agencies for the completion of any project or projects wherein the local agencies are unable to meet their share of the cost. The 1957 Legislature appropriated an additional \$1,200,000 to complete the financing of the program.

FLOOD RELIEF REDEVELOPMENT LAW: Chapter 58, Statutes of 1956 (First Extraordinary Session), appropriated \$3,500,000 to provide a loan fund to permit local redevelopment agencies to acquire real property in flood damaged areas during the period that the agencies are planning redevelopment projects and prior to the availability of federal funds to carry them out, and to assist such agencies in financing the local share of such projects.

10	GENERAL ANALYSIS			
11				
12	This is a public assistance program financed by county, state and federal governments for needy persons 65 years and over who			
13	meet certain other requirements such as residence, property, etc. The Social Security Act amendments of 1956 increased the			
14	federal participation in categorical aid payments resulting in an increase in the maximum monthly grant to \$89 on October			
15	1, 1956. Amendments enacted by the 1957 Legislature increased the maximum monthly grant by \$16 to cover special needs and			
16	provided for medical vendor payments on behalf of recipients effective October 1, 1957.

75				
76	GENERAL ANALYSIS			
77				
78	This is a public assistance program financed by county, state, and federal governments to assist persons who, because of loss or			
79	impairment of sight, are unable to provide themselves with the necessities of life, and who meet certain additional eligibility			
80	requirements. The Social Security Act amendments of 1956 increased the federal participation in categorical aid payments re-			
81	sulting in an increase in the maximum monthly grant to \$99 effective October 1, 1956. Amendments enacted by the 1957 Legisla-			
82	ture increased the maximum monthly grant by \$11 to cover special needs and provided for medical vendor payments on behalf			
83	of recipients.			
84	a Includes 300 active cases where aid is suspended for 1 or 2 months for adjustments of overpayments.			
85	b Payments from October 1, 1957, to June 30, 1958.

31				
32	GENERAL ANALYSIS			
33	This is a public assistance program financed by county, state, and federal governments. The primary purpose of the program is to			
34	provide family security and financial assistance for needy children who are deprived of parental support or care. The program			
35	is designed to keep children in a setting of their own family and to enable parents to continue responsibility for the family			
36	living plan. If it is not possible for a child to live with his own family, the program aims to provide the best substitute care			
37	in the home of a relative, in a foster home, or in a children's institution. The program is administered by county welfare			
38	departments and supervised by the State Department of Social Welfare. On October 1, 1956, grants were increased an average			
39	of \$2 per individual as a result of 1956 amendments to the Social Security Act. Amendments enacted by the 1957 Legislature			
40	increased the maximum monthly payments to 1-child families, and provided for medical vendor payments on behalf of			
41	recipients.

56	GENERAL ANALYSIS			
57				
58	This provides for the reimbursement of expenses incurred by counties and cities in maintaining approved services for the licensing			
59	and inspection of agencies for child care and home finding, and agencies for the care of the aged in accordance with the provi-			
60	sions of Sections 1622 and 2302 of the Welfare and Institutions Code. Amendments enacted by the 1957 Legislature changed			
61	the basis for reimbursement from a maximum of \$5 per month per licensed home to a maximum of \$65 per year for each new			
62	or renewal license issued. It is estimated that a deficiency of \$246,396 will occur in the 1957-58 Fiscal Year as a result of an			
63	underestimation of caseload trends and the effects of the 1957 legislative changes.

6				
7	GENERAL ANALYSIS			
8				
9				
10	The State Department of Social Welfare licenses county adoption agencies to accept relinquishments and make adoptive placements			
11	of children and to investigate and report on petitions for adoption filed independently. Licensed county agencies are reimbursed			
12	by the State for all administrative costs. Fees received from adoptive parents (up to \$300) are abated to the cost of admin-			
13	istration.			
14	The cost of care for children committed to the State Department of Social Welfare or a public adoption agency pursuant to Section			
15	226(c) of the Civil Code is reimbursed by the State.			
16	The provision is made in the estimate for 1958-59 to license 3 additional counties for the acceptance of relinquishments and 1 addi-			
17	tional county for the investigation of independent petitions. In the event these counties are not licensed as anticipated, the			
18	Budget Bill authorizes a transfer to the departmental support appropriation of the amount necessary for the department to in-			
19	vestigate and report on independent adoptions.

County Administration of Child Welfare Services

TOTAL EXPENDITURES (*Federal funds*)----- \$74,664 \$162,983 \$140,476

GENERAL ANALYSIS

This provides for reimbursement of expenses incurred by counties for administration of child welfare services in rural areas and in areas of special need and is financed entirely by federal funds.

EXPENDITURES

For county administration of child welfare services----- \$74,664 \$162,983 \$140,476

^b Composed of savings in administration, \$176,465; cost of care of committed children, \$6,029; and increased fees from adopting parents, \$64,745.

¹ Composed of savings in administration, \$46,019; and increased fees from adopting parents, \$26,180.

Salaries of Superior Court Judges

39 TOTAL EXPENDITURES (General Fund) ----- \$2,113,034 \$2,278,897 \$2,355,000

40 Under the provisions of Section 68206 of the Government Code, the State contributes toward the salary of each judge of the
 41 superior courts in accordance with the population of the county as determined by Section 68207 of the Government Code. The
 42 following statement shows the contribution by the State and by the county toward the salary of each judge:

POPULATION OF COUNTY	State's share	County's share	Total salary
45 250,000 or more -----	\$8,500	\$9,500	\$18,000
46 More than 40,000 but less than 250,000 -----	9,000	7,500	16,500
47 40,000 or less -----	9,500	5,500	15,000

48 The amount budgeted is to provide the amount required for each of the 271 judges authorized by existing law.

8	GENERAL ANALYSIS			
9				
10	Pursuant to Sections 970-973 of the Military and Veterans Code, the State reimburses the counties for part of the cost of county serv-			
11	ices maintained for assistance to veterans and the dependents of deceased veterans in presenting and pursuing such claims as the			
12	veteran may have against the United States arising out of war service and in establishing the veteran's right to any privilege,			
13	preference, care, or compensation provided for by the laws of the United States or of this State. The amount paid each county,			
14	conditioned upon the observance of certain standards and regulations, is determined by the California Veterans' Board except that			
15	the payment toward the salary of the county service officer shall not exceed \$75 per month. Payments are also made for partial			
16	cost of assistants' salaries and operating expenses. All counties except Alameda, Alpine, Los Angeles, San Francisco and Sutter			
17	have established county veterans service officers.			
18	No change in program is proposed in this budget.

12				
13				
14				
15	GENERAL ANALYSIS			
16				
17	Under the provisions of Sections 950 through 960 of the Welfare and Institutions Code, the board of supervisors of any county may			
18	establish juvenile homes, ranches, or camps. Wards are committed by the juvenile courts to these facilities in lieu of commitment			
19	to the Youth Authority.			
20	Certain standards prescribed by the Youth Authority must be met by the counties before they are entitled to receive any state funds.			
21	Reimbursements to counties are made for one-half of operating costs, but not in excess of \$95 per month per child. There is no limit			
22	as to the number of camps for which any one county may be reimbursed.			
23	It is estimated that counties will be reimbursed for an average population of 2,181 boys and girls during the 1958-59 Fiscal Year with			
24	a total of 37 camps in operation at the end of the year. Over 2,500 individual boys and girls will be housed in these facilities in			
25	1958-59.			
26

48				
49	TOTAL EXPENDITURES (<i>General Fund</i>)-----	—	\$655,000	\$1,000,000
50				
51				
52	GENERAL ANALYSIS			
53				
54	Pursuant to Sections 962 to 966 of the Welfare and Institutions Code, added by Chapter 2403, Statutes of 1957, the State reimburses			
55	the counties for one-half the cost of construction of juvenile homes, ranch camps or forestry camps not to exceed \$3,000 per			
56	bed unit. Construction includes only construction of new buildings and initial equipment of such buildings. This new program			
57	is administered by the Department of the Youth Authority.			
58	Chapter 2403, Statutes of 1957, includes an appropriation of \$600,000 for this program, a proposed deficiency appropriation plus			
59	the amount originally appropriated will finance the State's share of construction cost of more than 220 additional bed units. The			
60	proposed appropriation will finance a further increase in county capacity in excess of 350 beds.

- Judges' Retirement Fund
- Legislators' Retirement Fund
- State Employees' Retirement Fund
- Teachers' Retirement Funds

4. TRUST, FEDERAL, AND AGENCY FUNDS:

- Department of Employment

5. DISTRICT AND COUNTY FAIRS

CLASSIFICATION OF FUNDS IN THE STATE TREASURY

There are approximately 225 funds maintaining separate accounts in the State Treasury.

The budget totals of revenues and expenditures reflect the activities of 82 of these funds. See Schedule 5 for complete list of these funds. They are segregated into the following classifications:

GENERAL FUND—Consists of money received into the State Treasury not required by law to be credited to any other fund, to be used for general purposes of State Government.

RESERVE FUNDS—Funds created for administrative purposes, from general purpose moneys, which have been set aside for a current or future use.

SPECIAL FUNDS—Funds created to receive certain revenues or to finance particular activities which are for general purposes of State Government or for activities subject to the regulatory or police powers of the State.

OTHER FUNDS—The transactions of the other funds are not included in the budget totals. See Schedule 6 for list of funds which are not included in the budget totals. They consist of moneys which were derived from sources other than general or special taxes, licenses, fees or other state revenues, receipts from the Federal Government, funds created for accounting purposes, or moneys held in trust. Funds not included in the budget totals are segregated into the following classifications:

WORKING CAPITAL AND REVOLVING FUNDS—Funds created to finance services for governmental agencies for which charges are made at cost to maintain a fixed accountability. The charges are reflected as expenditures in the budget of the agency receiving the commodity or service.

UTILITY FUNDS—Activities operated under state control for the benefit of the public. Funds are derived from charges to those who use the service and no support is derived from taxes, licenses or other state revenues. These functions are not subject to the regulatory or police powers of the State.

BOND FUNDS—To hold proceeds from sale of bonds and to finance projects for which the bonds were authorized. The cost to the State is charged at the time interest payments are made and when the bonds are redeemed.

RETIREMENT FUNDS—Moneys held in trust by the State for retirement benefit payments.

DEBT SERVICE FUNDS—Moneys held by the State to be used for payment of interest or for redemption of bonds.

TRUST AND AGENCY FUNDS—Funds holding moneys in trust pending disbursement to trustors, moneys received from the Federal Government to be expended for specific purposes, and other funds which do not derive their resources from taxes or other state revenues, or are in the nature of transitory funds created for the convenience of accounting receipts or disbursements which are not necessarily revenues or expenditures.

**TREASURY FUNDS FOR WHICH NO DETAILED TRANSACTIONS
ARE REPORTED IN THE BUDGET**

BALLOT PAPER REVOLVING FUND: The fund is used by the Secretary of State to purchase paper for sale to counties and municipalities for their use for election ballots.

OLD AGE AND SURVIVORS INSURANCE REVOLVING FUND: The fund is used by the State Employees' Retirement System to clear employer and employee contributions under the Federal Old Age and Survivors Insurance Program from public agencies included in the agreement between the State and the Federal Government.

STATE PAY ROLL REVOLVING FUND: The fund is used by the State Controller for payment of salaries through the Central Pay Roll System.

INDIA BASIN SINKING FUND: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

SAN FRANCISCO SEAWALL SINKING FUND NO. 2: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

SAN FRANCISCO SEAWALL SINKING FUND NO. 3: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

SAN FRANCISCO SEAWALL SINKING FUND NO. 4: Moneys are transferred from the San Francisco Harbor Improvement Fund and interest is earned on investment of these moneys to provide for payment of interest and redemption of the San Francisco Harbor Bonds.

TEACHERS' RETIREMENT DISBURSEMENT FUND: This is a fund used for the convenience of accounting for disbursements for teachers' retirement benefit payments. Moneys are transferred to this fund from the Teachers' Permanent Fund and the Teachers' Retirement Annuity Fund.

SCHOOL LAND FUND: A nonexpendable endowment fund for public school purposes. Revenues consist of payment of principal and purchase price on sale of school lands. The interest received on the investment of this fund is deposited in the School Fund.

SPECIAL DEPOSIT FUND: Accumulation of numerous trust funds deposited by state and private agencies for a specific purpose. This fund also contains unclaimed checks and deposits pending either payment to the proper persons or transfer to the General Fund. The transactions of this fund are so numerous and so indefinite that no attempt is made to estimate the volume that will flow through the fund.

STATE PARK CONTINGENT FUND: Receives moneys from gifts, bequests, from municipal or county appropriations, or donations, for improvements, additions, or administration of the State Park System. The amounts received are disbursed in accordance with the provisions of the donations.

TAX-DEEDED LAND RENTAL TRUST FUND: Receipts are derived from leases made by the State Controller covering property deeded to the State for taxes. The rentals are paid semiannually to the county in which the property is located for distribution to the taxing agencies.

TORRENS TITLE ASSURANCE FUND: Fund contains unexpended balance of fees and investment income of one-tenth of 1 percent of assessed value of land and improvements insured under the Torrens Title Assurance Act. An outstanding judgment against the fund exceeds the assets of the fund. There is no current activity in the fund.

TREASURY TRUST DEPOSITS: Provides for the State Treasurer's Central Banking System.

UNCLAIMED PROPERTY FUND: This fund accounts for all unclaimed moneys held by the State.

CONDEMNATION DEPOSITS FUND: Contains deposits held in trust pending settlement of court cases in condemnation proceedings.

MEDICAL CARE PREMIUM DEPOSIT FUND: Contains money received from state and federal sources pending disbursement for medical care for public assistance recipients.

Objectives

The Correctional Industries program of the Department of Corrections was established to provide a balanced and diversified work program enabling inmates to acquire the good work habits and occupational skills necessary for successful adjustment in order that they might be returned to free society as useful citizens. This program plays a significant role in the elimination of inmate idleness which would otherwise contribute to the causes of both mental and physical degeneration.

Another objective of the Correctional Industries program is to develop work programs which will contribute to the rehabilitation of prisoners with minimum competition with private industry and free labor.

Program and Performance

The Correctional Industries Commission, representing organized labor, industry, agriculture, and the general public, is the policy-making body for this activity. It is empowered to recommend productive industrial and agricultural enterprises for the prisons. This includes determining the advisability and suitability of establishing, expanding, diminishing, or discontinuing any industrial or agricultural enterprise involving a gross annual production of not more than the maximum determined by the formula established by the Legislature.

The Correctional Industries program includes 26 industrial and 19 agricultural enterprises which have been established in all the correctional institutions of the department except the Medical Facility. About 3,250 men or 20 percent of the total prison population will be employed during the 1958-59 Fiscal Year. Activities include industrial operations such as the license plate factory at Folsom and the cotton textile mill at San Quentin.

A detergent mixing and blending enterprise is currently being established at San Quentin. Correctional Industries Commission approval has been secured to establish a paper converting enterprise and a container manufacturing project at Soledad.

Expansion of the dairy operations at Chino and Soledad are now under way. Milk will be furnished to nearby Department of Mental Hygiene institutions from these facilities.

Numerous new items have been added for production in existing enterprises. Recent additions to existing lines are school seating equipment, tablet desk chairs, tee shirts, American and California Bear flags, and Melton jackets for institutional use.

Present plans are to transfer the tobacco enterprise from San Quentin to the Men's Colony about July 1, 1958.

Sales of products resulting from the employment of men in this program totaled \$4,269,509 during the 1956-57 Fiscal Year. Estimated sales for the 1958-59 Fiscal Year are \$5,666,020. Products are sold only to the tax-supported agencies of the State and its political subdivisions.

15	Personnel man-years -----	23.3	24.5	25.6	1.1
16					
17	Objectives				
18					
19					
20	The Inmate Welfare Fund is a trust fund held in the State Treasury and administered by the Director of Corrections for the bene-				
21	fit, education, and welfare of inmates in institutions under the jurisdiction of the Department of Corrections. The fund was				
22	established by Section 5006 of the Penal Code in 1945. The primary source of revenue for the fund is profits from the sale				
23	of items to inmates at canteens maintained in each institution under the Department of Corrections. Other revenue is derived				
24	from sale of handicraft items, donations, and other miscellaneous sources. Funds so received are deposited in the State Treasury				
25	and allotted to the various institutions through departmental budgetary procedures. These allotments provide funds for the				
26	operation of the canteens and hobby shops and for recreational equipment and supplies such as fiction books, television sets,				
27	rental of motion picture film, small games, and athletic and recreational programs.				
28					
29	Program and Performance				
30					
31	Since the 1954-55 Fiscal Year the gross fund revenues have been in excess of \$1,000,000 annually. Of this revenue 92 percent is				
32	used in operating the canteen, the handicraft shops and meeting administrative expenses, while approximately 8 percent is				
33	available for the recreation and welfare of the inmates. Until the 1956-57 Fiscal Year these funds were used primarily				
34	for athletic supplies, film rentals, games, and fiction books. During the 1957-58 Fiscal Year a revised policy of allocations				
35	of expenditures between the Inmate Welfare Fund and the General Fund was established due to inconsistencies in the				
36	original policy. Under the revised policy the Inmate Welfare Fund assumed the cost of original complements of television sets for				
37	the institutions; the replacement and upkeep of such equipment; film rentals; fiction books for the libraries; and all athletic				
38	and recreational supplies not a part of the organized athletic program. The General Fund assumed the cost of the organized ath-				
39	letic, educational, and religious programs, part of which had been previously financed from the Inmate Welfare Fund. The instal-				
40	lation of original complements of television sets for all institutions will be completed during the 1957-58 Fiscal Year. The current				
41	major program of the Inmate Welfare Fund is the build-up of the institution libraries fiction book inventory to the standards				
42	recommended by the American Correctional Association. This program is being studied by the department during the current				
43	year to determine the most feasible method of financing. Current estimates are that the program will be phased over the next				
44	5 years.				
45	1 new position of prison canteen manager is included at the State Prison at Soledad, primarily for the increased workload in con-				
46	nection with the activation of the 1,200-capacity North Facility. This position will provide 0.6 personnel man-years at the North				
47	Facility and 0.4 relief at the Central Facility.

Department of Education

CALIFORNIA INDUSTRIES FOR THE BLIND MANUFACTURING FUND PROGRAM

The California Industries for the Blind operates 3 production centers, at Oakland, Los Angeles, and San Diego. The California Industries for the Blind Manufacturing Fund is utilized as a revolving fund in the program of employment of blind and physically handicapped workers. The Workshop for the Blind Manufacturing Fund was created by Chapter 943, Statutes of 1949, by consolidating the assets and liabilities of the then existing Home for the Adult Blind Manufacturing Fund, the Los Angeles Industries Workshop Manufacturing Fund, and the San Diego Industrial Workshop Manufacturing Fund. Chapter 425, Statutes of 1953, changed the fund title to correspond with the program. This fund constitutes a permanent revolving fund used to meet the expenses necessary to purchase materials and production equipment, and payment of wages and salaries and other expenses incident to the production program of the California Industries for the Blind in the State Department of Education. Moneys received for the sale of products manufactured in the production centers are paid into the State Treasury for credit to the fund.

The production centers will continue the manufacture of such items as brooms, mops, various sewing items, mattresses and brushes, as well as placing increased emphasis on subcontract work in the current fiscal year. Work of this nature, such as packaging, sorting, drilling, and assembly has been done for many private firms, particularly in the Los Angeles area, but more attention will be given to it in Oakland and San Diego as well as in Los Angeles during the budget year.

Approximately 350 blind and handicapped individuals will be employed during the 1958-59 Fiscal Year by the production centers for the blind.

GENERAL ANALYSIS

Objectives

The State Educational Agency for Surplus Property is authorized to co-operate with the Federal Government and its agencies in securing the expeditious and equitable distribution of federal surplus property to eligible institutions in California and to assist all such eligible institutions in securing surplus property.

Program and Performance

Surplus property of all federal agencies, as well as surplus foods, is made available to schools and other eligible institutions through this agency. All expenses of procuring, handling and distributing such property are paid by this agency and recovered by nominal service charges. Any excess service charges are refunded to the participating agencies after the close of each fiscal year. Reserves are maintained sufficient to meet any unliquidated obligations.

Availability of hardware and surplus food, and requests therefor from interested agencies, determines the level of expenditures budgeted for this agency. The increasing importance of this agency's operations to eligible institutions of California may be seen by the following tabulation:

Year	Fair value of property distributed
1952-53	\$8,062,400
1953-54	12,590,000
1954-55	13,983,511
1955-56	17,083,736
1956-57	20,216,696
1957-58 est.	21,000,000

In general terms, the work program includes the screening of available property, warehousing of that which is received, processing and repairs where required, and distributing. The work force required has increased in proportion to the workload, as measured in terms of service and handling charges made. This is shown in the following table. The number of positions given are equivalent full-time positions which include temporary help and overtime.

Year	Service and handling charges	Work force
1952-53	\$842,066	110
1953-54	1,331,252	118.5
1954-55	1,424,399	129
1955-56	1,749,657	165
1956-57	2,010,665	196

In the current year 2 surplus property officers were added to the staff because of increased workload as reflected in the estimated distribution of surplus property and because of increased numbers of eligible agencies. These positions are shown as proposed new in the budget year.

GENERAL ANALYSIS

Objectives

Produces the necessary printing for state agencies, the Legislature, and the textbooks for elementary schools.

Program and Performance

The Printing Division is now producing \$8,000,000 worth of printed material annually. This division was established in 1850 by the Legislature and its work consisted largely of printing for the Legislature and the state departments. In 1884 a constitutional amendment was provided whereby the State could print textbooks. Since that time the work of the Printing Division has grown along with the State and there are now approximately 685 people employed by this division. The financing of this division is on a revolving fund basis and there is no annual appropriation for support.

13	GENERAL ANALYSIS				
14	Objectives				
15	To provide centralized services for state agencies in the operation of an automotive pool, centralized purchase and distribution of office				
16	supplies, and maintenance and repair of communication equipment and office machines.				
17	Program and Performance				
18	In order to better provide for some of the needs of state agencies the 4 divisions of this fund were established; Central Stores, State				
19	Garages, Radio Maintenance, and Office Equipment Repair.				
20	The use of a centralized store for the purchase of office supplies provides a cheaper and more economical service for state agencies				
21	than which they could provide for themselves.				
22	In order to make better utilization of automobiles and at the same time provide good service and lower the cost of automobile operation				
23	for state agencies a state automotive pool was established. It is anticipated that there will be approximately 1,650 vehicles in				
24	the pool by June 30, 1959, and they are expected to be driven 21,500,000 miles in the 1958-59 year.				
25	Funds are provided in both 1957-58 and 1958-59 for the purchase of new automobiles. It was anticipated that these new automobiles				
26	would be purchased in 1957-58, but since they will not all be required until 1958-59 authorization to spend the additional funds				
27	provided for augmentation has been proposed to be extended. The additional services will be needed in the budget year.				
28	Communication technicians are distributed in key locations throughout the State to provide installation, modification and maintenance				
29	service for state-owned radio communications systems.				
30	The Office Machine Repair Shop is located in Sacramento to repair state-owned office machines and typewriters. This operation was				
31	transferred from the Buildings and Grounds Division March 1, 1957.

Department of Public Works

DIVISION OF ARCHITECTURE REVOLVING FUND

LINE	EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
------	--------------	-------------------	----------------------	---------------------

STATEMENT OF OPERATIONS

Authorized by Section 14030 of the Government Code, the Division of Architecture Revolving Fund provides the Division of Architecture with a working revolving fund from which to pay the cost of architectural services and construction for state agencies. The resources consist entirely of transfers, subject to the approval of the Department of Finance, from appropriations

for construction and improvements made to the several agencies. Expenditures are reported in the budgets of the agencies to which the appropriations were made. Any unexpended balance remaining after completion of a project is returned to the appropriation and fund of origin.

LEGAL CITATIONS

The functions of the Division of Architecture are defined by Part 5, Division 3 of the Government Code and the following are the more significant provisions:

Section 14100. "The State Architect has general charge, under the department, of the erection of all state buildings * * *"

Section 14255. "Whenever provision is made by law for any project which is not under the jurisdiction of the Department of Water Resources, the project shall be under the sole charge and direct control of the Department of Public Works." A project is defined by Section 14254 as any construction or improvement of any state structure or improvement which will exceed \$5,000 in cost.

Section 14256. "If the total cost of the project will not exceed \$50,000 the State Architect may, with the approval of the Director of Finance, authorize the agency concerned to carry out the project directly."

Sections 14270 to 14275 require full and complete plans and estimates prior to entering into any contract for a project; require work on all projects be done under contract awarded to the lowest responsible bidder except in the event it is found that such procedure is not in the best interest of the State; and prohibit awarding a contract in excess of the estimate.

Sections 14290 to 14402 prescribe in detail the contract procedure to be followed; including advertising for bids, qualification of bidders, award of contracts, and payment.

SCHEDULE OF ESTABLISHED POSITIONS

To accomplish this program the Division of Architecture employs personnel in the technical and craftsman classes as needed.

The salaries of the employees are paid from project funds and such expenditures are reported as a portion of the project cost.

STATE OFFICE BUILDINGS FINANCED BY LOANS FROM TREASURY FUNDS

LINE	CAPITAL OUTLAY EXPENDITURES	ACTUAL 1956-57	ESTIMATED 1957-58	PROPOSED 1958-59
1	MAJOR CAPITAL OUTLAY EXPENDITURES			
3	OFFICE BUILDINGS, VARIOUS CITIES			
5	(Loans From State Trust Funds)			
7	The State Building Construction Act of 1955 provides that the State Public Works Board may issue revenue bonds or certificates to			
8	provide funds to acquire or construct state office buildings when authorized by a separate act or appropriation of the Legislature.			
9	The buildings so acquired or constructed are to be leased by state agencies at a rental rate that will retire the bonds or certi-			
10	ficates and provide for the payment of interest.			
11	The State Public Works Board has entered into an agreement with the Board of Administration of the State Employees' Retirement			
12	System whereby that agency will purchase certificates to finance the construction of the 6 office buildings authorized by Chapter			
13	1687, Statutes of 1955, as amended by Chapter 1647, Statutes of 1957.			
14	It is proposed that a new state office building containing approximately 416,000 net square feet be erected in Sacramento. The Budget			
15	Bill will contain a proposal to authorize the State Public Works Board to issue revenue bonds or certificates in accordance with			
16	the State Building Construction Act of 1955. It is estimated that the cost of this building will amount to \$12,788,900. This pro-			
17	posal will be in lieu of the authorization in the amount of \$6,126,600 made by Chapter 1587, Statutes of 1957.			
18	It is further proposed that the authorization for construction of the San Bernardino Building be changed from the Capital Outlay and			
19	Savings Fund appropriation made by Item 360(a) of the Budget Act of 1957 to an authorization under the State Building Con-			
20	struction Act of 1955.			
21	It is also proposed that authorization for the construction of the Los Angeles State Garage be made in the amount of \$2,855,700. This			
22	garage must be completed at the same time as the new office building and will contain space for 900 cars. Preparation of work-			
23	ing drawings and construction of foundation was authorized by the Budget Act of 1957.			
24	Construction of the San Francisco and Los Angeles Buildings is under way. Construction of the Oakland and Fresno Buildings is			
25	expected to commence prior to June 30, 1958. Construction of the San Diego Building should get under way early in 1958-59.			
26	Location of the site of the San Jose Building has not yet been determined, but it is probable that it will be within the new civic			
27	center area. Anticipated completion dates are as follows:			
29	San Francisco -----		August 1, 1959	
30	Los Angeles -----		June 1, 1960	
31	Oakland -----		January 1, 1960	
32	Fresno -----		January 1, 1960	
33	San Diego -----		April 1, 1961	
34	San Jose -----		January 1, 1962

60	CIVIL DEFENSE HEADQUARTERS BUILDING, SACRAMENTO			
62	(School Land Fund)			
64	Funds have been loaned for the construction of the Civil Defense Headquarters Building and the Highway Patrol Academy from the			
65	School Land Fund under the provisions of Chapter 1597, Statutes of 1951. Under a contract between the Governor, Director of			
66	Finance, and the Commissioner of the California Highway Patrol, the costs of these facilities are to be repaid with interest at			
67	2½ percent per annum by the respective agencies in 240 equal monthly installments.			
72	OFFICE BUILDING, SACRAMENTO			
73	(Department of Agriculture Building Fund)			
76	The Department of Agriculture Building was authorized by Chapter 11, Statutes of 1950 (First Extraordinary Session). Moneys were			
77	transferred from the Department of Agriculture Fund to the Department of Agriculture Building Fund on a loan basis to provide			
78	for construction of the building. Rentals are being paid into the Department of Agriculture Building Fund and returned to the			
79	Department of Agriculture Fund.			
81	^a Financed by loans from trust and other funds and not included in overall budget totals.

12					(16.4%)
13	Personnel man-years -----	500	516.9	520	3.1
14					
15					
16	GENERAL ANALYSIS				
17					
18	Objectives				
19	The purpose of the San Francisco Port Authority is to promote the facilities and administer the operations of the Port of San Fran-				
20	cisco, including the State Belt Line Railroad.				
21					
22	Program and Performance				
23					
24	This agency provides pier services for ships, assigns berths, rents office and wharf space, manages the Foreign Trade Zone, con-				
25	structs and maintains harbor facilities, operates a railroad, solicits cargo, and publicizes the harbor. Users of port facilities pay				
26	tolls, dockage, demurrage, and rental charges set by the authority. The operation of the port is entirely self supporting.				
27	The harbor is publicized through press releases, publications, and advertising. Port traffic representatives solicit cargo for the port				
28	in California, and full-time regional representatives promote harbor business in Chicago, New York, and Washington, D. C.				
29	There is an office representing the authority in London for Great Britain and continental Europe.				
30					
31					
32

9					
10	GENERAL ANALYSIS				
11					
12	The San Francisco World Trade Center organization was established by Chapter 1508, Statutes of 1947, to obtain land, buildings,				
13	works, and property and to operate and maintain them so as to foster and develop domestic and international trade for the benefit				
14	of the entire State.				
15	The San Francisco World Trade Center has been in operation since March, 1956, under management of the San Francisco Bay Area				
16	Council, Inc., by contract. Under this agreement, the contractor is paying 50 percent of the cost of operation from funds donated				
17	by businesses in San Francisco. At the termination of this contract in 1958 this donated support will no longer be available.				
18	Provision is therefore made for operation of the center by the authority directly rather than through a contract as in the				
19	past.

TOLL BRIDGE CONSTRUCTION AND REVENUE FUNDS

LINE	FUND CONDITION	ACTUAL 1956-57	ESTIMATED 1957-58	ESTIMATED 1958-59
1				
2	Toll bridge construction funds consist of proceeds from sale of revenue bonds, the issuance of which is authorized by the California			
3	Toll Bridge Authority. At the present time all toll crossings are situated in the San Francisco Bay area.			
4	The San Francisco-Oakland Bay Bridge:			
5	While currently there are no outstanding bonds against the revenues on this structure, tolls are being continued to pay for the			
6	cost of alterations and improvements authorized by Chapter 2316, Statutes of 1957, and to build up a reserve to assist in the			
7	financing of a future crossing pursuant to Chapter 1056, Statutes of 1953. In addition to the toll revenues on this bridge the			
8	residue of bond proceeds, in separate funds designated as the San Francisco-Oakland Bay Bridge Construction Fund and Southern			
9	Crossing Engineering Fund, are being utilized respectively for improvements to the existing bridge and studies of future crossings.			
10	The Richmond-San Rafael Bridge:			
11	The upper deck of this bridge was completed and opened to traffic September 1, 1956. The lower level was completed in 1957			
12	and, after a period during which either one or the other levels was closed for construction purposes, both levels were fully			
13	opened to traffic on August 20, 1957.			
14	The Carquinez Strait Bridges:			
15	The Toll Bridge Authority has authorized the construction of the parallel Carquinez Bridge and the Martinez-Benicia Bridge			
16	under a single resolution. Bonds, however, have been sold only for the Carquinez Bridge which is now under construction by			
17	the Division of Highways.

6					
7					
8					
9					
10	GENERAL ANALYSIS				
11	Objectives				
12	This program provides residential facilities for state college students, both married and unmarried.				
13					
14	Program and Performance				
15					
16	During the fall of 1946 the Federal Public Housing Administration provided temporary housing facilities for veteran students:				
17	Chico, Fresno, Humboldt, San Francisco, and San Jose State Colleges. These facilities were operated by the various colleges in				
18	agreement with the FPIA from 1946 until October 31, 1948, at which time title to all facilities was transferred to the State in				
19	Public Law 796 of the Eightieth Congress.				
20	On August 1, 1949, Chapter 1485, Statutes of 1949, established the College Auxiliary Enterprise Fund, to which was transferred the				
21	excess of income over expenditures for prior operations. All rents, charges and fees are paid into this fund and are appropriated				
22	therefrom to the Department of Education for maintenance, repairs, and operation of student housing facilities. Funds may also				
23	be expended for construction. The facilities provide housing for veterans or other students at established rates. The units available				
24	at each college are listed below (facilities at California State Polytechnic College are exempted from provisions of the above				
25	statute):				
26					
27		<i>Family dwelling units</i>	<i>Dormitory units</i>	<i>Trailers</i>	
28	Chico -----	57	72 (165 individuals)	—	
29	Fresno -----	52	47 (73 individuals)	—	
30	Humboldt -----	30	84 (221 individuals)	—	
31	San Francisco -----	73	10 (40 individuals)	—	
32	San Jose -----	148	—	20	
33					
34	Totals -----	360	213 (499 individuals)	20	
35					
36	No change in the level of activity of these college housing facilities is anticipated in 1958-59. Rental rates were increased effective				
37	September 1, 1957, to cover increased costs of operation.				
38	In 1957 the Legislature approved an additional residence hall program to be partially financed from a loan from the Federal Housing				
39	and Home Finance Agencies. The program involves some 7,600 capacity for single students at all the state college campuses.				
40	Estimated completion dates for these residence halls range from May, 1959, to February, 1960. Actual occupancy will not occur prior				
41	to September, 1959. Therefore, they are not included in this budget.

9	GENERAL ANALYSIS				
10					
11	The California State Compensation Insurance Fund is a self-supporting enterprise created to offer insurance protection to employers				
12	at the lowest possible cost. This fund operates in competition with other insurance carriers, acting as a yardstick for the				
13	securing of fair premium rates for employers and fair treatment for injured employees. The fund is required by law to use the				
14	same rates and classifications established by the State Insurance Commissioner for insurers generally, and provides that the				
15	rates shall be only those sufficient to carry out the specific purposes stated in law.				
16	Expenditure estimates are predicated on the expectation of a continued increase in business activity. Changes in business conditions				
17	may result in corresponding changes in the various items of expense.

GENERAL ANALYSIS

Objectives

The objective of this division is to assist eligible veterans in the acquisition of a farm or a home. This is a self-sustaining activity not supported by funds derived from taxation.

Program and Performance

Within limitations set forth by law, the department may purchase a farm or home and in turn enter into a contract with the veteran for the sale of the property to the veteran. The cost to the department cannot exceed \$15,000 in the case of a home or \$40,000 in the case of a farm. The contract with the veteran provides for monthly payments which include interest currently computed at 3½ percent and is usually written for a term of 20 years, sometimes less. 17 district offices have been established throughout the State to process applications for assistance under this program.

Property purchases by the department for resale to veterans are currently at a rate of approximately 1,300 per month. This rate is expected to continue through 1958-59, largely due to the limitations of funds available. Past year purchases were at an average rate of 1,144 per month.

From 1922 to June 30, 1957, 111,248 homes and 1,573 farms were acquired for resale to veterans at contract values totaling \$836,424,187. Included in the total are 84,399 properties financed for World War II veterans, and 7,202 for veterans of the Korean emergency. To June 30, 1957, 38,502 contracts have been paid in full.

The Home Protection Plan of life insurance was started on December 1, 1938. Each veteran who is insurable is covered for the exact amount of the unpaid balance of his contract at a cost of 35 cents per month per \$1,000 insurance. The premium was originally set at \$1 per month per \$1,000 but favorable experience permitted a gradual reduction to the present cost. To June 30, 1957, 2,093 insured contract holders have died and \$7,099,469 paid in full settlement of balances due. This insurance provides family protection which generally would not otherwise be carried. In addition to life, insurance against fire and other hazards is required, the coverage being under blanket policies at the low rates of 48 cents (homes) and \$1.20 (farms) per \$100 for a term of 5 years.

RETIREMENT FUNDS

LINE	FUND CONDITION	ACTUAL 1956-57	ESTIMATED 1957-58	ESTIMATED 1958-59
1	JUDGES' RETIREMENT FUND			
2				
3				
4	Receives contributions from the State in the amount of 2½ percent of the salaries for justices of the Supreme Court and of the			
5	district courts of appeal, and judges of the superior and municipal courts. A like amount is deducted from the salaries of the			
6	justices and judges and deposited in the fund. It is anticipated that there will be 482 members contributing to this retirement			
7	fund effective July 1, 1958.			
8				
9	Accumulated Resources, July 1:			
10	Cash in treasury	\$114,902	\$44,043	\$42,152

23				
24	TEACHERS' RETIREMENT FUND			
25				
26	The State Teachers' Retirement System is composed of approximately 212,400 active accounts. Approximately 21,000 members			
27	will receive retirement benefits during 1958-59. The present system became operative July 1, 1944.			
28	3 major funds constitute the State Teachers' Retirement Fund. They are the Teachers' Permanent Fund, the Retirement Annuity			
29	Fund, and the Annuity Deposit Fund, Chapter 1583, Statutes of 1957, authorized the 3 funds to be combined for administrative			
30	purposes only. All other aspects of each fund are carried on as before.			
31	The Teachers' Permanent Fund receives its revenue from members' contributions, contributions from the school district, interest from			
32	invested reserves, and yearly appropriations by the State from the General Fund. Retirement benefits from the fund are currently			
33	\$600 per year to the person who is credited with 30 or more years of service, and who retires at age 60. A pro rata amount of			
34	that amount is paid for less than 30 years of service, and all benefits from this fund are discounted or improved actuarially			
35	if the member retires at an age less than 60 years or over.			
36	The assets of the Teachers' Permanent Fund are divided between 2 reserves (the restricted reserve made up of an original appro-			
37	priation by Chapter 13, Statutes of 1944, Fourth Extraordinary Session), plus accumulated interest, and the unrestricted re-			
38	serve composed of contributions made by members, plus interest accumulated thereon, and including any surplus or deficit of			
39	prior years' appropriations carried forward to the ensuing year.			
40	The Retirement Annuity Fund receives its revenue from the members' contributions, interest from invested reserves, and yearly ap-			
41	propriations by the state from the General Fund. Under Chapter 1395, Statutes of 1955, school districts and employing state			
42	agencies are required to pay contributions equal to 3 percent of the certificated payroll to this fund. The retirement benefits			
43	from this fund are computed on the basis of the member's sex, total service, age at retirement, and the average salary earnable			
44	in the 3 highest consecutive years of earnings. Subventions are made to local retirement systems in lieu of State Teachers'			
45	Retirement System benefits to local members on the basis of service credited by the local systems, and the amount of local			
46	fund allowances.			
47	The Annuity Deposit Fund consists of members' annuity deposits made between July 1, 1935, and July 1, 1944, together with the			
48	interest earned thereon. Chapter 1395, Statutes of 1956, has reopened this fund for additional member contributions. Lack of			
49	information at the current date precludes the estimating of any future contributions to be derived under this provision. Mem-			
50	bers who have contributed to this fund receive an annuity at the time of their retirement but the benefit is based solely on the			
51	value of the members' accumulated contributions.			
52				
53	Accumulated Surplus, July 1:			
54	Restricted reserve, Chapter 13, Statutes of 1944 (Fourth Ex-			
55	traordinary Session)-----	\$30,992,368	\$40,988,753	\$21,292,600

21	GENERAL ANALYSIS				
22					
23					
24	The Department of Employment administers the state employment service and unemployment insurance and disability insurance				
25	systems. The department also performs certain functions in connection with 2 federal programs, the Veterans Readjustment				
26	Assistance Act of 1952 which provides for unemployment allowances for veterans of the Korean conflict and the Federal Un-				
27	employment Compensation Program under Title XV of the Social Security Act which provides unemployment insurance bene-				
28	fits for unemployed federal workers.				
29	The Unemployment Insurance Code provides for payment of disability and hospital benefits in 2 ways: either by the State from the				
30	Unemployment Compensation Disability Fund, financed by a 1 percent tax on wages paid by workers in employment subject to				
31	provisions of the California Unemployment Insurance Code, or by voluntary plans as provided by the code.				
32	The unemployment insurance program provides for payment of benefits to workers who are unemployed through no fault of their				
33	own; but are able to, available for, and actively seeking work, and meet the eligibility requirements of the Unemployment Insur-				
34	ance Code. These benefit payments are made from the Unemployment Trust Fund which is financed through a payroll tax on em-				
35	ployers who are subject to the provisions of the California Unemployment Insurance Code.				
36	The employment service program provides a job placement and counseling service for employers and workers, including a farm place-				
37	ment service. The program includes special services to veterans, older workers, youth, and physically handicapped persons, and				
38	provides for the collection and dissemination of labor market information.				
39	The amount included for support from the Department of Employment Contingent Fund is to provide for one-half of the cost of the				
40	operation of the community employment program. This program involves work with local communities in the promotion and de-				
41	velopment of employment programs and with individual employers in the development of new industrial projects. The other half				
42	of the amount required for the support of this program is paid from federal funds.

1956-57 Fiscal Year

During the 1956-57 Fiscal Year, the number of disability claims filed increased over the two previous fiscal years. The department continued to improve performance through emphasis on administrative and procedural improvements. During this year, a planned course of training was instituted for hospital coordinators and medical secretaries.

Unemployment insurance benefit workloads were at one of the lowest levels since the termination of World War II. The employment service continued to expand its services to employers and work applicant groups. This included increased service to groups which require a specialized service and include: handicapped, veterans, youth, the older worker, parolees, alien refugees, and other groups requiring special assistance.

a Federal funds for unemployment administration are deposited in the State Unemployment Administration Fund and actual cash disbursement is made as a revolving fund.

1	GENERAL ANALYSIS—Continued						
2							
3							
4	1957-58 Fiscal Year						
5							
6	Disability Insurance Administration budgetary requirements are established on a performance basis with the total staff determined						
7	from workload-unit time calculations. For the 1957-58 Fiscal Year, it is anticipated that the principal workload item of State						
8	Plan disability claims will be 20 percent higher than actual experience for the 1956-57 Fiscal Year. This estimate takes account						
9	of changes in the code which will become effective January 1, 1958, including an increase in maximum weekly disability benefits						
10	from \$40 to \$50 and an increase in the hospital allowance benefit payment from \$10 to \$12 a day. The increased amount re-						
11	quested for Disability Insurance Administration in the current and the budget year over the actual year is attributable to the						
12	increase in workloads and increase in average annual salary rate due to the statewide increase in salary ranges which became						
13	effective on July 1, 1957. The unit time requirements for each workload unit is relatively stable over the 3-year period.						
14	An increase has occurred in the unemployment insurance benefit claim filing activities. As total staff requirements are determined on						
15	a performance budgeting basis, the estimated required number of positions includes a proportionate increase.						
16	For the 1958-59 Fiscal Year, the amount for Unemployment Insurance-Employment Service Administration requested is higher than						
17	the estimated requirements for the 1957-58 Fiscal Year because of workload and price increases.						
18							
19	1958-59 Fiscal Year						
20							
21	For the 1958-59 Fiscal Year, it is anticipated that the principal workload item of State Plan disability claims will increase 9 percent						
22	over the number of claims that will be received in the 1957-58 Fiscal Year. This estimate is based on current operating trends.						
23	Staffing requirements are based upon workload estimates in relation to actual unit time experience. Further improvements in						
24	performance are being sought through a statewide review of clerical operations. Additional mechanization of operations will be						
25	explored.						
26	The Unemployment Insurance-Employment Service Administration budget is based upon a 1958-59 Fiscal Year claims load compar-						
27	able to 1957-58 Fiscal Year estimates.						
28							
29							
30	OFFICE OF THE DIRECTOR AND DEPUTY DIRECTOR						
31							
32	The Department of Employment is administered by the Director of Employment. He is appointed by the Governor subject to the						
33	approval of the Senate, and serves at the pleasure of the Governor. He is responsible for all phases of the administration of						
34	the California Unemployment Insurance Code except for certain quasi-judicial functions which are the responsibilities of the						
35	Appeals Board.						
36	The deputy director is appointed by the Governor subject to the approval of the Senate and serves at the pleasure of the Governor.						
37	He assists the director in the administration of the code and acts for the director in his absence. He is also Chief of the						
38	Division of Accounts and Tax Collections.						
39							
40	SALARIES AND WAGES						
41	(See page 132, Salary Supplement)						
42	Director	1	1	1	\$17,000	\$18,611	\$19,000
43	Deputy director	1	1	1	15,500	16,708	17,000
